PREFACE

Three censuses of population have been taken since the Government of Northern Ireland was established. The first enumeration took place in 1926 and incorporated questions relating to occupation and industry, orphanhood and infirmities. The second enumeration made in 1937 was of more limited scope and was intended to bridge the gap between the census of 1926 and the census which it was proposed to take in 1941, but which had to be abandoned owing to the outbreak of war. The census taken as at midnight of 8th-9th April, 1951, forms the basis of this report and like that in 1926 questions were asked as to the occupations and industries of the population.

The length of time required to process the data collected at an enumeration before it can be presented in the ultimate reports is necessarily considerable. In order to meet immediate requirements, however, two Preliminary Reports on the 1951 census were published. The first of these gave the population figures by administrative areas and towns and villages, and by Counties and County Boroughs according to religious profession. The Second Report, which was restricted to Counties and County Boroughs, gave the population by age groups.

The present Volume is the second of seven county volumes (the Belfast County Borough volume having been published a short time ago) and has been prepared (as were also the Preliminary Reports) in accordance with the provisions of the Census Act (Northern Ireland) 1951. The statistics now published supersede those shown in the Preliminary Reports and may be accepted as final.

This volume is consistent in design and scope with that published for the Belfast County Borough and the remaining County volumes which will be published at intervals completed will be prepared in like manner.

A General Report for the whole of Northern Ireland will follow the county volumes. This will bring together, and in some respects show in greater detail, the information contained in the county volumes. Additional features will also be introduced particularly in regard to the distribution of the people industrially by age and marital condition.

Following the 1926 census a topographical index was published dealing with each type of area for which statistics were supplied in the county series. A supplement to this index was published after the 1937 census and a further supplement in respect of the 1951 census will be prepared in due course.

Census publications are obtainable either directly from H.M. Stationery Office, Chichester House, Chichester Street, Belfast, or from any book-seller.

PART I

EXPLANATORY NOTES AND DEFINITIONS OF TERMS USED IN THIS VOLUME

AREA

The acreages given are as measured by the Ordnance Survey (foreshore being excluded), and relate to the several administrative areas as constituted at the date of the 1951 census. The acreage covered by the larger rivers, lakes and tideways is not included in the body of Tables 4 and 5 but is given in footnotes thereto.

POPULATION

The population comprises all persons on land, in vessels on inland waters or in port or at anchorage on census night, and also persons on coastwise voyages who arrived in port within a brief period not having been enumerated elsewhere. Members of the Forces of the Crown are also included.

ADMINISTRATIVE DIVISIONS

The County is divided into sixteen county districts (three municipal boroughs, six urban districts and seven rural districts) comprising 146 district electoral divisions, twenty-three of which are coterminous with entire municipal boroughs or urban districts or wards thereof (see table 4). Wards, where they exist in boroughs or urban districts are the units for the purpose of municipal elections. In rural districts the unit is the district electoral division. The County is also divided into twenty-three county electoral divisions, which are the units for the purpose of county council elections (see table 5).

Owing to the abolition of the Boards of Guardians, details of the Poor Law Union and Dispensary districts are not given in this volume. These areas, however, form respectively, superintendent registrars' and registrars' districts for the registration of marriages, births and deaths, and consequently the census tabulations have been prepared in a manner suitable for the extraction of data according to these areas should such be required.

There are seven parliamentary constituencies for elections to the Northern Ireland Parliament, and two for elections to the United Kingdom Parliament (see table 9).

The Antrim Education Area is coterminous with the County.

The changes made in the constitution or boundaries of administrative divisions of the County during the last intercensal period are as follows:-

- (a) Ballymena Urban District was made a Municipal Borough (23rd May, 1939).
- (b) Larne Urban District was made a Municipal Borough (23rd May, 1939); and the boundary was extended (1st April, 1948).
- (c) Carrickfergus Urban District was made a Municipal Borough (1st July, 1949), the boundary having been extended (1st April, 1946).
- (d) A portion of Larne Rural District was transferred to Carrickfergus Urban District (1st April, 1946); and a portion to Larne Municipal Borough (1st April, 1948).
- (e) The creation by the Representation of the People Act 1948 of two parliamentary constituencies for the purpose of election to the Parliament of the United Kingdom.

HOUSES

1. The term "House" means
 - (a) each structurally separate dwelling (except institutions) having distinct access to the street, common stair, or landing.
 - (b) each institution (viz., hospital, sanatorium, nursing home, asylum, religious, welfare or charitable community, residential school, barracks or other premises under Naval, Military, Air Force, or Police discipline, prison or other place of detention), regardless of the number of buildings within its precincts.
 - (c) each boat, caravan, tent or other movable dwelling if occupied on census night but not otherwise.
2. The term "Private House" means a dwelling other than an institution, hotel, boarding house, premises occupied by a caretaker, vessel, movable dwelling, barn, stable or outhouse occupied on census night. The term includes premises comprising a shop with dwelling attached, unless occupied by a caretaker.
3. The terms "Boarding House" and "Lodging House" cover habitations described as such, and any private house containing three or more boarders or lodgers.
4. The term "Inhabited" denotes actual residence of a person or persons on census night. "Uninhabited" houses, therefore, include those temporarily vacant through the absence of the usual occupiers as well as those without tenants. Enumerators were instructed to omit from their enumeration empty houses in such an advanced state of decay that there was little likelihood that they would again be made fit for habitation.

ROOMS

1. The rooms counted are the usual living rooms including bedrooms and kitchens but excluding sculleries (i.e., compartments used only for washing, cleaning, or cooking), pantries, cloakrooms, landings, closets, bathrooms, or any warehouse, office or shop rooms.
2. For the classification of households according to rooms occupied (see Table 7), shared rooms - i.e., those used in common by two or more households - have been included in the number of rooms occupied by the main household in the dwelling. In cases of one room occupations, all persons living therein, whether related or not, have been enumerated as one census household.

HOUSEHOLDS

1. "Non-private Households" comprise all persons enumerated in hotels, boarding houses, lodging houses, shops and institutions (see para. 1 (b) under "Houses" definition above).
2. "Private Households" are comprised of single persons or groups of persons occupying separately the whole, or part of any private dwelling (see para. 2 under "Houses" definition above). Visitors and domestic servants are included in the household with which they were enumerated. Lodgers having or sharing separate accommodation were enumerated on separate returns and consequently are regarded as separate private households.

It should be specially noted that a household or private household for census purposes includes any group of persons, whether related or not, who live together in separate house or room accommodation.

RATEABLE VALUATION

The figures shown are those for the year ended 31st March, 1952, and have been supplied by the Commissioner of Valuation.

Subject to the provisions of the Local Government (Rating and Finance) Act (Northern Ireland), 1929, agricultural land and agricultural buildings are completely

derated and industrial hereditaments and freight-transport hereditaments are partially derated, the consequent deficiency in the yield of rates being made good by way of General Exchequer contributions.

