---

This volume has been prepared in accordance with the provisions of Section 6 (1) of the Census Act (Northern Ireland), 1936, from the census returns made as at midnight of the 28th February—1st March, 1937. The statistics contained herein supersede those contained in the Preliminary Report published in July, 1937, and may be regarded as final.

The census which was taken in 1937 was a special one in the sense that it was limited in scope and was taken during the interval between normal census years, thus bridging the gap between the 1926 census and the next full census. Certain questions usually found on census schedules, such as those regarding occupation and industry, were not asked, but a question as to usual residence was included for the first time.

The 1937 census publications will consist of :—

1. SEVEN COUNTY VOLUMES, each similar in design and scope. The smallest area for which statistics are given in the county volumes is the district electoral division, but statistics in respect of townlands, similar to those given in table 4, have been prepared in the Census Office and are available for reference upon application to the Registrar General.
2. GENERAL REPORT for the whole country, covering in more detail the statistics shown in the county volumes, and, in addition, containing tables on fertility.
3. SUPPLEMENT TO 1926 TOPOGRAPHICAL INDEX. This supplement will be designed for use in conjunction with the 1926 topographical index in order to facilitate reference to the statistics given in the 1937 census reports. It will cover the topographical changes during the intercensal period.

The net prices for the 1937 census publications will be 2s. 6d. for each county volume, 5s. 0d. for the general report, and 1s. 0d. for the topographical index supplement.

This volume completes the series of seven county volumes. The general report and the supplement to the 1926 topographical index will be published as soon as possible. These publications will be obtainable directly from the Superintendent, H.M. Stationery Office, 80 Chichester Street, Belfast, or through any bookseller.

The 1926 census publications are similar in arrangement to the 1937 series (see advertisement on back of cover), but they incorporate additional tables on occupations, industries, education, orphanhood, dependent children, infirmities, and nationality. In addition the 1926 county volumes contain population and housing figures for each townland.

The Registrar General is empowered by Section 6 (2) of the Census Act (Northern Ireland), 1936, to prepare and supply from the census returns statistics other than those published in the census reports at the request and cost of any local authority or person. Any special demands for statistics more detailed than those published (either as regards subject matter or area) can thus, as far as office records permit, be satisfied. Requests for special compilation of census statistics should be addressed to the Registrar General, who will be pleased to advise and furnish an estimate of cost.

## EXPLANATORY NOTES AND DEFINITIONS OF TERMS USED IN THIS VOLUME.

### AREA.

The acreages given are as measured by the Ordnance Survey of 1923-1928 (foreshore being excluded), and relate to the several administrative areas as constituted at the date of the 1937 census. The acreage covered by the larger rivers, lakes, and tideways is not included in the body of tables 4, 6, and 7, but is given in footnotes thereto.

### POPULATION.

The population comprises all persons, including Forces of the Crown, enumerated as at midnight of Sunday, 28th February—1st March, 1937.

The population assigned to each area comprises all persons who were actually present within it, whether as residents or visitors, persons on board ship in port being included in the area adjacent to the port.

In general these definitions apply to the population figures for previous census enumerations which have been included in some of the tables.

### ADMINISTRATIVE DIVISIONS.

The County is divided into seven county districts (one municipal borough, two urban districts and four rural districts), comprising 86 district electoral divisions, three of which are coterminous with the municipal borough and the two urban districts (see table 4).

The County Borough is divided into five wards, each of which is coterminous with a district electoral division (see table 4). The district electoral division forms the unit for the purpose of poor law elections.

Four poor law unions are contained within the County and County Borough. The medical dispensary districts situated in the County and County Borough number twenty-five (see table 6). Poor law unions and medical dispensary districts are, respectively, superintendent registrars' and registrars' districts for the registration of marriages, births and deaths.

There are five parliamentary constituencies in the County and County Borough for elections to the Northern Ireland Parliament, and one for elections to the United Kingdom Parliament, the latter including a portion of Portrush Urban District situated in Antrim Administrative County (see table 12).

The County is divided into nineteen county electoral divisions, which are the units for the purpose of county council elections (see table 7). The County Borough is not divided into county electoral divisions.

The County Council forms an education authority for the County, and its powers and duties are exercised through three regional education committees, whose areas each comprise one or more county districts. The Council of the County Borough forms an additional education authority.

