PREFACE

Three censuses of population have been taken since the Government of Northern Ireland was established. The first enumeration took place in 1926 and incorporated questions relating to occupation and industry, orphanhood and infirmities. The second enumeration made in 1937 was of more limited scope and was intended to bridge the gap between the census of 1926 and the census which it was proposed to take in 1941, but which had to be abandoned owing to the outbreak of war. The census taken as at midnight of 8th-9th April, 1951, forms the basis of this report and like that in 1926 questions were asked as to the occupations and industries of the population.

The length of time required to process the data collected at an enumeration before it can be presented in the ultimate reports is necessarily considerable. In order to meet immediate requirements, however, two Preliminary Reports on the 1951 census were published. The first of these gave the population figures by administrative areas and towns and villages, and by Counties and County Boroughs according to religious profession. The Second Report, which was restricted to Counties and County Boroughs, gave the population by age groups.

The present volume is the fifth of seven county volumes (the Belfast County Borough and Counties of Antrim, Down and Londonderry volumes having been published already) and has been prepared (as were also the Preliminary Reports) in accordance with the provisions of the Census Act (Northern Ireland) 1951. The statistics now published supersede those shown in the Preliminary Reports and may be accepted as final.

This volume is consistent in design and scope with the previous volumes and the remaining county volumes which will be published within the next few months will be prepared in like manner.

A General Report for the whole of Northern Ireland will follow the county volumes. This will bring together, and in some respects show in greater detail, the information contained in the county volumes. Additional features will also be introduced particularly in regard to the distribution of the people industrially by age and marital condition.

Following the 1926 census a topographical index was published dealing with each type of area for which statistics were supplied in the county series. A supplement to this index was published after the 1937 census and a further supplement in respect of the 1951 census will be prepared in due course.

Census publications are obtainable either directly from H.M. Stationery Office, Chichester House, Chichester Street, Belfast, or from any book-seller.

PART I

EXPLANATORY NOTES AND DEFINITIONS OF TERMS USED IN THIS VOLUME

AREA

The acreages given are as measured by the Ordnance Survey (foreshore being excluded), and relate to the several administrative areas as constituted at the date of the 1951 census. The acreage covered by the larger rivers and lakes is not included in the body of Tables 4 and 5 but is given in footnotes thereto.

POPULATION

The population comprises all persons on land, in vessels on inland waters or in port or at anchorage on census night, and also persons on coastwise voyages who arrived in port within a brief period not having been enumerated elsewhere. Members of the Forces of the Crown are also included.

ADMINISTRATIVE DIVISIONS

The County is divided into nine county districts (two municipal boroughs, three urban districts and four rural districts) comprising 84 district electoral divisions, nine of which are coterminous with entire municipal boroughs or urban districts or wards thereof (see table 4). Wards, where they exist in boroughs or urban districts, are the units for the purpose of municipal elections. In rural districts the unit is the district electoral division. The County is also divided into twenty county electoral divisions, which are the units for the purpose of county council elections (see table 5).

Owing to the abolition of the Boards of Guardians, details of the Poor Law Union and Dispensary districts are not given in this volume. These areas, however, form respectively, superintendent registrars' and registrars' districts for the registration of marriages, births and deaths, and consequently the census tabulations have been prepared in a manner suitable for the extraction of data according to these areas should such be required.

There are four parliamentary constituencies for elections to the Northern Ireland Parliament, and one for elections to the United Kingdom Parliament (see table 9).

The Armagh Education Area is coterminous with the County.

The changes made in the constitution or boundaries of administrative divisions of the County during the last intercensal period are as follows:-

- (a) The boundary of Armagh Urban District was extended (1st April, 1945 and 11th June, 1946).
- (b) The boundary of Keady Urban District was extended (1st April, 1948).
- (c) A portion of Armagh Rural District was transferred to Armagh Urban District (1st April, 1945 and 11th June, 1946); and a portion to Keady Urban District (1st April, 1948).
- (d) Lurgan Urban District was made a Municipal Borough (7th July, 1949), the boundary having been extended (1st April, 1938).
- (e) Portadown Urban District was made a Municipal Borough (2nd October, 1947), the boundary having been extended (1st April, 1947).
- (f) A portion of Lurgan Rural District was transferred to Lurgan Urban District (1st April, 1938); and a portion to Portadown Urban District (1st April, 1947).

HOUSES

1. The term "House" means
 - (a) each structurally separate dwelling (except institutions) having distinct access to the street, common stair, or landing.
 - (b) each institution (viz., hospital, sanatorium, nursing home, asylum, religious, welfare or charitable community, residential school, barracks or other premises under Naval, Military, Air Force, or Police discipline, prison or other place of detention), regardless of the number of buildings within its precincts.
 - (c) each boat, caravan, tent or other movable dwelling if occupied on census night but not otherwise.
2. The term "Private House" means a dwelling other than an institution, hotel, boarding house, premises occupied by a caretaker, vessel, movable dwelling, barn, stable or outhouse occupied on census night. The term includes premises comprising a shop with dwelling attached, unless occupied by a caretaker.
3. The terms "Boarding House" and "Lodging House" cover habitations described as such, and any private house containing three or more boarders or lodgers.
4. The term "Inhabited" denotes actual residence of a person or persons on census night. "Uninhabited" houses, therefore, include those temporarily vacant through the absence of the usual occupiers as well as those without tenants. Enumerators were instructed to omit from their enumeration empty houses in such an advanced state of decay that there was little likelihood that they would again be made fit for habitation.