The figures in Tables 4 and 5 are the totals of the valuations in the various areas before reduction on account of derating, but exclude in certain cases the valuations of electricity, gas and water mains, telegraphs, telephones, fisheries, water-works and tramways. The total of such excluded valuations for the county is given in a foot-note to the table.

USUAL RESIDENCE

The persons who have been regarded as having their usual residence in the area of enumeration (i.e., the County) include:-

- (1) Those enumerated in their own houses;
- (2) Persons having settled residence in private lodgings;
- (3) Resident domestic servants;
- (4) Scholars, students, etc., living during term time in residential schools, etc.;
- (5) Inmates of institutions when the nature of the institution suggested permanent residence;
- (6) Crews of vessels if usually living on shipboard.

BIRTHPLACES

The birthplaces of a small number of persons were not stated on the census return; it was assumed that these persons were born in the county or county borough of enumeration, except when they were stated to be visitors to the household, or bore foreign names. After further enquiry in the latter cases it was found possible to classify them under definite headings.

RELIGIONS

The classification of religions includes a separate heading for each religion, the adherents of which number 10 or more (see Table 16). The heading "Presbyterian" includes those who call themselves by this name without qualification, together with those who describe themselves as members of the Church of Scotland. Other Presbyterian denominations are shown at the foot of Table 16. Members of the Church of England and the Episcopal Church of Scotland have been included under the heading "Church of Ireland". The latter group includes all persons returned as "Church" or "Episcopalian."

OCCUPATIONS AND INDUSTRIES

There are two categories into which the population may be grouped in their working capacity, namely, occupation and industry. The sole criterion for determining the occupational classification is the type of work performed. On the other hand, industry has to do with the kind of business with which the occupation is associated. Thus a carpenter working for a firm of shipbuilders would be classified under "Carpenter" for occupation but under "Shipbuilding" for industry.

The 1951 Censuses were carried out simultaneously in all parts of the British Isles and this afforded the first opportunity for Northern Ireland to adopt both occupational and industrial classifications* on exactly the same lines as those used for the rest of the United Kingdom.

Census 1951, Classification of Industries. H.M.S.O. Price 8s. 6d. net.

In the preparation of Tables 19 and 21 the range of Orders, Sub-Orders and Occupational and Industrial unit groups have been modified by combining closely related groups where the numbers were small and the preservation or usefulness of the data was not harmed.

TABLES CONTAINING DOTS (.) AND DASHES (-)

Throughout this volume dots (.) are used in tabular matter to indicate "None", and dashes (-) are used to indicate that figures are not available or that the column headings are not relevant to the lines in which the dashes appear.

CORRECTION OF CENSUS DATA

Every effort has been made to eliminate, as far as practicable, errors and inaccuracies from the census data. The process of correction began with the enumerators, who received full instructions as to the action to be taken in cases of error or omission, and it was continued by a system of check and further enquiry where necessary applied at each stage of the office work. The process was completed by an intensive scrutiny and inter-comparison of the tabulation sheets. This scrutiny and comparison revealed a certain number of incongruities, which, when material, were investigated and corrected in the light of the facts disclosed; trifling errors were adjusted arbitrarily.

PART II

STATISTICAL NOTES

The definitions etc., given in the preceding section apply equally to these notes and to the tables in Part III.

AREA

Descriptions and figures are given for areas as constituted at the date of the 1951 Census, unless otherwise stated.

The area of Antrim County, exclusive of the larger rivers, lakes and tideways, is 1,096 square miles or 21 per cent of the area of Northern Ireland. In 1896 the County lost almost nine square miles to Belfast County Borough, but gained at later dates an aggregate of about half a square mile partly from County Down and partly from County Londonderry (see note to Table 2).

POPULATION

The total population of the County was 231,149, an increase of slightly more than 17 per cent since the preceding census in 1937 when the total population enumerated in the County was 197,266 (an increase of nearly 3 per cent since 1926). Table 2 shows that censuses were taken decennially between 1821 and 1911, and thereafter at irregular intervals and this should be borne in mind when comparing data of one enumeration with another. Increases were shown at the censuses held in 1831 and 1841 but throughout the span 1841 to 1926 a decrease was registered for every intercensal period - the highest percentage decreases being 9.5 per cent for decade 1881 - 1891 and 8.9 per cent from 1891 - 1901. The lowest percentage decreases recorded occurred in the intercensal periods 1901 - 1911 and 1911 - 1926 the figure being 1.1 per cent in each case. An increase of 2.9 per cent was recorded at the 1937 census and 17.2 the largest percentage increase (33,883 persons) ever recorded is in respect of period 1937 - 1951. Reference was made in the report for Belfast County Borough to the development of the Belfast area and it should be noted in connection with the increase in the population of County Antrim that the population of the two Rural Districts, adjoining Belfast, viz., Belfast and Lisburn, increased by 87 per cent and 35 per cent respectively (a total of 20,956 persons).

Natural Increase: The following table sets out figures of the natural increase and the intercensal variation in population in each of the intercensal periods since 1901.

TABLE 1

Intercensal Period	Population at Beginning of Period	Births Registered	Deaths Registered	Excess of Births over Deaths	Intercensal Variation in Population	Net Movement Inwards (+) Outwards (-)
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1901-1911 (10 years)	196,090	46,022	33,286	12,736	- 2,226	-14,962
1911-1926 (15 years)	193,864	62,824	46,543	16,281	- 2,221	-18,502
1926-1937 (11 years)	191,643	41,783	29,050	12,733	+ 5,623	- 7,110
1937-1951 (14 years)	197,266	60,995	37,257	23,738	+33,883	+10,145

* The populations given relate to the County as constituted at the beginning of the intercensal period, and the births and deaths to the County as constituted at the time of their registration. A portion of the County of Londonderry was transferred to the County of Antrim in 1915 consequent on the extension of Portrush Urban District. Owing to the fact that prior to 1899, certain registration units in Belfast Union extended over both the urban and rural portions thereof, it is not practicable to show figures in this table for periods prior to 1901.

Including the deaths of non-civilians of the County of Antrim which occurred outside Northern Ireland.

Although data relative to the period 1821 - 1901 is not available for the County as now defined, it is evident that in each of the intercensal periods from 1841 to 1901, as well as from 1901 to 1926 there was a net outward movement of such dimensions as not only to counterbalance the natural increase, but to cause an actual decrease in population. The position has, however, changed since 1926. The net outward movement during the period 1926 - 1937 dropped to 7,110 from 18,502 in the preceding intercensal period and a net inward movement of considerable dimensions occurred during the period from 1937 to 1951.

It was proposed to include in Table 3 of the county volumes the number of births and deaths in each administrative area during the intercensal period, but as the completion of vital statistics was curtailed for reasons of economy during the war years, it is not practicable to give this information without considerable delay.