The changes made in the constitution or boundaries of administrative divisions of the County and County Borough during the last intercensal period are as follows :

- (a) Londonderry Urban No. 3 Dispensary District was formed out of portion of Londonderry Urban No. 2 Dispensary District (1st January, 1929) ;
- (b) Coleraine Urban District was made a Municipal Borough (23rd January, 1929) ;
- (c) The creation by the House of Commons (Method of Voting and Redistribution of Seats) Act (Northern Ireland), 1929, of five parliamentary constituencies for the purpose of elections to the Parliament of Northern Ireland.

### HOUSES.

1. The term " House " denotes
  - (a) each structure containing dwelling accommodation (except institutions) which stands alone or is separated from another by a vertical parting wall ;

(b) each institution (viz., hospital, sanatorium, nursing home, infirmary, workhouse, asylum, religious or charitable community, residential school, barracks, or other premises under Naval, Military, Air Force, or Police discipline, prison or other place of detention), regardless of the number of buildings within its precincts ;

(c) each vessel, caravan, tent, or other movable dwelling.

2. The term " Private House " denotes any " House " other than an institution, hotel, boarding house, premises occupied by a caretaker, vessel, movable dwelling, or barn, stable, or out-house occupied on census night. The term includes premises comprising a shop and dwelling, unless occupied by a caretaker.

3. The terms " Boarding House " and " Lodging House " cover any habitation described as such, and any private house containing three or more boarders or lodgers.

4. The term " Inhabited " denotes actual residence of a person or persons on census night. " Uninhabited " houses, therefore, include those temporarily vacant through the absence of the usual occupiers as well as those without tenants. Enumerators were instructed to omit from their enumeration empty houses in such an advanced state of decay that there was little likelihood that they would again be made fit for habitation.

### ROOMS.

1. The rooms enumerated are the usual living rooms, including bedrooms and kitchens, but excluding sculleries (i.e., rooms used *only* for washing, cleaning, or cooking), pantries, cloakrooms, landings, closets or bathrooms, or any warehouse, office or shop rooms.

2. For the purpose of classifying families by rooms occupied (table 10), shared-room occupations—i.e., those in which two or more families have rooms in common—have been rounded up to the next integral number of rooms. Thus, three families occupying  $1\frac{1}{3}$ ,  $2\frac{1}{3}$ , and  $2\frac{1}{3}$  rooms in a 6-roomed house would be shown as occupying 2, 3, and 3 rooms respectively. The extent of the rounding-up process may be ascertained in a general way by reference to table 9, in which the actual number of rooms is given. In cases of 1 room occupations, all persons living therein, whether related or not, have been enumerated as one census family.

### FAMILIES.

The term " Family " denotes

- (a) The inhabitants of each institution (see 1 (b) of " Houses " definition), hotel, boarding-house, lodging-house, or ship ;
- (b) Each person or group of persons occupying separately the whole, or part of, any dwelling other than as described at (a).

" Private Family " means a family enumerated in a " Private House " (see 2 of " Houses " definition).

It should be specially noted that a family or private family for census purposes includes any group of persons, whether related or not, who live together in separate house or room accommodation.

### RATEABLE VALUATION.

The figures shown are those for service of the year ended 31st March, 1937, and have been supplied by the Commissioner of Valuation. Rateable hereditaments include lands, buildings, tolls, railways, tramways, canals, fisheries, turbaries, mines, quarries, waterworks, telegraphs, telephones, and electricity, gas, and water mains.

Subject to the provisions of the Local Government (Rating and Finance) Act (Northern Ireland), 1929, agricultural land and agricultural buildings are completely derated and industrial hereditaments and freight-transport hereditaments are partially derated, the consequent deficiency in the yield of rates being made good by contributions from the Government.

The figures in tables 4, 6, and 7 are the totals of the valuations of the rateable hereditaments in the various areas before reduction on account of derating, but exclude in certain cases the valuations of electricity, gas, and water mains, telegraphs, telephones, fisheries, waterworks, and tramways. The total of such excluded valuations is given in a footnote to the tables.

The totals for the County and County Borough of rateable valuations after reduction on account of derating are given on page xi.

#### USUAL RESIDENCE.

The persons who have been regarded as having their usual residence in the area of enumeration (i.e., county borough, municipal borough, urban district or rural district) include:—

- (1) Those enumerated in their own houses.
- (2) Persons having settled residence in private lodgings.
- (3) Resident domestic servants.
- (4) Scholars, students, etc., living during term time in residential schools, etc.
- (5) Inmates of institutions when the nature of the institution suggested permanent residence.
- (6) Crews of vessels if usually living on shipboard.
- (7) Persons whose usual residence, although not in the building in which enumerated, is still within the area of enumeration.