ROOMS

1. The rooms counted are the usual living rooms including bedrooms and kitchens but excluding sculleries (i.e., compartments used only for washing, cleaning, or cooking), pantries, cloakrooms, landings, closets, bathrooms, or any warehouse, office or shop rooms.
2. For the classification of households according to rooms occupied (see table 7), shared rooms - i.e., those used in common by two or more households - have been included in the number of rooms occupied by the main household in the dwelling. In cases of one room occupations, all persons living therein, whether related or not, have been enumerated as one census household.

HOUSEHOLDS

1. "Non-private Households" comprise all persons enumerated in hotels, boarding houses, lodging houses, shops and institutions (see para. 1(b) under "Houses" definition above).
2. "Private Households" are comprised of single persons or groups of persons occupying separately the whole, or part of any private dwelling (see para. 2 under "Houses" definition above). Visitors and domestic servants are included in the household with which they were enumerated. Lodgers having or sharing separate accommodation were enumerated on separate returns and consequently are regarded as separate private households.

It should be specially noted that a household or private household for census purposes includes any group of persons, whether related or not, who live together in separate house or room accommodation.

RATEABLE VALUATION

The figures shown are those for the year ended 31st March, 1952, and have been supplied by the Commissioner of Valuation.

Subject to the provisions of the Local Government (Rating and Finance) Act (Northern Ireland), 1929, agricultural land and agricultural buildings are completely derated and industrial hereditaments and freight-transport hereditaments are partially

derated, the consequent deficiency in the yield of rates being made good by way of General Exchequer contributions.

The figures in Tables 4 and 5 are the totals of the valuations in the various areas before reduction on account of derating, but exclude in certain cases the valuations of electricity, gas and water mains, telegraphs, telephones, fisheries, water-works and tramways. The total of such excluded valuations for the county is given in a foot-note to the table.

USUAL RESIDENCE

The persons who have been regarded as having their usual residence in the area of enumeration (i.e., the County) include:-

- (1) Those enumerated in their own houses;
- (2) Persons having settled residence in private lodgings;
- (3) Resident domestic servants;
- (4) Scholars, students, etc., living during term time in residential schools, etc.;
- (5) Inmates of institutions when the nature of the institution suggested permanent residence;
- (6) Crews of vessels if usually living on shipboard.

BIRTHPLACES

The birthplaces of a small number of persons were not stated on the census return; it was assumed that these persons were born in the county or county borough of enumeration, except when they were stated to be visitors to the household, or bore foreign names. After further enquiry in the latter cases it was found possible to classify them (with one exception) under definite headings.

RELIGIONS

The classification of religions includes a separate heading for each religion, the adherents of which number 10 or more (see Table 16). The heading "Presbyterian" includes those who call themselves by this name without qualification, together with those who describe themselves as members of the Church of Scotland. Other Presbyterian denominations are shown at the foot of Table 16. Members of the Church of England and the Episcopal Church of Scotland have been included under the heading "Church of Ireland". The latter group includes all persons returned as "Church" or "Episcopalian".

OCCUPATIONS AND INDUSTRIES

There are two categories into which the population may be grouped in their working capacity, namely, occupation and industry. The sole criterion for determining the occupational classification is the type of work performed. On the other hand, industry has to do with the kind of business with which the occupation is associated. Thus a carpenter working for a firm of shipbuilders would be classified under "Carpenter" for occupation but under "Shipbuilding" for industry.

The 1951 Censuses were carried out simultaneously in all parts of the British Isles and this afforded the first opportunity for Northern Ireland to adopt both occupational and industrial classifications* on exactly the same lines as those used for the rest of the United Kingdom.

In the preparation of Tables 19 and 21 the range of Orders, Sub-Orders and Occupational and Industrial unit groups have been modified by combining closely related groups where the numbers were small and the preservation or usefulness of the data was not harmed.

TABLES CONTAINING DOTS (.) AND DASHES (-)

Throughout this volume dots (.) are used in tabular matter to indicate "None", and dashes (-) are used to indicate that figures are not available or that the column headings are not relevant to the lines in which the dashes appear.

CORRECTION OF CENSUS DATA

Every effort has been made to eliminate, as far as practicable, errors and inaccuracies from the census data. The process of correction began with the enumerators, who received full instructions as to the action to be taken in cases of error or omission, and it was continued by a system of check and further enquiry where necessary applied at each stage of the office work. The process was completed by an intensive scrutiny and inter-comparison of the tabulation sheets. This scrutiny and comparison revealed a certain number of incongruities, which, when material, were investigated and corrected in the light of the facts disclosed; trifling errors were adjusted arbitrarily.

PART II

STATISTICAL NOTES

The definitions, etc., given in the preceding section apply equally to these notes and to the tables in Part III.

AREA

Descriptions and figures are given for areas as constituted at the date of the 1951 census unless otherwise stated.

It will be seen from Table 1 (Part III) that the total area of the County exclusive of the larger rivers and lakes, is 489 square miles or 9.3 per cent of the area of Northern Ireland. In 1899 the County lost over half a square mile of Down County (see note to table 2).

POPULATION

The total enumeration for the County was 114,254. For each intercensal period between 1841 and 1937 a decrease in population was recorded but the latest interval, i.e., 1937 - 1951 brought relief by showing an increase by 5,439 persons. Table 2 shows that censuses were taken decennially between 1821 and 1911 and thereafter at irregular intervals; this should be borne in mind when comparing data of one enumeration with another. During the whole range of enumerations the highest point was reached in 1841 when the figure was 233,024 or more than twice as high as in 1951. The two periods between 1821 and 1841 showed a combined increase of 35,597 persons but in the following period (1841-1851) there was a decrease of 36,709 and although this was the greatest intercensal percentage decrease (15.8) the decreases for the periods 1881 - 1891 and 1891 - 1901 were also high, being 12.2 and 12.5 respectively.