Urban (Including Boroughs) and Rural Districts: Table II shows the population by Urban and Rural Districts since 1901 and the variations during the period 1937 - 1951.

* The figures given relate to each area as constituted at the date of the 1951 Census.

† Estimated figure.

As the administrative districts of the County are at present constituted, 165,672 persons live in rural areas and 65,477 in urban areas. The urban population constitutes 28.3 per cent of the whole as compared with 28.1 in 1937; 26.2 in 1926; 23.2 in 1911; and 19.4 in 1901 - the areas being as constituted at the date of each census. Reference has, however, been made to the development of Belfast environs and large tracts of the two Rural Districts of County Antrim adjoining Belfast County Borough are built-up areas. It is estimated that approximately 41,141 persons are

living in these areas which increases the urban population of the county to 106,618 or 46.1 per cent of the whole.

During the period 1901 - 1951, the population of each urban area in the County has increased, the largest increase (95 per cent) being recorded in Portrush Urban District. Each urban area also increased between the censuses of 1937 and 1951.

Four of the rural districts show decreases in population over the 1901 - 1951 period. Two rural districts (Ballycastle and Ballymena) showed fractional decreases between 1937 and 1951, while the remaining five districts increased by percentages varying between 5 and 87.

It will be observed that the densities in the urban districts vary considerably, the averages for Lisburn and Ballymena being 13.0 and 11.6 persons per acre respectively and that for Ballyclare only 2.3. In the rural districts the rates vary between 0.1 and 1.4 persons per acre. The rates for the urban areas should, however, be used with reserve in measuring the density of population, since the acreages of these may include widely differing proportions of waste land, land under pasture etc.

Tables 4 and 5 provide detailed information regarding area, population, housing and accommodation for the various sub-divisions of the County and incorporate figures of rateable valuation. The rateable valuation of the County in 1951 was £1,411,319 before reduction on account of derating and £910,242 after reduction on account of derating. In 1937 the corresponding valuations of the County were £1,097,994 and £624,085 respectively.

Table 4 includes information regarding Towns created under the Towns Improvement (Ireland) Act, 1854, and towns and villages containing 50 houses and upwards with no legally defined boundaries.

The report on the 1937 census showed the population, etc., of the towns of Longlands or Coggrey, Whitehouse Upper and Whitewell which stand on the townlands of Ballygolan, Drumnadrough and Collinward. The development of these townlands for building since 1937 has been such that it is not now possible to segregate the various towns standing on them. The following table, however, gives the aggregate figures for the towns of Longlands or Coggrey, Merville,* Whitehouse Upper, and Whitewell, but it should be borne in mind that the extent of the total area concerned was determined arbitrarily:-

POPULATION				HOUSES					ACCOMMODATION			
1937	1951			1937	1951				No. of Private Households	Population in Private Households	Rooms Occupied	Persons per Room
	Persons	Males	Females		Total	Inhab-ited	Unin-habited	Build-ing				
1,392	6,170	3,010	3,160	553	1,834	1,570	56	8	1,585	6,157	6,517	0.94

*Merville" comprises the area now known as "The Merville Garden Village". The 1937 figures include 302 persons and 75 houses for the corresponding area.

Parliamentary Constituencies: Table 9 sets out the Parliamentary Constituencies of the County for the Parliaments of both the United Kingdom and Northern Ireland together with figures of population, number of electors and electors per 1,000 of the population, distinction being shown in respect of electors with residence qualification.

Under the provisions of the Elections and Franchise Act (Northern Ireland), 1946, a person is entitled to be registered as a parliamentary elector for any constituency returning a member to the parliament of Northern Ireland if he or she is a British subject, 21 or more years of age, not subject to any legal incapacity, and was born in Northern Ireland (or alternatively, has resided continuously in the United Kingdom for a period of seven years ending on the qualifying date) and either:-

- (a) has the requisite residence qualification of three months; or
- (b) has occupied for three months prior to the qualifying date business premises of at least £10 valuation; or

(c) is the wife or husband of a person entitled to be registered in respect of the above business premises qualification; or

(d) was on the qualifying date a member of the forces or a merchant seaman and who, but for such service, would have been residing in Northern Ireland.

The electorate in the Queen's University constituency comprises all graduates of the University who are British subjects of full age, not subject to any legal incapacity.

Under the provisions of the Representation of the People Act, (1949), a person is entitled to be registered as a parliamentary elector for any Northern Ireland constituency returning a member to the Parliament at Westminster if that person is a British subject or citizen of the Irish Republic of twenty-one or more years of age and not subject to any legal incapacity to vote, is resident at an address in that constituency on the qualifying date, and has resided at that address (or at any other address or addresses in Northern Ireland) for a period of three months ending on the qualifying date.

In addition, a person who would ordinarily have been resident at a specified address in a constituency in Northern Ireland, may be registered in respect of a Service qualification if -

- (i) he or she is a member of the Forces; or
- (ii) he or she is a person employed in the service of the Crown in a post outside the United Kingdom; or
- (iii) she is the wife of a person having a Service qualification and is residing outside the United Kingdom to be with her husband.

Education Areas: The Antrim County Council is the Education Authority for the whole area under its control. The arrangement whereby the county was divided into five regional areas was abolished under the Education Act (Northern Ireland) 1947.

HOUSING - BUILDINGS, ROOMS, HOUSEHOLDS ETC.

Houses: The total number of houses, including hotels, institutions, etc., normally used for dwelling purposes was 61,879 of which 57,306 houses were occupied on Census night. The number of occupied houses at the 1937 Census was 46,769, an increase therefore of 10,537, or 22.5 per cent under this category took place in the intercensal period. Table III includes all houses, private and non-private. The number of non-private houses was 563 of which 309 were boarding houses or hotels. The population figures do not include inmates of institutions, but they do include other occupants such as staff.

* The figures given relate to the County as constituted at the date of each census. For particulars of boundary changes, see note at head of Table 2,

The intercensal increase in the number of inhabited houses of 22.5 per cent compares with an increase in population of 16.7 per cent and with an increase in census households of 23.0 per cent. Generally speaking, therefore, a new house was provided for each additional household accommodated in the County, but in considering the housing position the section of these notes which deals with Inhabited Private Houses should be studied.

1,592 houses were in course of erection as compared with 225 in 1937.

Of the 60,287 completed houses, 2,981 were uninhabited on census night and as the demand for houses in 1951 was so much greater than the supply general enquiries were made as to why so many were unoccupied. The following shows the position so far as it can be ascertained:-

Houses from which the usual occupiers were absent on census night, on holiday, etc.	1,250
Summer dwellings	1,151
Houses for sale or affected by change of occupancy	450
Houses about which no information was available	130
	<u>2,981</u>

No enquiry was made as to the room accommodation of these houses.