All other persons have been treated as usually resident in urban or rural areas other than the area of enumeration, or in countries outside Northern Ireland, as stated on the census schedule.

#### BIRTHPLACES.

The very small number of persons whose birthplaces were not stated on the census schedule were assumed to have been born in the county in which enumerated, except in cases of persons with foreign names, and persons stated to be visitors to the household. After further enquiry in these cases it was found possible to classify them under definite headings.

#### RELIGIONS.

The classification of religions includes a separate heading for each religion, the adherents of which number 10 or more (see table 20). The heading "Presbyterian" includes those who call themselves by this name without qualification, together with those who describe themselves as members of the Church of Scotland. Other Presbyterian denominations are shown at the foot of table 20. Members of the Church of England and the Episcopal Church of Scotland have been included under the heading "Church of Ireland." The latter group includes all persons returned as "Church" or "Episcopalian."

#### NUMBERING OF TABLES.

Roman numerals are used in this volume for the tables in Part I and Arabic numerals for the tables in Part II.

#### CONVENTION AS TO DOTS (.) AND DASHES (—).

Throughout this volume dots (.) are used in tabular matter to indicate "none," and dashes (—) are used to indicate that information cannot or is not intended to be given.

#### CORRECTION OF CENSUS DATA.

Every effort has been made to eliminate, as far as practicable, errors and inaccuracies from the census data. The process of correction began with the enumerators, who received full instructions as to the action to be taken in cases of error or omission, and it was continued by a system of check and further enquiry where necessary applied at each stage of the office work. The process was completed by an intensive scrutiny and inter-comparison of the tabulation sheets. This scrutiny and comparison revealed a certain number of incongruities, which, when material, were investigated and corrected in the light of the facts disclosed. In a few cases trifling errors were adjusted arbitrarily.

# PART I.

## STATISTICAL NOTES.

NOTES.—(1) *The definitions, etc., contained in the preceding section apply equally to these notes and to the tables in Part II.*

(2) *The descriptions of areas used in this volume relate to the conditions which existed at the census date. In particular, the term Irish Free State has been employed in the tables, since the name Eire did not come into operation for that area until the 29th December, 1937.*

### AREA.

The area of Londonderry County and County Borough, exclusive of the larger rivers, lakes, and tideways, is 804 square miles, or 15.3 per cent. of the area of Northern Ireland. In 1915 the County lost about one-third of a square mile to Antrim County (see note to table 2).

### POPULATION.

The total population enumerated in the County and County Borough was 142,736, and has increased by 3,043, or 2.2 per cent., since 1926. This is the first increase recorded since 1841. (Figures for census years 1821 onwards are shown in table 2).

TABLE I.

*Intercensal Period	Population at beginning of Period	Births Registered	Deaths Registered	Excess of Births over Deaths	Intercensal Variation in Population	Net movement outwards from the County and County Borough Col. (5)— Col. (6)

1926—1937 (11 years)	139,693	33,763	22,405	11,358	+ 3,043	8,315

\*The populations given relate to the County and County Borough as constituted at the beginning of the intercensal period, and the births and deaths to the County and County Borough as constituted at the time of their registration. A portion of the County of Londonderry was transferred to the County of Antrim in 1915, consequent on the extension of Portrush Urban District.

†Including the deaths of non-civilians of the County and County Borough of Londonderry which occurred outside Northern Ireland.

Comparable figures of natural increase due to the excess of births over deaths, in respect of the County and County Borough as now constituted, are not available for periods prior to 1871, but it is evident that in each of the intercensal periods from 1841 to 1871, as well as from 1871 to 1926, there was a net outward movement of such dimensions as not only to counterbalance the natural increase, but to cause an actual decrease in population. During the past eleven years, however, the net outward movement was of smaller dimensions, and only partially offset the increase which would otherwise have resulted from the excess of births over deaths.

\*The figures given relate to each area as constituted at the date of the 1937 Census.