Natural Increase: The following table sets out figures of the natural increase and actual increase or decrease of population in each of the intercensal periods since 1891, and shows the net loss by migration.

TABLE I

*Intercensal Period	Population at Beginning of Period	Births Registered	Deaths Registered	Excess of Births over Deaths	Intercensal Variation in Population	Net Movement Inwards (+) Outwards (-)

* The populations given relate to the County as constituted at the beginning of the intercensal period and the births and deaths to the County as constituted at the time of their registration. That portion of Newry Urban District situated in the County of Armagh was transferred to the County of Down in 1899.

† Including the deaths of non-civilians of the County of Armagh which occurred outside Northern Ireland.

Comparable figures of natural increase due to the excess of births over deaths, in respect of the County as now constituted, are not available for periods prior to 1891, but it is evident that in each of the intercensal periods from 1841 to 1891, as well as from 1891 to 1937, there was a net outward movement of such dimensions as not only to counterbalance the natural increase, but to cause an actual decrease in population. During the 1926 - 1937 period, however, the net outward movement dropped to 5,916 from 15,573 in the preceding intercensal period and although the latest period

1937 - 1951 shows an increase in population of 5,439 the outward movement was as high as 6,780.

Municipal Boroughs, Urban and Rural Districts: Table II shows the population by these divisions since 1901 and the variations during the period 1937 - 1951.

* The figures given relate to each area as constituted at the date of the 1951 Census.

† Estimated figure.

As the administrative divisions of the County are constituted at present, 68,733 live in rural areas and 45,521 in urban districts. The urban population constitutes 39.8 per cent of the whole as compared with 32.8 in 1937, 31.4 in 1926, 28.7 in 1911, and 24.6 in 1901 - the areas being as constituted at the date of each census. It will be seen that all divisions except Newry No.2 and Tanderagee Rural Districts show increases during the fourteen years 1937 - 1951. The most marked percentage increases are in Tanderagee Urban District (24.5 per cent or 274 persons), Portadown Municipal Borough (16.2 per cent or 2,399 persons) and Keady Urban District (16.0 per cent or 202 persons). The total increase in the urban population is 5,297 or 13.2 per cent and the overall increase in the rural population is 142 or 0.2 per cent - the areas being the same for both censuses.

Looking over the whole course of fifty years (1901 - 1951) Armagh Urban District (455 or 5.2 per cent), Lurgan Municipal Borough (4,145 or 34.4 per cent), and Portadown Municipal Borough (6,248 or 57.0 per cent) are the only urban areas to show an increase since the commencement of the period. All rural districts show substantial decreases, notably Tanderagee (1,620 or 33.6 per cent). Armagh had the lowest proportionate decrease (7,665 persons or 21.0 per cent).

Amongst the urban areas population density is highest in Lurgan (10.9 persons per acre) and lowest in Tanderagee (2.0 persons per acre). In rural districts the rates vary between 0.2 and 0.3 persons per acre. For the whole County the rate is 0.4 persons per acre.

Tables 4 and 5 provide detailed information regarding area, population, housing and accommodation for the various sub-divisions of the County and incorporate figures of rateable valuation. The rateable valuation of the County in 1951 was £607,892

before reduction on account of derating and £302,619 after reduction on account of derating. In 1937 the corresponding valuations of the County were £532,928 and £234,937 respectively.

Table 4 includes information regarding towns and villages containing 50 houses and upwards with no legally defined boundaries.

Parliamentary Constituencies: Table 9 sets out the Parliamentary Constituencies of the County for the Parliaments of both the United Kingdom and Northern Ireland together with the figures of population, number of electors and electors per 1,000 of the population, distinction being shown in respect of electors with residence qualification.

Under the provisions of the Elections and Franchise Act (Northern Ireland), 1946, a person is entitled to be registered as a parliamentary elector for any constituency returning a member to the Parliament of Northern Ireland if he or she is a British subject, 21 or more years of age, not subject to any legal incapacity, and was born in Northern Ireland (or alternatively, has resided continuously in the United Kingdom for a period of seven years ending on the qualifying date) and either:-

- (a) has the requisite residence qualification of three months; or
- (b) has occupied for three months prior to the qualifying date business premises of at least £10 valuation; or
- (c) is the wife or husband of a person entitled to be registered in respect of the above business premises qualification; or
- (d) was on the qualifying date a member of the forces or a merchant seaman and who, but for such service, would have been residing in Northern Ireland.

The electorate in the Queen's University constituency comprises all graduates of the University who are British subjects of full age, not subject to any legal incapacity.

Under the provisions of the Representation of the People Act (1949), a person is entitled to be registered as a parliamentary elector for any Northern Ireland constituency returning a member to the Parliament at Westminster if that person is a British subject or citizen of the Irish Republic of twenty-one or more years of age and not subject to any legal incapacity to vote, is resident at an address in that constituency on the qualifying date, and has resided at that address (or at any other address or addresses in Northern Ireland) for a period of three months ending on the qualifying date.

In addition, a person who would ordinarily have been resident at a specified address in a constituency in Northern Ireland, may be registered in respect of a Service qualification if -

- (i) he or she is a member of the Forces; or
- (ii) he or she is a person employed in the service of the Crown in a post outside the United Kingdom; or
- (iii) she is the wife of a person having a Service qualification and is residing outside the United Kingdom to be with her husband.

Education Areas: The Armagh County Council is the Education Authority for the whole area under its control, and all figures given in this Volume for the County apply equally to the Armagh Education Area.

HOUSING - BUILDINGS, ROOMS, HOUSEHOLDS, ETC.