Table IV shows the changes in the numbers of houses in each administrative area during the intercensal period 1937 - 1951.

(a) The figures given relate to each County District as constituted at the date of the 1951 Census.

The average number of persons (exclusive of inmates of institutions) per house has been steadily decreasing since 1851; it now stands at 3.98. The size of the average census household is also at its lowest point, viz., 3.95.

Table IV shows the changes in the number of houses in each urban and rural area during the intercensal period 1937 - 1951. As regards the increase in the number of houses the remarks in the earlier part of these notes about the development of the area surrounding Belfast should be borne in mind.

All districts show an increase in the number of houses. In the urban areas the greatest numerical increases took place in Carrickfergus (825), Lisburn (685) and Ballymena (553) and the greatest relative increases in Carrickfergus (53.9 per cent), Whitehead (53.5) and Portrush (22.0). In the rural districts the greatest numerical and relative increases took place in Belfast (4,021 additional houses representing an increase of 102.6 per cent) and Lisburn (1,889 and 33.9).

INHABITED PRIVATE HOUSES

Number of Houses and Inhabitants: The following statement sets out the figures for inhabited private houses, persons therein, and the average number per house for censuses 1926, 1937 and 1951 for the County.

	1926	1937	1951
Total Number of Inhabited Private Houses	41,021	46,117	56,743
Total Number of Persons therein	184,051	191,128	222,806
Average Number of Persons per house	4.49	4.14	3.93

The average increase in the number of inhabited private houses per year for the period 1926 - 1937 was 463 and for the period 1937 - 1951 it was 759 but this must be viewed in the light of increases in population in these dwelling houses - the average annual increase of which, for the first intercensal period was 643 whereas in the latter it was 2,263.

The figures for "persons per house", dropped during the period 1926 - 1937 by 0.35 and by 0.21 during 1937 - 1951.

Of the total of 56,743 inhabited private houses 56,375 (99.4 per cent) were occupied by single private households, the remainder 368 being shared by two or more households. This means that 98.6 per cent of the total private households (i.e., 57,167) occupy a single house each.

Table V shows the position as at each census, 1926, 1937 and 1951, for inhabited private houses of various sizes, for the county, and the extent to which they are shared by two or more households.

TABLE V

TOTAL	41,021	100.0	1.2	46,117	100.0	0.3	56,743	100.0	0.6

The number of houses in each category increased during the last intercensal period, though the increase in the houses with 1 - 3 rooms was relatively small representing only 1 per cent compared with 38 per cent increase in the 4 - 5 room group and 17 per cent in the remaining group.

The number of houses providing shared accommodation for households fell steeply between 1926 and 1937 and while the 1951 position is not so bad in this respect as that in 1926 the number has almost trebled since 1937. The number of shared houses is, however, only 0.6 per cent of the total and it will be noted from the table above that the majority are in the category containing 6 or more rooms.

Rooms: It will be observed from Table 6 that the total number of rooms in inhabited private houses was 264,405 (the figure for 1937 was 212,709).

The average number of rooms per house was 4.66 compared with 4.61 in 1937.

The following table gives, for the County, the number of private households occupying various numbers of rooms (irrespective of the number of houses) for the enumerations of 1926, 1937 and 1951:-

TABLE VI

Information incorporated in Tables V and VI can readily be obtained for 1951 for each municipal borough, urban and rural district from Tables 6 and 7.

PRIVATE HOUSEHOLDS

Households: The population of 222,806 occupying private houses was comprised of 57,167 households within the definition of "Private Households" given in Part I. In 1937 there were 46,269 such households. The increase of 10,898 households (23.6 per cent) was at a rate greater than the increase in population comprising them (population increase was 31,678 - 16.6 per cent). The household factor rather than that of population affects the question of housing. In the period 1926 to 1937 the percentage increase in households was 11.2 and that of the population comprising them 3.8. The disparity, therefore, between growth in population and in households was much smaller in the 1937 - 1951 intercensal period than in the earlier one.

Table 7 in which the measurement of households according to the number of persons in each household is detailed shows that the size of household rises from 4,995 households of one person each to 11,633 households of the three person group. The households of four persons number 10,749 but from that point there is a sharp decline. The three person group comprises 20.4 per cent of all households, the two person group 19.8 per cent and the four person group 18.8 per cent - these three categories make up 59.0 per cent of the total number of private households. The comparable figures for 1937 were 19.0 for three person group, 18.4 for households of two and 16.7 for the four person group, making 54.1 in all.

The average size of household was 3.9 persons in 1951 and 4.1 in 1937.

DENSITIES

Table 7 also gives the composition of private households, the number of persons comprising each household, the number of rooms occupied, and the density of occupation.

Private Households: The table shows that 31.0 per cent of the private households occupied 4 rooms each, and that 22.7 per cent occupied one, two or three rooms each.

There were 110 households living at densities of more than four persons per room, 478 households at more than three persons per room and 2,507 households or 4.39 per cent fall within the over two persons per room category which has been assumed to indicate overcrowding.

As shown earlier in these notes the household of three occurs most frequently; but the most common combination consists of the household of four, each occupying four rooms. Of the 13,018 households in the 1 - 3 room group, 2,248 comprise only one person each.

There are 483 households (921 persons) living in one-roomed accommodation, but of these 269 are persons living alone, and 95 of the households comprise two persons each - in 1937 there were 507 households (900 persons) living in one-roomed accommodation. The particulars of households in two and three-roomed accommodation are:-

	1937		1951	
	Households	Persons	Households	Persons
Two-room accommodation -	4,909	15,055	4,283	12,978
Three-room accommodation -	7,105	27,963	8,252	30,227

Of the 56,743 Inhabited private houses 368 or 0.6 per cent were found to be occupied by two or more households - 339 of these accommodated two households and 29 three or more households.

Persons: Of the total 222,806 persons in private houses 91.0 per cent (202,702 persons) were living at not more than two persons per room; in 1937 the percentage was 86.9, and in 1926 it was 81.6. Table 7 also shows that there is an average of 0.84 persons for each room which represents considerably more than one room per person. In 1926 the corresponding figure was 0.99 and that for 1937 was 0.90. Marked improvement in these respects has therefore been achieved during the period 1926 - 1951.

Table VIII gives the densities of room occupation of 1926, 1937 and 1951 Censuses for the County.

* Table VII, dealing with persons per household was restricted to Wards in the Belfast County Borough Volume.

It will be seen that the improvement in each density category started in the 1926 - 1937 period has been maintained during the later intercensal period.

Municipal Boroughs, Urban and Rural Districts: Households occupying one room each in the Ballycastle Rural District number 52 and form 2.5 per cent of the total number of households in the district. The number of persons concerned is 83 or 0.96 per cent of the District population. Fortyseven of the households consist of one or two persons.