#### County and Municipal Boroughs, and Urban and Rural Districts.—

In regard to county districts, it will be seen from table II that urban areas as a whole have increased in population since 1926, whilst rural areas as a whole have decreased—thus following the trend of the preceding intercensal period. The only county districts showing increases in population during the past eleven years are Coleraine Municipal Borough, Portstewart Urban District, and Londonderry Rural District. The gain in the seaside resort of Portstewart—55.5 per cent.—is specially noteworthy, whilst it is also of interest to note that the greatest absolute increase occurred in Londonderry Rural District, which adjoins the County Borough. The greatest absolute and relative decrease occurred in the Rural District of Magherafelt.

The population of the County Borough has increased by 2,654, or 5.9 per cent. since 1926, the increase being shared by North, South, and Waterside Wards. Decreases have been recorded in the two most densely populated wards, i.e., East and West Wards.

Taking county districts and County Borough together, the 1937 urban population constitutes 43.7 per cent. of the whole as compared with 41.3 per cent. in 1926, 36.4 per cent. in 1911, and 34.3 per cent. in 1901—the percentages quoted relating to urban areas as constituted at the date of each census.

The persons per acre rates in the urban areas of the County vary between 9.1 in Coleraine and 2.0 in Portstewart; and in the County Borough between 105.9 in West Ward and 14.2 in Waterside Ward. These rates, however, should be used with reserve in measuring the density of population in urban areas, since the acreages of these areas may include widely differing proportions of waste land, land under pasture, etc. In rural districts the rates vary between 0.2 and 0.1 persons per acre.

Table 2 shows that the proportion of females in the population of the County and County Borough has declined steadily since the beginning of the century, and is now 1,031 females per 1,000 males.

Table 3 shows the extent to which the County Borough and each urban and rural area in the County has lost or gained by migration during the intercensal period. It will be noted that whereas migration has been responsible for a loss in the County Borough of over half the natural increase which would otherwise have resulted from the excess of births over deaths, it has accounted for half of the total gain in population in the Municipal Borough and urban districts. In the rural districts the loss by migration more than offset the excess in the number of births over deaths.

Table 4 provides more detailed information regarding county districts and the County Borough and their constituent district electoral divisions, including figures of rateable valuation. The rateable valuation of the County in 1937 was £448,211 before reduction on account of derating, and £208,693 after reduction on account of derating. The rateable valuation of the County Borough in the same year was £203,496 before reduction, and £188,444 after reduction. These figures compare with rateable valuations for the County and County Borough of £330,640 and £124,140, respectively, in 1926, but it is to be noted that during the intercensal period, not only was a derating scheme introduced, but a general revaluation took place.

**Towns and Villages other than Urban Districts.**—Table 5 deals with towns or villages which may be defined as clusters of 50 or more houses with no legally defined boundaries. There are 14 of these towns, and of these one has a population of over 1,000, and eight have a population of between 500 and 1,000 each. The total population of the 14 towns is 8,147. There are no towns created under the Towns Improvement (Ireland) Act, 1854, in County Londonderry.

(a) Londonderry Urban No. 3 District was formed out of a portion of Londonderry Urban No. 2 District in 1929.

**Unions and Dispensary Districts.**—Detailed figures for these areas are given in table 6, and table III gives for dispensary districts in the County Borough population figures in comparison with those recorded at the two previous censuses.

**County Electoral Divisions.**—Detailed figures for these, together with the reference numbers of the district electoral divisions comprised in each, are given in table 7.

**Parliamentary Constituencies.**—A complete record of the parliamentary constituencies of the County and County Borough for elections to both the United Kingdom and Northern Ireland Parliaments is set out in table 12. The number of electors as shown therein is in accordance with the register which came into force on the 15th December, 1937. This register was compiled on the basis of the qualifying period of six months ending on 15th July, 1937, and therefore approximates in point of time to the census date.

In general a person is entitled to be registered as a Northern Ireland parliamentary elector if he or she is twenty-one or more years of age, and

- (a) has the requisite residence qualification of six months and (unless a native of Northern Ireland) has been resident in the United Kingdom for seven years prior to the qualifying date; or
- (b) has occupied for six months prior to the qualifying date business premises of at least £10 valuation; or
- (c) is the wife or husband of a person entitled to be registered in respect of a business premises qualification.

Graduates of full age form the electorate of the constituency of Queen's University, Belfast.

The qualifications for voters at elections for the return of members to serve in the parliament at Westminster are identical with those set out above, except that the overriding provision as to residence in the United Kingdom does not apply.