Houses: The total number of houses, including hotels, institutions, etc., in the County normally used for dwelling purposes was 30,359 of which 28,370 houses were occupied on Census night. The number of occupied houses at the 1937 Census was 26,850, an increase therefore of 1,520, or 5.7 per cent under this category took place

in the intercensal period. Table III includes all houses, private and non-private. The number of non-private houses was 128 of which 38 were boarding houses or hotels. The population figures do not include inmates of institutions, but they do include other occupants such as staff.

TABLE III*

1951	112,851	30,359	28,370	1,247	742	3.98	28,593	3.95

* The figures given relate to the County as constituted at the date of each Census. That portion of Newry Urban District situated in the County of Armagh was transferred to the County of Down in 1899.

The total number of houses was the highest recorded since 1901. The number of houses being built (742) was more than seven times as great as the next highest census figure - that of 99 for the 1926 census. Similar trends were observed in respect of Counties covered by the earlier reports.

The average number of persons (exclusive of inmates of institutions) per house, steadily decreased from 1851 (when it stood at 5.53) and now stands at 3.98.

Table IV shows the changes in the numbers of houses in each County district during the intercensal period 1937 - 1951. The increase of 1,628 houses for the County should be considered with the figure for uninhabited houses, which shows a drop from 1,825 in 1937 to 1,247 in 1951; 79 per cent of the houses unoccupied on Census night in 1951 were in rural areas.

(a) The figures given relate to each County District as constituted at the date of the 1951 Census.

In each of the urban areas there was an increase between 1937 and 1951; the greatest percentage increases being in Tanderagee Urban District (22.8) and Portadown Municipal Borough (18.1). In the rural districts Lurgan had an increase of 2.6 per cent and Newry No.2 of 0.8 per cent; the remaining rurals showed decreases - Armagh (3.5 per cent) and Tanderagee (2.2 per cent).

INHABITED PRIVATE HOUSES

Number of Houses and Inhabitants: The following statement sets out the figures for inhabited private houses, persons therein and average number per house for censuses 1926, 1937 and 1951, for the County.

	1926	1937	1951
Total number of Inhabited Private Houses	25,200	26,629	28,242
Total number of Persons therein	105,750	105,125	110,997
Average number of Persons per house	4.20	3.95	3.93

The average annual increase in the number of inhabited private houses for the period 1926 - 1937 was 130 and for the period 1937 - 1951 it was 115, but this must be viewed in the light of variations in the population in these dwelling houses - there was a slight decrease of population (625 persons) in the first period, whereas in the latter there was an increase of 5,872. The relative changes are seen more clearly from the figures for "persons per house" the ratios having dropped for the period 1926 - 1937 by 0.25 and for 1937 - 1951 by 0.02. Thus the rate of improvement in the second period has been slower than in the first period.

Of the total of 28,242 inhabited private houses, 28,044 (99.3 per cent) were occupied by single private households, the remainder of 198 were shared by two or more households. This means that 98.5 per cent of the total private households (28,465) each occupies a single house.

Table V shows for the County the position at each census, 1926, 1937 and 1951 for inhabited private houses of various sizes and the extent to which they were shared by two or more households.

Total	25,200	100.0	0.6	26,629	100.0	0.3	28,242	100.0	0.7

The number of houses with three or less rooms fell between the 1926 - 1937 and 1937 - 1951 periods. The number of houses with four or five rooms has increased steeply over the whole period, while the number of houses with six or more rooms has also increased, though at a slower rate.

The percentage of shared accommodation fell between 1926 and 1937 in the larger type of house, but remained the same as regards houses of one to three rooms; between 1937 and 1951 it increased in each of the three categories.

Rooms: From Table 6 it will be observed that the total number of rooms in inhabited private houses was 121,459 (the corresponding figure for 1937 was 112,615).

The average number of rooms per house was 4.30 compared with 4.23 in 1937.

The following table gives for the County the number of private households occupying various numbers of rooms (irrespective of the number of houses) for the enumerations of 1926, 1937 and 1951:-

Information incorporated in Tables V and VI for 1951 can be readily obtained for each district from Tables 6 and 7.

PRIVATE HOUSEHOLDS

Households: The population of 110,997 occupying private houses was comprised of 28,465 households within the definitions of "Private Households" given in Part I. In 1937 there were 26,729 such households. The increase of 1,736 households (6.5 per cent) was at a somewhat greater rate than the rate of increase in population comprising them (population increase was 5,872 - 5.6 per cent). The household factor rather than that of population affects the question of housing. In the period 1926 to 1937 the percentage increase in households was 5.4, whereas the population comprising them showed a slight decrease. Households of all sizes increased in number during the period 1937 - 1951 with the exception of households of seven, nine and ten persons each.

Table 7, in which the measurement of households according to the number of persons in each household is detailed, shows that the number of households rises from 3,233 households of one person each, to 5,632 households of the two person group; from thence there is a decrease to 5,365 in the three person group from which the decline is more marked as each group is reached. The two person group comprises 19.8 per cent of all households, the three person group 18.8 per cent and the four person group 16.5 per cent - these three categories make up over 55 per cent of the total number of private households.

The comparable figures for 1937 were 19.8 for the two person, 18.5 for three person households and 16.1 for the four person group, making over 54 per cent in all.

The average size of household was 3.9 persons in 1951 and also in 1937.

DENSITIES

Table 7 gives the composition of private households, the number of persons comprising each household, the number of rooms occupied, and the density of occupation.

Private Households: There were 68 households living at densities of more than four persons per room and 294 households at more than three persons per room. 1,617 households or 5.7 per cent fall within the over two person per room category which has been assumed to indicate overcrowding.