In Ballymena Rural District 114 households (1.4 per cent) occupy one room each. The persons number 213 or 0.66 of the population. Ninety of the households consist of one or two persons.

Table IX shows by Municipal Boroughs and Urban and Rural Districts, the population in private households living at 2 persons and less per room and over 2 persons per room, also persons per 1,000 living at these densities, and, for comparison the 1926 and 1937 figures for persons per 1,000 living at density of over 2 persons per room are included.

It will be noted that reductions - some substantial - in the numbers of persons per 1,000 living at a density of over 2 persons per room have occurred in each district except Whitehead Urban since 1937. All districts except Ballyclare Urban and Ballymoney Urban showed a decrease between 1926 and 1937 but in both districts considerable reductions have taken place in the subsequent period.

Despite the general improvement in the housing position it will be observed that in the Urban District of Ballycastle and in the Rural Districts of Antrim, Ballycastle, Ballymena and Ballymoney more than 100 persons per 1,000 are still living at a density of over 2 persons per room. The general situation is, however, a vast improvement on conditions which existed in 1926.

INSTITUTIONS ETC.

The population in each of the types of inhabited buildings, etc., other than private houses is given in Table 8 together with the numbers of inmates in institutions.

Table X gives for the County, those particulars, together with the corresponding figures for 1937.

* The 1937 figures relate to a Poor Law Institution.

In the 1937 report attention was drawn to the drop of 13 per cent in the number of hotels and boarding houses and of their occupants by 29 per cent. Since that date there has been a further drop of 37 per cent in the number of hotels and boarding houses and of approximately 33 per cent in the number of occupants. In Portrush the number of hotels and boarding houses has dropped from 253 to 171 and of their occupants from 1,116 to 773 but this town still contains more than half of the hotels and boarding houses in the County.

Ballycastle Urban and Rural districts show increases in the number of hotels, etc. The figure has risen in respect of the former from 13 to 22.

The increase since 1937 in both the number of inhabited buildings and population under heading No. 12 ("Other Premises") will be noticed. During the interval between the censuses married quarters attached to War Department Establishments were constructed as separate dwellings near to the main Services buildings. Separate returns were completed in respect of these as they are individual houses but they are shown in Table 8 as they are attached to War Department Establishments and, for the same reason, are excluded from the Private House figures.

USUAL RESIDENCE

Table 10 is provided to show as far as the Northern Ireland enumeration can do so the population normally resident in the County of Antrim. Figures are given (for each administrative area) in respect of persons enumerated in the County but usually resident

in some other part of, or outside Northern Ireland, and of those usually resident in the County but enumerated elsewhere in Northern Ireland. Although in 1951 Censuses were taken throughout the British Isles particulars of persons normally resident in any part of Northern Ireland and enumerated in some other country are not yet available. The table therefore is incomplete in this particular aspect.

From the table, however, it will be seen that of the total population of the County, 226,855 or 98.1 per cent were normally resident in the County and 2,981 or 1.3 per cent in some other part of Northern Ireland, leaving only 1,313 or 0.6 per cent who were usually resident outside the Province.

As the number of persons enumerated elsewhere in Northern Ireland but who usually resided in County Antrim was 2,372 the adjustment to obtain the normal residence figure was a net deduction of 609 on the total enumerated population or 2.6 per 1,000 persons. In 1937 the net deduction was 141 persons or 0.7 per 1,000 of the enumeration.

SEX, AGE AND MARITAL CONDITION

Table 11 shows the population of the County according to sex, age (individual years and quinquennial groups) and marital condition. Table XI, although restricted to certain age groups, provides a convenient basis for comparison of the 1937 position with that of 1951.

Sex Proportions. In this County females have been in the majority throughout the whole series of enumerations, 1821 to 1951. The ratios fluctuated from time to time, the disparity being greatest in 1871 when there were 1,100 females to every 1,000 males. The 1937 Report recorded the lowest figure which was 1,055 females to every 1,000 males; the 1951 is the next lowest figure, i.e., 1,060 females to 1,000 males. Although the percentage increase since 1937 was greater for males than females in certain age-groups, particularly ages 35 to 54 and 75 and over (vide Table XI) it is more than offset by the percentage increase of females in most other groups especially 20-24 and 55 to 74.