In considering the number of electors as shown on the register it should be noted that a person's name may appear on the register once only on a residence qualification, but any number of times on a business premises qualification, provided the residence and business premises are all situated in different constituencies. Thus a person having a business premises vote in each of two constituencies for Northern Ireland elections would only have one business premises vote for United Kingdom elections if both business premises were situated in the same United Kingdom constituency.

\*Londonderry Parliamentary County Constituency for United Kingdom elections comprises Londonderry Administrative County and County Borough, together with a portion of Portrush Urban District (total population 673) situated in Antrim Administrative County.

Table IV shows the number of electors for the United Kingdom Parliament having residence qualifications only as a proportion of the total population aged twenty-one years and over as enumerated at the census.

**Education Areas.**—The Londonderry County Council and the Londonderry County Borough Council are the education authorities for the entire areas under

their control. The County is divided into three regional education areas constituted as follows:—

Regional Education Area.	Contents.
Coleraine .. .. .	Coleraine Municipal Borough, Portstewart Urban District, and Coleraine Rural District.
Londonderry and Limavady .. .. .	Limavady Urban District, and Limavady and Londonderry Rural Districts.
Magherafelt .. .. .	Magherafelt Rural District.

The number of male and female children at each age in each education area can readily be obtained from table 17.

### HOUSING—BUILDINGS, ROOMS, FAMILIES, Etc.

**Houses.**—The houses dealt with in tables V and VI comprise all buildings including institutions, etc., which are normally used for dwelling purposes, and, since over 98 per cent. of these are houses containing private dwellings, the comparisons afforded by the tables can be regarded as being broadly applicable to housing of private census families.

1937	141,373	32,345	30,233	2,000	112	4.68	32,028	4.41

\*The figures given relate to the County and County Borough as constituted at the date of each Census. A portion of the County of Londonderry was transferred to the County of Antrim in 1915, consequent on the extension of Portrush Urban District.

The intercensal increase of 2,024 in the total number of houses in the County and County Borough is equivalent to an increase of almost 7 per cent. as compared with an increase in population during the eleven years of just over 2 per cent.

The increase in the number of uninhabited houses is approximately proportionate to the increase in the total number of houses.

**Persons per Inhabited House and Persons per Census Family.**—The average number of persons per house has decreased from 4.89 to 4.68 during the last eleven years. Except for a check in 1926, this ratio has declined steadily since 1851. The size of the census family, which has followed a similar trend since 1851, shows a corresponding decrease in the last intercensal period. As compared with an increase of just over 2 per cent. in the population since 1926, the number of census families has increased by nearly 6 per cent.

Ratios for persons per house, persons per family, and persons per room, in relation to inhabited private houses only, can readily be calculated for each county district and ward of the County Borough from tables 8 and 10. A comparison of these ratios for 1926 and 1937 in respect of the County and County Borough is as follows:—

	County and County Borough		County		County Borough	
	1926	1937	1926	1937	1926	1937

**Housing in County and Municipal Boroughs, and Urban and Rural Districts.**—Tables, 4, 8, 9, and 10 contain detailed 1937 housing and accommodation figures for the wards of the County Borough, and for the Municipal Borough and each urban and rural district, and table VI shows the changes in the numbers of houses in each area during the past eleven years.

There have been increases in the total number of houses in four county districts and in all wards of the County Borough. Of the approximately 2,000 additional houses, 1,100 are in the County Borough and 900 in the County. The increases

in Portstewart Urban District and Coleraine Municipal Borough (88.5 per cent. and 25.3 per cent., respectively), are worthy of special note. The only districts showing decreases are the Rural Districts of Coleraine (in which the loss is negligible), Limavady, and Magherafelt. In the County Borough, the greatest absolute and relative increases occurred in North Ward and Waterside Ward, respectively.

Table VII has been prepared from tables 9 and 10, and shows broadly the distribution by size of private houses and the degree of subletting in the County and County Borough as a whole. It also shows the distribution of private families according to the number of rooms occupied by them. Similar particulars in regard to each county district and county borough ward can readily be obtained from tables 9 and 10 in this volume and corresponding tables in the Londonderry County and County Borough Report for the 1926 census.

For the County and County Borough as a whole substantial increases are recorded in the proportion of 4 and 5 roomed houses, and in the proportion of families in dwelling accommodation containing the same number of rooms. These increases are shared by all the county districts, and by all county borough wards, except East Ward, where the proportions have undergone scarcely any change.

The number of inhabited 1 to 3 roomed houses in all districts, except the East Ward of the County Borough, shows a marked decrease as compared with the number in 1926.