As shown earlier in these notes the household of two occurs most frequently; and the most common combination consists of the household of two occupying four rooms. Of the 8,656 households in the 1-3 room group, 1,727 comprise only one person each. There are 265 households (509 persons) living in one roomed accommodation, but of these 144 are persons living alone - the figures in 1937 were 302 households (541 persons) living in one-roomed accommodation. The number of households of two or more persons occupying one room increased from 124 in 1926 to 132 in 1937, but fell to 121 in 1951.

The particulars of households in two and three-roomed accommodation are:-

	<u>1937</u>		<u>1951</u>	
	<u>Households</u>	<u>Persons</u>	<u>Households</u>	<u>Persons</u>
Two-room accommodation -	3,376	9,778	2,707	7,682
Three-room accommodation -	5,670	21,140	5,684	20,981

Of the 28,242 inhabited private houses 198 or 0.7 per cent were found to be occupied by two or more households - 179 of these accommodated two households and 19 accommodated three or more households.

Persons: Of the total of 110,997 persons in private houses 88.2 per cent (97,890 persons) were living not more than two persons per room: in 1937 the percentage was 86.5, so that a slight mitigation of general overcrowding is indicated.

Table 7 shows that, taking the total number of persons in private households and the total number of rooms occupied, there is an average of 0.91 persons for each room. In 1926 the corresponding figure was 1.02 and that for 1937 was 0.93, so that there has been an improvement in room accommodation during both intercensal periods, though the rate of improvement was considerably higher in the first period.

Table VIII gives the densities of room occupation for 1926, 1937 and 1951 Censuses for the County.

* Table VII, dealing with persons per household was restricted to Wards in the Belfast County Borough Volume.

It will be seen that the proportion of persons living at various densities of over two persons per room decreased between 1926 and 1937 and further decreased between 1937 and 1951, and the proportion of persons living at densities of two persons or less per room increased during both intercensal periods.

County Districts: In the county divisions the proportion of households occupying one room each is greatest in Newry No.2 Rural District where the percentage is 1.93 (123 households comprised of 239 persons), but of these 68 are persons living alone. In the remaining areas the proportions are all under one per cent.

Table IX shows, by districts, the population in private households living at two persons and less per room and at over two persons per room, also persons per 1,000 living at these densities, and for comparison, the 1926 and 1937 figures for persons per 1,000 living at a density of over two persons per room are included.

It will be noted that in the County as a whole 118 persons per 1,000 live at a density of over two persons per room (in 1937 the figure was 135 and in 1926 it was 173 persons per 1,000 of the population). Increases in the number of persons living at this density occurred in Keady Urban District and Lurgan Municipal Borough in the 1937 - 1951 period. Excluding Armagh Rural District, where no change is recorded, decreases - some substantial - took place in all other districts. Between 1926 and 1937 all areas recorded a decrease. The greatest overcrowding is in the rural districts of Newry No.2 and Lurgan and in Keady Urban District in which the persons per 1,000 are 169, 143 and 152 respectively. The smallest proportions of overcrowding are in Tanderagee Urban District (51 persons per 1,000) and Tanderagee Rural District (57 persons per 1,000).

INSTITUTIONS, ETC.

The population according to County Districts in each of the types of inhabited buildings, etc., other than private houses, is given in Table 8 together with the numbers of inmates in institutions.

Table X gives for the County these particulars with the corresponding figures for 1937.

* The 1937 figures relate to Poor Law Institutions.

In the 1937 Report attention was drawn to the drop in the number of hotels and boarding houses, and their occupants since the 1926 Census. Since 1937 there has been a drop in every area and the total now stands at 38, as compared with 125 in 1937. The drop in Armagh Urban District was from 33 to 14. This area contains the highest number of this class of building and accounts for 37 per cent of the total.

Between 1937 and 1951 the number of inmates in institutions increased by 36, and the total population (i.e., inmates and staff) of these institutions by 95.

USUAL RESIDENCE

Table 10 discloses that 98.4 per cent of the enumerated population of the County were normally resident in the County and of the remainder, 1,180 were usually resident in some other part of Northern Ireland. Allowing for 1,128 persons usually resident in the County but enumerated elsewhere in Northern Ireland the adjustment to obtain the usual residence figure represented 0.5 per 1,000 of the population. In 1937, when the "Usual Residence" question was first included in the Census Return, the adjustment figure was 0.6 per 1,000 of the total enumeration.

Only 626 persons were usually resident outside the Province.

SEX, AGE AND MARITAL CONDITION

Table 11 shows the population of the County according to sex, age (individual years and quinquennial groups) and marital condition. Table XI although restricted to certain age groups, provides a convenient basis for comparison of the 1937 position with that of 1951.

Sex Proportions: Since 1821, when the first Census affecting Northern Ireland was taken, the number of females in the County has exceeded the number of males. The greatest disparity was reached in 1881 when there were 1,101 females for every 1,000 males. Each census from 1911 to 1937 (inclusive) has shown a lessening in the preponderance of females; in the latter year the figure stood at 1,005 per 1,000 males - the lowest on record - and in 1951 there was an increase to 1,025 females per 1,000 males. Up to and including 19 years of age, boys were in the majority, in 1951, except at the ages of 1, 5, 11 and 18, at which girls were numerically superior and at age of 3 where the figures were identical. Under the age of one year for the County there were 92 girls for every 100 boys, but the figures were almost identical at age of 4, when the boys numbered 1,181 and the girls 1,179. At the age of 5 there were 103 girls to 100 boys but at each year between 6 and 17, inclusive, other than age of 11, there were less than 100 girls for every 100 boys; the figures almost corresponded at age 14 when the boys numbered 1,003 and the girls 1,002.

For the age group 25-34 there were 103 women for every 100 men and this increased to 111 to 100 men in the 55-64 group. At age 82 there were 125 women for 100 men.