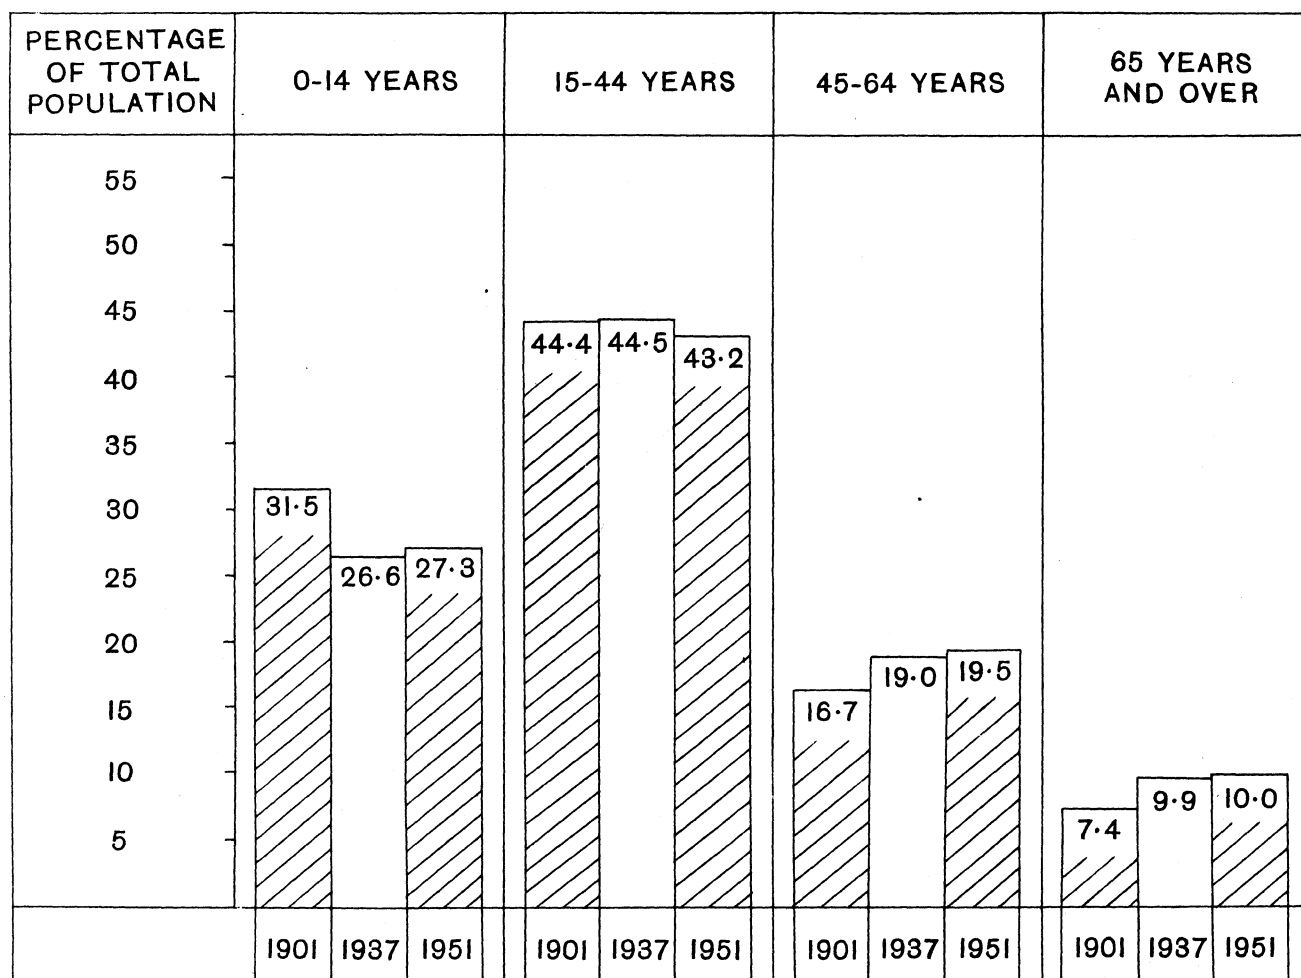

Table 11 reveals that with the exception of the individual years 9, 15 and 17 boys outnumber girls up to the age of 19 years; thereafter at every year the females predominate numerically except at 31 and 37 years and also 96 at which point the figures are the same for both sexes.

Under the age of one year there were 97 girls for every 100 boys. At one year the figure went down to 92 but at the age of 3 the difference was negligible, being almost 100 girls to 100 boys; at 4 years it was 95 and at 5 years of age the differential increased again, to 93 girls to 100 boys. In the quinquennial age-groups under 20 years there was very little variation, the ratio remaining between 95 and 98 females to 100 males. Looking at the higher age ranges there were 110 women to every 100 men in the 45-49 age-group, 123 in the 60-64 age-group and 137 in the 85-89 group.

Ages. Contrary to present day tendencies the average age of the population of County Antrim decreased between 1937 and 1951. In 1911 the average age was 30.0 years it went up to 30.6 years in 1926, to 33.4 in 1937 and fell to 32.6 in 1951, a decrease of 0.8.

The following chart shows the distribution of the population in the four main age-groups for 1901, 1937 and 1951.

CENSUSES (COUNTY OF ANTRIM) 1901, 1937, 1951.

Note :- The figures relate to the County as constituted at the date of each Census.

It will be observed that in the two groups comprising persons aged 45 years and upwards there has been a steady increase throughout although in the 65 years and over group the increase between 1937 and 1951 was only 0.1 per cent whereas in Belfast County Borough this group increased by 1.7 per cent. The somewhat serious drop in the group 0-14 years between 1901 and 1937 has been checked and the 1937 - 1951 period shows an increase of 0.7 per cent. The 15-44 years range which increased slightly (0.1 per cent) in the 1901-- 1937 period shows a decline of 1.3 per cent between 1937 and 1951. The decline in Belfast County Borough for the same age group was 3.5 per cent for 1901 - 1937 and 3.8 for 1937 - 1951.

Table 11 gives the ages of the population by individual years and marital condition for the whole county and Table 12 gives quinquennial groupings according to age and marital condition for administrative areas. Of the quinquennial groups that from birth to 4 years accounts for the highest percentage, i.e., 10.2. In 1937 the 10-14 years age-group was the greatest and represented 9.8 of the enumerated population. The 1951 figures show an increase since 1937 in total population in every quinquennial age-group except the 10-14 years group in which there was a decline from 9.3 per cent to 7.7 per cent of the respective total enumerations. In the groups of males, however, decreases were registered not only in respect of 10-14 years but also for ages 60 to 69 and 95 to 99 but for females the only decrease occurred in the ages 10-19 groups. For persons aged 100 years and over there was no change for either sex.

Marital Condition. Since 1937 the number of persons in the County aged 14 years and over increased by 22,926, of which 10,606 were males and 12,320 were females. The number of single persons of the same age-group decreased by 2,521 (1,031 males and 1,490 females). During the same period the number of married persons increased by 24,139 (11,722 males and 12,417 females).

Single males aged 14 years and over accounted for 41.9 per cent of the male population of the same age in 1951 (49.6 in 1937) and married men for 53.6 per cent (45.1 in 1937). In the same category single females represented 39.2 per cent (47.3 in 1937) and married women 50.5 per cent (42.5 in 1937).

For both sexes the only quinquennial group to show a decrease in married persons during the 1937 - 1951 intercensal period was the males group 60-64 years.

Widowers decreased by 130 whilst widows increased by 1,264. The number of persons whose marriages had been dissolved and who had not re-married increased from 24 in 1937 to 198 in 1951 - divorced men numbered 57 and divorced women 141 in 1951 whereas the figure was 12 for each sex in 1937.

EDUCATION

The information provided by census returns regarding persons attending educational establishments is summarised in Table 13. The figures relative to numbers of persons in full-time attendance are more or less in keeping with expectations, particularly in respect of the ages 5 to 13 years, inclusive; within this group 4.1 per cent were not attending school of which 3.9 per cent were aged 5 years.

The persons attending various educational establishments part-time were shown to number 452. As part-time students enrolled in the institutions of further education under the management of the County Antrim Education Authority during the year ended 31st July, 1951, numbered 5,014, it is apparent that in many cases the information regarding part-time education was not furnished on the census returns.

Much the same result was disclosed by the report for Belfast County Borough but it was then hoped that the position in the Counties would throw some light on the matter. It would appear, however, that the significance of the question was not appreciated by the heads of households.

BIRTHPLACES

Table 14 gives, by sex, the number of persons born in each of the Counties of Northern Ireland, Commonwealth Countries, etc., Foreign Countries, and at sea. Of the total enumeration 69.9 per cent (161,514 persons) were born in the County; 21.9 per cent (50,693 persons) were born in some other part of Northern Ireland and of these

30,334 or 13.1 per cent of the total population were born in Belfast County Borough. Persons born in the Irish Republic numbered 6,583 or 2.8 per cent as compared with 4,560 and 2.3 per cent in 1937, which represents an increase of 44 per cent in 14 years. Only 0.7 per cent were born outside the British Isles.

Persons born in Commonwealth Countries, etc. numbered 795, those born in foreign countries 871 and those at sea 5.

Table XII gives comparative figures since 1861

(a) Persons born in the Isle of Man and the Channel Islands have been included under this heading. In 1951 they numbered 33 persons born in the Isle of Man and 14 in the Channel Islands.