The proportion of private houses sublet in the County and County Borough in 1937 was 4.6 per cent. as compared with 5.6 per cent. in 1926. Subletting is most prevalent in the West Ward of the County Borough.

**Overcrowding.**—In order to determine the measure of accommodation essential if overcrowding is to be avoided, a knowledge of many factors such as size of family, number, ages, and sex of children, and number and size of rooms is necessary. Moreover, it is a matter of individual judgment as to what weight should be given to each factor. In dealing with the accommodation particulars recorded at the census, the size of the census family has been expressed by the number of persons, without regard to sex or age, and the rooms comprising the accommodation have been limited to the usual living rooms. The resulting rates of persons per room have been regarded as an approximate measure of density of room accommodation, and a rate of over 2 persons per room has been assumed to indicate overcrowding.

Tables VIII and IX have been prepared from table 10. The first of these tables shows a marked general improvement in accommodation in the County and County Borough as a whole, and table IX shows that all county districts and county borough wards share in this improvement. The actual amount of overcrowding in the various areas is shown by the population numbers and the relative degree of overcrowding is indicated by the density rates in the category of “over 2 persons per room.”

**Housing in Dispensary Districts.**—Table 6 contains detailed housing and accommodation figures for dispensary districts, which show increases in the number of houses in 15 out of the 25 districts. The greatest relative increases are among certain of the districts in Londonderry and Coleraine Unions. Housing and accommodation rates for dispensary districts in the County Borough are contained in table X.

### INSTITUTIONS, Etc.

The population in each of the types of inhabited buildings, etc., other than private houses, is shown for each urban and rural area in table 11, together with the numbers of inmates of institutions. Table XI gives these particulars for the County and County Borough as a whole in comparison with the corresponding 1926 figures.

The number of hotels and boarding houses and their population in the County and County Borough as a whole both show small decreases, although the number of these premises in the seaside resort of Portstewart has increased from 70 to 117 in the last eleven years. In this connection it may be noted that in addition to the premises described in the census returns as hotels and boarding houses a considerable number of private houses in coastal districts are used for the accommodation of visitors during the summer season. The numbers of inmates of hospitals and nursing homes and institutions for lunatics show substantial increases.

### USUAL RESIDENCE.

The new enquiry at this census as to the "usual residence" of each individual irrespective of the address at which he or she was enumerated has disclosed that only 1.2 per cent. of the enumerated population of Londonderry County and County Borough was normally resident elsewhere than in the urban or rural area of enumeration, and nearly 40 per cent. of these resided outside Northern Ireland. Detailed figures are contained in table 13. This table shows the effect of an adjustment of the enumerated population for usual residence as between the urban or rural area of enumeration and other such areas in Northern Ireland. While this adjustment is comparatively insignificant, it may be noted that it would probably have been larger if the census had been taken some months later. Moreover, the 1937 population figures adjusted for usual residence as at the end of February will

provide better comparisons with population figures similarly adjusted at a future census (which may be taken at some other time of the year) than simple comparisons of populations as enumerated. In the absence of particulars of persons not enumerated in Northern Ireland, but usually resident in the County or County Borough, it is not possible to make a similar adjustment for usual residence as between areas in the County and County Borough and places outside Northern Ireland. If, however, a census enumeration were carried out on the same date throughout the British Isles it could be made to provide most of the particulars required to give effect to such an adjustment.

### SEX, AGE, AND MARITAL CONDITION.

Table 14 shows the population of the County and of the County Borough by single ages and quinquennial age groups for each sex and marital condition, and for convenience of reference corresponding 1926 figures, limited to certain age groups, are shown in table XII.

\*Including 1 female returned as divorced.

If tables XIII and XIV, which have been prepared from tables XII and 14, are examined together, it will be seen that the smallness of the increase in the number of single persons is due in part to the reduction in the number of children under five years of age, and in part to the relatively high rate of increase in the number of married persons. There is a small decrease in the number of widowed and divorced persons

The tendency for the proportion of the population at the older ages to increase and the proportion at the young ages to decrease, which was checked during the previous intercensal period, has been resumed, and the average age of the population, which fell from 30.7 years in 1911 to 30.1 years in 1926, has now risen to 32.2 years. The tendency just referred to is illustrated in the following graph, which shows the trend of the population of the County and County Borough as constituted at the date of each census since 1841, and the trend of the population in five age groups since 1871.