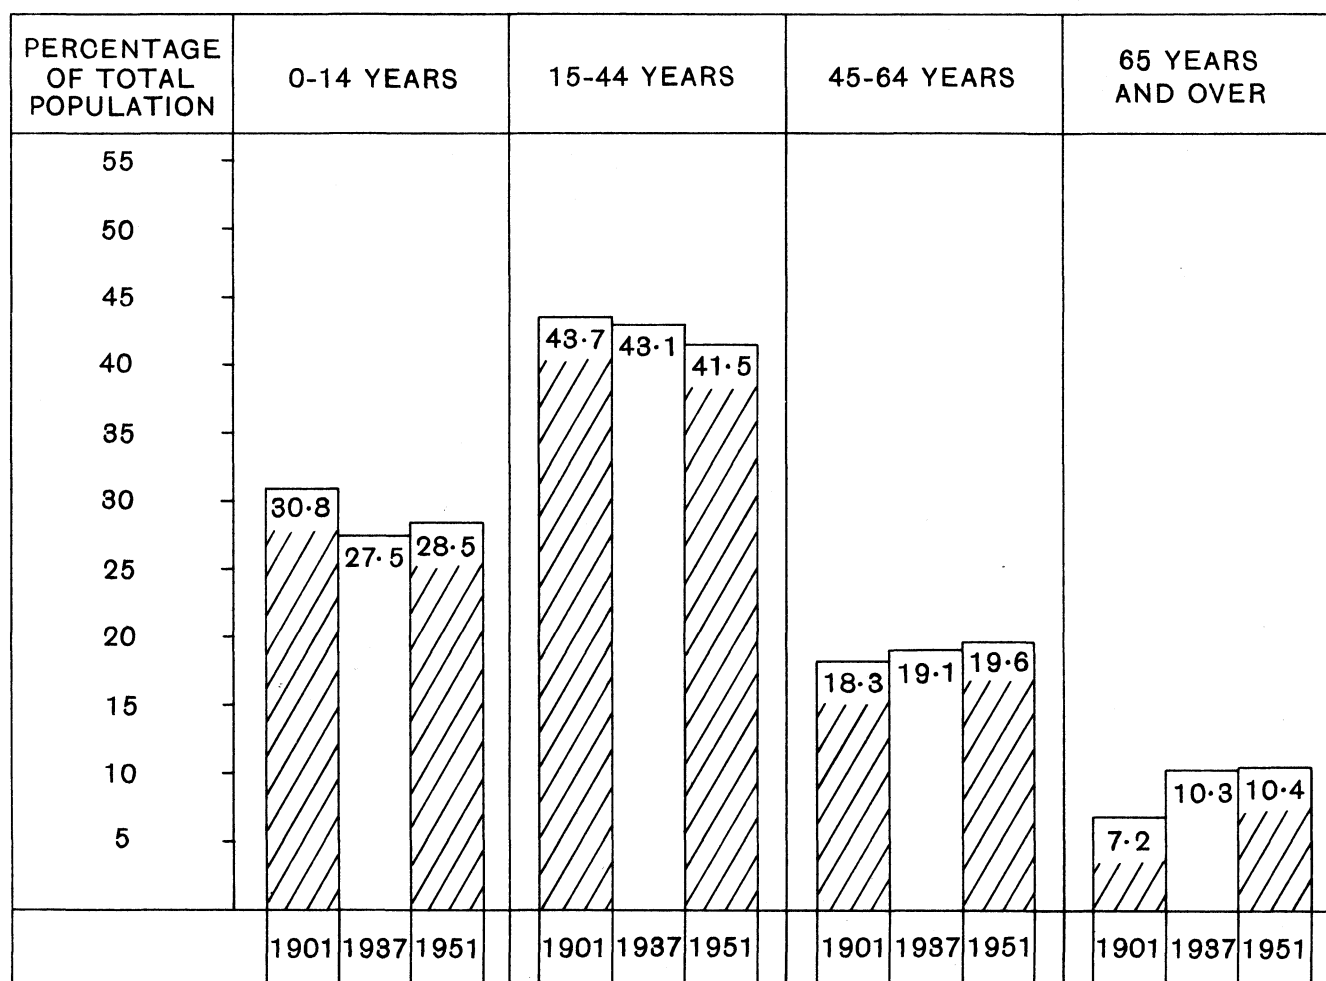

It will be noted from Table 12 that in all the urban areas there is a preponderance of females over males and in all the rural districts, except Lurgan, males outnumber females.

Ages: The average age of the population of the County decreased between 1937 and 1951. At the 1911 Census the average was 30.7 years; it rose to 31.0 in 1926 and to 33.4 in 1937, falling to 32.5 in 1951.

In 1937 the 10-14 age group accounted for the largest number of the population of all quinquennial age groups containing 9.6 per cent of the enumerated population, as compared with 8.7 in 1951. In 1951 the age group from birth to four years exceeded all others with 10.3 per cent of the population as compared with 9.0 in 1937. Since 1937 decreases are shown in the five age groups between 10 and 34 and also in the 60-64, 65-69 and 95 and over groups. Increases were recorded for males in the quinquennial age groups comprising 0-9 years, 30-54, 70 to 94 and 100 years and over and for females in the age groups comprising 0-9 years, 25-29, 35-64 and 70-99 years.

The following chart shows the distribution of the population for the County in the four main age groups for 1901, 1937 and 1951.

CENSUSES (COUNTY ARMAGH) 1901, 1937, 1951.