(b) All figures relate to the County as constituted at the date of each Census. For particulars of territorial changes see note at head of Table 2.

From the above Table it will be seen that the percentage of persons born in Northern Ireland decreased whilst the percentages of those born in every other country or group of countries increased.

Figures prior to 1901 are only available for all Ireland; it will be seen, however, that the 1951 percentage for persons born in Northern Ireland stands at its lowest point for the half century and that for persons born in the Irish Republic has reached its highest point.

It is not, however, prudent to attempt a final appraisal as to intercensal fluctuations in a county abutting on a large city and the General Report will possibly be more suitable for a statement of conclusions.

Table 15 shows the numbers of persons in each administrative area born outside Northern Ireland according to sex, duration of residence, whether residents in, or visitors to Northern Ireland, and divided into five religious groups.

Table XIII gives for the whole county, for purpose of comparison, the total number of persons born outside Northern Ireland by duration of residence for censuses 1937 and 1951.

* The figures given relate to the County as constituted at the date of each census. For particulars of territorial changes see note at head of Table 2.
 † Including Church of England and Episcopal Church of Scotland, numbering 2,813 and 11 respectively in 1951.

A scrutiny of Table XIV reveals that Roman Catholics were at their highest percentage (24.3) of the total population in 1861; since that year the figures have fluctuated, reaching their lowest point (20.1 per cent) in 1926. The 1926 - 1937

interval showed an increase of only 0.1 per cent but in the 1937 - 1951 period the increase was by 1.9 per cent to 22.1 which is close to the 1881 figure of 22.2 per cent. On the other hand the Presbyterian Church which also stood at its highest in 1861, viz., 53.4 per cent of the total enumeration, decreased to 44.9 per cent in 1951 which is the lowest on record. The Church of Ireland remained in 1951 the same as in 1937 viz., 22.8 per cent which is its highest figure for the whole ninety years. Methodists attained to their highest percentage at 3.8 in 1951 having advanced somewhat steadily from 1.5 in 1871. The "Other and Not Stated Denominations" were 6.4 per cent of the total population in 1951; this again is the peak for this category. In brief, the only groups that in 1951 exceeded their 1861 figures were the Church of Ireland, Methodists and "Other and Not Stated Denominations".

Turning to the most recent intercensal period - 1937 to 1951 - the Presbyterian Church was the only section to show a percentage decrease, although its percentage of the total population is by far the greatest of all the groups. The percentage Presbyterians of the total population has, in fact, been steadily falling since 1861 but the most serious decrease (3.4) occurred in the last intercensal period. Over the last 50 years the population of the county increased by 35,059 but the number of Presbyterians in the county increased by only 4,266.

As to the number of persons attached to each religious group, Roman Catholics increased by 11,177 since 1937, Presbyterians by 8,568, Church of Ireland by 7,758, Methodists by 2,805 and "Other and Not Stated Denominations" by 3,575.

Table 16 shows the population by sex for each Municipal Borough, Urban District and Rural District under five religious descriptions, viz., Roman Catholic, Presbyterian, Church of Ireland, Methodist, and all other (or not stated) denominations

The list of descriptions of "Other Denominations" given at the foot of the table refers to the County as a whole; the names of denominations are restricted to those having not less than ten adherents.

Viewing the figures numerically it will be seen that Presbyterians preponderate in all municipal, urban and rural areas except Ballycastle Urban and Rural Districts in which Roman Catholics are in the majority, and Lisburn Urban and Rural Districts in which the Church of Ireland register the highest figures.

Of the "Other Denominations", the five categories which show the highest increases as compared with 1937 are: Congregationalists + 904, Brethren + 581, Baptist + 453, Jews + 140 and Jehovah's Witness, who were not shown in 1937 but had 152 adherents in 1951. The number of persons who omitted to state their denomination has increased from 258 to 1,083.

Table 17 gives details for the County under five religious categories and age groups (individual years to age 21, and quinquennial age groups up to 69 years). The comparative table in the 1937 report gave the population by individual years up to 20, and by two religious groups - Roman Catholics and other denominations. It is not therefore possible to make a complete comparison between the 1937 figures and those published in this report; the following list, however, shows the percentage increases or decreases in the various age groups up to 19 years and of the population aged 20 and over between 1937 and 1951:-

<u>Age Group</u>	<u>Roman Catholics</u>	<u>Other Denominations</u>

OCCUPATIONS AND INDUSTRIES

As frequently mentioned in census reports the variety and complexity of occupations and industries in which a population is engaged make it impossible to include in a census report details of every kind of activity. For Northern Ireland Reports the volumes "Classification of Occupations" and "Classification of Industries" referred to in Part I were adopted as these publications are in general use throughout the United Kingdom and provide for uniformity of census data; their convenient arrangement of headings - mainly according to materials worked with, commodities produced or services rendered - is the most recent result of constant review and investigation.

The Northern Ireland census of 1926 was the last occasion on which occupational and industrial enquiries were included in the census schedule and since then numerous changes have been made in the classifications.

Special attention is drawn to the following points:-

(a) The 1951 Tables deal with persons aged 14 years and over whereas in 1926 the age of 12 years was adopted as the minimum. For Table XV the 1926 figures were adjusted to the 1951 age grouping but see the footnote to that table. See also footnote to Table XVI.

(b) A revision in the classification of occupations since 1926 brings together the bulk of the unskilled workers in a single group - Order XXVI.

Occupations: The term "occupied" includes persons temporarily out of work. In 1926 there were 6,637 (4,829 males and 1,808 females) returned as temporarily out of work and in 1951 the figure was 4,851 (3,634 males and 1,217 females).

Table XV sets out the numbers and percentages of persons occupied (i.e., persons whose normal occupation was stated) in certain age groups from 14 years and upwards for the censuses 1926 and 1951.

TABLE XV

1926	66,048	* 58,512	88.6	73,383	*24,296	33.1
1951	81,752	70,966	86.8	89,712	28,550	31.8

* These are adjusted figures and may include a number (but if so, a very small number) of children aged 12 and 13 who were occupied and who were also attending an Educational Establishment.

As the figures are not available for occupied persons according to age groups it is not possible to supply for the counties the more interesting and detailed comparisons between the 1926 and 1951 enumerations. Table 20 which refers to occupied persons in age groups by marital condition is restricted to the Belfast County Borough volume but the General Report will include a table for all Northern Ireland giving these features.

The above table shows, however, that for both sexes the percentage of occupied to total number of persons aged 14 years and over is lower for 1951 than for 1926. In viewing this movement it is well to point out that whereas in 1926 males aged 65 years and over comprised 11.8 per cent of the male population aged 14 years and upwards the 1951 corresponding percentage was 12.7 and of females of 14 years and upwards the percentage aged 65 and over increased from 13.1 in 1926 to 14.1 in 1951. Furthermore it is probable that, as was the case in Belfast County Borough, the percentage of occupied persons - both male and female - of the age group 65 and over decreased considerably between the censuses.