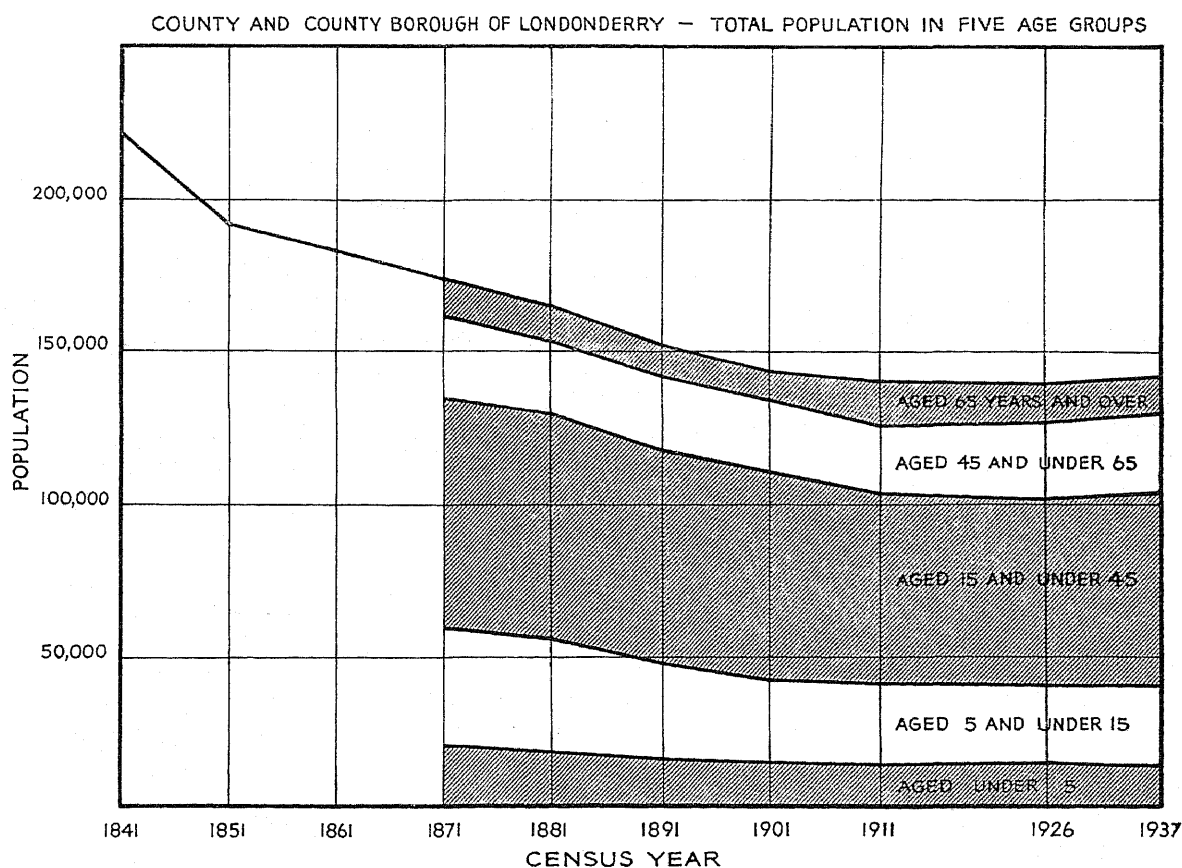

Table 16 shows the population of each county district and ward of the County Borough by sex, marital condition, and quinquennial groups of age. This table has been prepared on lines similar to those adopted in England and Wales, and will facilitate the study of questions of fertility. It will be seen that the number of

females exceeds the number of males in each urban area and that the males are in a majority in each rural area. The population of the aggregates of urban and rural areas, by sex, marital condition, and quinquennial groups of age is given in table 15.

Table 17 shows for the County and County Borough and also for each county district and ward of the County Borough, the population under age twenty-one by sex and individual ages. The numbers are also divided between Roman Catholic and other denominations. A similar division by religions takes place among children at the school ages, during which there is almost complete separation between the two groups. This separation is one of a number of social differences between Roman Catholics and others, and these differences have a considerable statistical significance. For this reason, therefore, in this and certain of the following tables separate figures for Roman Catholics and others have been shown.

TABLE XV.