It will be seen that in the two groups comprising persons aged 45 years and upwards there has been a steady increase since 1901 - as was seen also in the Belfast County Borough and Counties Antrim, Down and Londonderry Reports. The increase, however, in the 65 years and over group was only by 0.1 per cent between 1937 and 1951 and in the 45-64 group by 0.5 per cent whereas the increase in the 0-14 years group was 1.0 per cent in the same period and the drop in the 15-44 years group was 1.6 per cent.

Marital Condition: since 1937 the number of persons in the County aged 14 and over increased by 2,687 of whom 699 were males and 1,988 females. The number of single persons in this age group decreased by 2,920 (1,700 males and 1,220 females), while the number of married persons increased by 5,921 (2,752 males and 3,169 females).

Single males aged 14 and over accounted for 46.5 per cent of the male population of the same age in 1951 (51.5 per cent in 1937) and married men for 48.5 per cent (42.5 in 1937). In the same age group, single females represented 40.4 per cent (45.3 in 1937) and married women 48.4 per cent (43.0 in 1937).

For both sexes the only quinquennial groups of married persons to show a decrease during the 1937 - 1951 intercensal period were males 15-19, 60-69 and aged 95-99 and females 65-69.

Widowers decreased by 361 whilst widows increased by 3. The number of persons whose marriages had been dissolved and who had not remarried, increased from 9 in 1937 to 53 in 1951 - divorced men numbered 15 as compared with 7 in 1937, and divorced women 38 as against 2.

EDUCATION

Table 13 summarises the information furnished regarding attendance at educational establishments. It will be seen that for the County of children aged 5-13 inclusive 4.3 per cent are stated not to be attending school. In the 14-17 age groups, i.e., amongst persons over the age for compulsory school attendance but of normal age for attending grammar school, 69.8 per cent were not attending educational establishments.

Persons of all ages attending educational establishments part-time were shown to number 150. As the total number of part-time students enrolled in the institutions of further education under the management of the County Armagh Education Authority during the year ended 31st July, 1951, numbered 4,900, it is apparent that in many cases the information regarding part-time education was not furnished on the census returns. Much the same result was disclosed by the earlier census reports. It would appear that the significance of the question was not appreciated by the heads of households.

BIRTHPLACES

Table 14 shows, by sex, the number of persons born in each of the counties of Northern Ireland, other parts of the British Isles, Commonwealth Countries, etc., Foreign Countries and at sea. Of the total population of the County (i.e., 114,254) persons born in the County numbered 90,477 (79.2 per cent), and altogether 104,923 (91.8 per cent) were born in some part of Northern Ireland. 5,165 persons (4.52 per cent) were born in the Irish Republic as compared with 4,739 (4.35 per cent) in 1937. Only 639 persons (0.56 per cent) were born outside the British Isles, of whom 250 were born in Commonwealth Countries, 387 in Foreign Countries, 1 at sea and in one instance the birthplace was not given.

The percentage representing persons born in the County (79.2) has decreased since 1937 (81.5); the percentage of persons born in adjoining Counties of Down and Tyrone increased from 6.9 to 7.5.

Table XII gives comparative figures for Censuses since 1861.

It will be noted that the percentage of the total population born in Northern Ireland decreased steadily between 1861 and 1926, viz., from 96.02 to 92.13. Between 1926 and 1937 there was an increase to 92.56 but this fell to 91.84 in 1951. Over the period 1901 to 1926 the percentage born in the Irish Republic steadily increased (3.93 to 4.83); between 1926 and 1937 there was a decrease to 4.35. In the last intercensal period there was an increase to 4.52. The percentage born in England and Wales stands at 1.90 the highest figure reached during the ninety years 1861 - 1951; that born in Scotland increased for each intercensal period during the span 1861 - 1926 but thereafter a decrease is recorded at each Census.

Table 15 shows the numbers of persons in each administrative area born outside Northern Ireland, according to sex, duration of residence, whether residents in, or visitors to Northern Ireland and divided into five religious groups.

* The figures given relate to the County as constituted at the date of each Census. For particulars of territorial changes see note at head of Table 2.

† Including Church of England and Episcopal Church of Scotland, numbering 832 and 3 respectively in 1951.

A scrutiny of Table XIV reveals that the percentage of Roman Catholics has increased in each intercensal period since 1901 and that the 1951 figure of 46.4 per cent was only exceeded in 1861 and 1871. Presbyterians now 15.0, stood at 16.2 of the total population in 1861 and at each succeeding Census showed slight variations from this figure, until reaching its lowest percentage, i.e., 14.9 in 1937. The Church of Ireland decreased 1.9 per cent between 1937 and 1951 (from 31.7 to 29.8) and at the latter year stood at its lowest point. Methodists increased by 0.2 per cent of the total population between 1937 and 1951: the percentage has risen steadily since 1871 and the figure for 1951 (4.9) is the highest recorded. "Other and Not Stated Denominations" have increased at each enumeration and show a percentage of 3.9 which is an increase of 0.7 on the 1937 figure. A comparison of the 1951 figures with those for 1937 shows that there were numerical increases in four groups, viz., Roman Catholics 3,538, Presbyterians 945, Methodists 491, others 894, while the Church of Ireland group decreased by 429. The total of 34,082 for the Church of Ireland is the lowest recorded.

Table 16 shows the population by sex for each County District under the five religious groups, viz., Roman Catholic, Presbyterian, Church of Ireland (including the Church of England and the Episcopal Church of Scotland), Methodist and all other (or not stated) denominations. The list of descriptions of "Other Denominations" given at the foot of the table refers to the County as a whole; the names of denominations are restricted to those having not less than ten adherents.

Of the "Other Denominations" the two categories which show the highest increases as compared with 1937 are: Baptist + 299 and Brethren + 262. The number of persons who omitted to state their denomination has increased from 81 to 324.