Table XVI shows the percentages of occupied persons to the total population including children under 14 years of age.

TABLE XVI

All Ages	NUMBERS				PERCENTAGE OF TOTAL POPULATION OF ALL AGES

PERSONS	*82,831	99,516	108,812	131,633	43.2	43.1	56.8	56.9

* These figures include occupied children aged 12 and 13 years - the actual number is not available. though based on the number for the whole of Northern Ireland it is necessarily small.

It is remarkable that the variations in percentages shown in Table XVI between 1926 and 1951 are so slight - the maximum variation being 0.3 per cent (a decrease in the female occupied population). There is only 0.1 per cent decrease in the whole occupied population. The figures for occupied persons as a percentage of the total population (both sexes) of all ages in 1911 were - males 29.7; females 11.0; persons 40.7. On each figure there was an increase between 1911 and 1926 - an improvement which as stated above, was maintained during the later intercensal period in respect of males only.

In numbers there were 16,685 more persons at work in 1951 than in 1926 - 12,441 males and 4,244 females.

* Only Orders showing proportions of 5 or more per 1,000 occupied males or females are included, and the Single or Grouped Occupations have been limited to those showing proportions of 10 or more per 1,000.

In the absence of age group data by individual counties an analytical study must await the Northern Ireland figures as a whole.

Table 18 furnishes a complete list of occupations of persons 14 years of age and over and Table XVII shows the proportions per 1,000 of the occupied males and females under the numerically important orders and also for numerically important single or grouped occupations.

As already stated the changes in classification have been so numerous since 1926 that it is not possible to give a comprehensive comparison with the data of that census. Nevertheless, in some instances the orders are, broadly speaking, on similar lines and the following variations between 1926 and 1951 are significant:-

Occupation	Proportion per 1,000 of			
	Occupied Males		Occupied Females	
	1926	1951	1926	1951
Agricultural Occupations	426	261	116	44
Transport	67	83	5	10
Personal Service	-	-	248	184
Makers of Foods, Drinks and Tobacco	8	11*	2	23*

* Note - The 1951 figures do not include unskilled workers engaged in the manufacture of Foods and Drinks.

Orders II (Agriculture), VI (Metal Manufacture, Engineering, etc.) XVII (Transport), XVIII (Commerce, Finance, etc.) XXVI (Unskilled occupations - not specified elsewhere) provide employment for about 60 per cent of the occupied male population. Agriculture remains by far the most prominent of these Orders although the drop from 426 per 1,000 of occupied males in 1926 to 261 in 1951 is disconcerting notwithstanding the fact that Agricultural Machine Drivers, etc. increased from 14 at the former census to 158 at the latter. The figures in the female column of Table XVII reveal that Orders VII (Textile Workers), IX (Makers of Textile Goods and Articles of Dress), XXII (Persons engaged in Personal Service) and XXIII (Clerks, Typists, etc.) account for 66 per cent of the occupied females; Orders XVIII (Commercial, Finance, etc. Occupations) and XIX (Professional and Technical Occupations) account for a further 18 per cent. Order VII (Textile Workers) heads the list, providing employment for 213 females out of every 1,000 in occupations.

Turning to individual occupations the following variations since 1926 are outstanding:-

	Proportion per 1,000 of occupied females	
	1926	1951
Weavers (including Carpet)	80	51
Nurses (other than Nursery)	13	35
Domestic Servants (Indoor)	196	108

It is pointed out that in 1926 there were 119 male Agricultural Labourers per 1,000 occupied males and in 1951 the figure was 117 for Agricultural Workers (labourers, etc. not elsewhere specified), but in the former census farmers' sons, daughters, etc. were separately coded - of these there were 111 males and 56 females per 1,000 occupied respectively and in 1951 relatives were coded occupationally as if there were no relationship - the 1951 figure for agricultural workers included farmers relatives stated to be assisting in farm work of which no definite type was indicated.

Industries: Although the industrial classification was not subjected to such widespread changes as took place with occupations the tables for both censuses were not prepared on identical bases in that the former included persons temporarily out of work (4,829 males; 1,808 females) whereas the 1951 figures exclude persons out of

work in accordance with the practice adopted for this census throughout the United Kingdom; the data of the two census therefore are only comparable in a broad way.

Table XVIII shows the distribution for 1951 according to certain main industrial groupings.

TABLE XVIII

	TOTAL	94,665	1,000	67,332	1,000	27,333	1,000

It will be seen that the Manufacturing Industries (the term is used in a wide sense) is by far the greatest category of employment, providing work for 41 per cent of occupied persons. In 1926 the percentage was 35. The 1951 percentage for Agriculture and Fishing - the next largest group - was 20 whereas in 1926 it was 33. In actual numbers of persons there was a decrease from 27,417 in Agricultural and Fishing Industries in 1926 to 18,935 in 1951 and an increase from 28,909 in the Manufacturing Industries in 1926 to 38,774 in 1951.

The next largest group is that of Distributive Trades and Finance (including Insurance and Banking); in 1951 it accounted for 13 per cent and in 1926 it accounted for 10 per cent of occupied persons.

As in the case of Belfast County Borough Table XVIII shows that the males outnumber females in all the groups except Professional and Miscellaneous Services. The former group includes Teachers and Nurses and the latter persons employed in Private Domestic Service, Restaurants, Entertainment, etc.

A somewhat similar balance between the sexes obtained in 1926 although in the Professions the numbers of persons employed were almost equal, viz. 1,327 males and 1,370 females - in 1951 there were 2,453 males and 3,294 females.

For males the Manufacturing Industries (mainly Textiles, Building and Contracting) provided employment for 39 per cent of the occupied and Agriculture and Fishing 26 per cent., in 1926 the percentage for the former was 30 and for the latter 42.

The Manufacturing Industries (mainly Textiles and Clothing) employed 47 per cent of the occupied females being the same percentage as in 1926.

Table 21 gives the industrial distribution of the occupied population in greater detail, separate figures being given for each Order and suitable groupings thereunder.

County

- DEFINITIONS - 1. The term "Population" is defined in Part I. The figures for 1821 and 1831 exclude members of H.M. Forces.
2. The figures given are for the County as constituted at the date of each Census, exclusive of that part of Belfast within it. Belfast, which was enlarged in 1853 and 1896, became a County Borough in 1898. The County boundaries were extended by the transfer of
- (a) the portion of Lisburn Urban District formerly situated in County Down - pursuant to the Local Government (Ireland) Act, 1898.
 - (b) the portion of County Londonderry taken into Portrush Urban District - under the Local Government Board (Ireland) Provisional Order Confirmation (No. 3) Act, 1914.
3. It will be noted that since 1911 the Censuses were taken at irregular intervals.