Table XV has been prepared from table 17, and it will be seen that the percentage of Roman Catholics is greater in the younger age groups. This suggested the possibility of a higher fertility rate among Roman Catholics, and in order to pursue this question table XVI was prepared. The results disclosed by this table do not provide conclusive evidence on this question, but the table does show that, taken together, the areas with the highest proportion of Roman Catholic population have a higher ratio of young children to married women than the remaining areas.

Table XVII has also been prepared from table 17, and shows for each county district and ward of the County Borough the numbers of children at ages 5 and under 15 years, i.e., approximate school ages, by Roman Catholic and other denominations. Of the county districts, Magherafelt Rural District has both the largest number and the highest percentage of Roman Catholic children, while, in the County Borough, West Ward has both the largest number and the highest percentage.

## BIRTHPLACES.

Table 18 shows, by sex, the numbers of persons born in each of the counties of Northern Ireland, other countries in the British Isles, overseas dominions, colonies, etc., foreign countries, and at sea. Of the total population of Londonderry County and County Borough, 81 per cent. were born in the County or County Borough, 5½ per cent. in the adjoining counties of Antrim and Tyrone, 2½ per cent. in the remaining parts of Northern Ireland, and 7 per cent. in the Irish Free State. Only 0.7 per cent. were born outside the British Isles, and over one-third of these were born in British Dominions and Colonies. Persons born in foreign countries numbered 622, and 8 persons were born at sea.

(a) Persons born in the Isle of Man and the Channel Islands have been included under this heading. In 1937 they numbered 10 persons born in the Isle of Man and 6 in the Channel Islands.

(b) The figures given relate to the County and County Borough as constituted at the date of each Census. A portion of the County of Londonderry was transferred to the County of Antrim in 1915, consequent on the extension of Portrush Urban District.

From table XVIII it will be seen that from 1861 until 1926 the tendency was for the proportion of population born in Northern Ireland to fall, and the proportions born in other parts of the British Isles and abroad to rise. This tendency was, however, checked in the last intercensal period when there was an increase in the proportion born in Northern Ireland, and a reduction in the proportions born in the remainder of the British Isles.

Table 19 deals with the numbers of persons in each county district and ward of the County Borough born outside Northern Ireland, and shows them under Roman Catholic and other denominations, by sex, and duration of residence in Northern Ireland. The irregularities in the run of the figures as between males and females in some cases are no doubt due to circumstances peculiar to particular districts. Districts with a high proportion of domestic servants, and those which include schools, institutions, military barracks, etc., for example, might be expected to show some exceptional features.

Table XIX has been prepared from table 19 and shows under Roman Catholic and other denominations the numbers of persons who have come from other countries to reside in the County or County Borough, and were still there on census day. It will be seen that the ratio of such persons to the total population of the same denomination for all periods of residence compares closely as between Roman Catholics and persons of other denominations. The figures, therefore, do not suggest that in recent years there has been any disproportionate influx of persons, either of Roman Catholic or other denominations, from other countries into the County or County Borough, unless any such influx has been offset by a corresponding movement outwards.

### RELIGIONS.

Table 20 shows the population by sex and religion in four main groups for each urban and rural area and ward of the County Borough, and by sex and under twenty-four different descriptions for the County and County Borough as a whole. The highest proportions of Roman Catholics are to be found in Magherafelt and Limavady Rural Districts, and in the West and South Wards of the County Borough.

\* The figures given relate to the County and County Borough as constituted at the date of each Census. A portion of Londonderry was transferred to the County of Antrim in 1915, consequent on the extension of Portrush Urban District.

† Including Church of England, numbering 1,354 in 1937.

From table XX it will be seen that increased numbers and percentages have been recorded for Roman Catholics, Church of Ireland, and persons of other denominations, while Presbyterians show a decrease both in number and percentage. A negligible increase has been recorded in the number of Methodists, but their proportion shows a decrease. From 1861 onwards there has been a steady fall in the proportion of Presbyterians, whilst the proportion of Roman Catholics has been increasing since 1881. The proportions for Church of Ireland, Methodists, and persons of other denominations, have only fluctuated between narrow limits since 1861.

- DEFINITIONS.—1. The term "Population" is defined on page vi. The figures for 1821 and 1831 exclude members of H.M. Forces.
2. The figures given are for the County and County Borough as constituted at the date of each Census. The boundaries of the County were altered by the transfer of a portion of Coleraine Rural District to County Antrim, under the Local Government Board (Ireland) Provisional Order Confirmation (No. 3) Act, 1914.
3. It will be noted that the last two intercensal periods cover fifteen years and eleven years respectively.