Table 17 gives details for the County under five religious categories and age groups (individual years to age 21, and quinquennial age groups up to 69 years). The comparative Table in the 1937 Report gave the population by individual ages up to 20, and by two religious groups - Roman Catholic and other denominations. It is not therefore possible to make a complete comparison between the 1937 figures and those published in this Report, but it is observed that the overall increase in the population of Roman Catholics up to the age of 20 is 2,303 or 11.7 per cent, while the increase in the population of all other denominations up to that age is 198 or 0.9 per cent. The following are the percentage increases or decreases in the various age groups up to 19 years and of the population aged 20 and over between 1937 and 1951:-

<u>Age Group</u>	<u>Roman Catholics</u>	<u>Other Denominations</u>
0 - 4	+ 28.3	+ 13.1
5 - 9	+ 16.3	+ 7.8
10 - 14	+ 0.5	- 9.8
15 - 19	+ 1.7	- 7.5
20 and over	+ 4.3	+ 4.6
All Ages	+ 7.2	+ 3.2

A comparison of Tables 15 and 16 shows that in the County 9.0 per cent of Roman Catholics, 7.1 per cent of Presbyterians, 7.7 per cent of members of the Church of Ireland, 5.8 per cent of Methodists, and 9.5 per cent of other and not stated denominations were born outside Northern Ireland.

OCCUPATIONS AND INDUSTRIES

As will be seen from the volumes "Classification of Occupations" and "Classification of Industries" referred to in Part I of this Report the separate terms under which workers are classified run into many thousands. This has occasioned modifications to bring census data within manageable dimensions, and thus generally speaking the arrangement of headings is according to class of materials worked with, commodities produced or services rendered.

Special attention is drawn to the following changes since the 1926 Census which is the last occasion on which occupational and industrial enquiries were included in the Northern Ireland Census Schedule:-

- (1) The 1951 Tables deal with persons aged 14 years and over, whereas in 1926 the age of 12 was adopted as the minimum. For Table XV the 1926 figures were adjusted to the 1951 age grouping to allow proper comparison but see footnote to that table. See footnote to Table XVI also.
- (2) A revision in the Classification of Occupations since 1926 brings together the bulk of the unskilled workers in a single group - Order XXVI.

Occupations: Table XV sets out the numbers and percentages of persons occupied (i.e., persons whose normal occupation was stated) in the age group from 14 years and upwards, for the Censuses 1926 and 1951.

The term "occupied" includes persons temporarily out of work. The number returned as temporarily out of work in 1926 for the County was 4,516 (3,120 males and 1,396 females). In 1951, the figure amounted to 3,843 (2,913 males and 930 females).

TABLE XV

PERSONS AGED 14 YEARS AND OVER

Year of Census	MALES			FEMALES		
	Total	Occupied	Percentage of Occupied to Total	Total	Occupied	Percentage of Occupied to Total
1926	38,622	* 34,570	89.5	41,786	* 16,247	38.9
1951	40,800	35,101	86.0	42,866	15,007	35.0

* These are adjusted figures and may include a number (but if so, a very small number) of children aged 12 and 13 who are occupied and who were also attending an Educational Establishment.

The above table shows that for both sexes the percentage of occupied to total number of persons aged 14 years and over is lower for 1951 than for 1926. In 1926, however, males ages 65 years and over comprised 13.2 per cent of the male population aged 14 years and upwards, whereas in 1951 the percentage was 14.0 and of females ages 14 years and upwards the percentage aged 65 and over increased from 14.0 in 1926 to 14.5 in 1951. It is probable also that the percentage of occupied persons - both male and female - of the age group 65 and over decreased considerably between the Censuses.

Though the proportion of occupied males has decreased since 1926, the actual number occupied has increased from 34,570 in 1926 to 35,101 in 1951 - an increase of

531 persons. A decrease of 1,240 is shown in the number of occupied females, making an overall decrease of 709 in the number of occupied persons.

In 1926 there were 47 occupied females to every 100 occupied males, while in 1951 there were 43 occupied females to every 100 occupied males.

Table XVI shows the percentage of occupied to the total population, including children under 14 years of age.

TABLE XVI

FEMALES	* 16,252	15,007	40,209	42,821	14.8	13.1	36.5	37.5
PERSONS	* 50,830	50,108	59,240	64,146	46.2	43.8	53.8	56.2

* These figures include occupied children aged 12 and 13 years - the actual number is not available though based on the number for the whole of Northern Ireland it is necessarily small.

From Table XVI it will be seen that the occupied represented 46.2 per cent of the population of both sexes and all ages in 1926 and in 1951 the percentage was 43.8. In County Antrim the decrease was only by 0.1 per cent but in Belfast County Borough it was 1.1 per cent, in County Down 1.6 and in County Londonderry 1.4 per cent. The figures for occupied persons as a percentage of the total population (both sexes) of all ages in 1911 were - males 31.1; females 13.2; persons 44.3. The increases recorded for both males and females between 1911 and 1926 were not maintained in the later intercensal period and, in fact, lower percentages were employed in 1951 than in 1911 as well as in 1926. For males the percentage increase was 0.3 between 1911 and 1926 but for the subsequent period a decrease of 0.7 per cent was recorded and for females there was an increase of 1.6 per cent in the former period but a drop of 1.7 in the latter.

Table 18 gives the full list of occupations of persons of 14 years of age and over and Table XVII shows the proportions per 1,000 of the occupied males and females under the numerically important Orders and also for numerically important single or grouped occupations.

35.4 per cent of the occupied males are engaged in Agricultural Occupations; 8.2 per cent in Commercial, Finance and Insurance Occupations (excluding Clerical); 7.9 per cent are engaged as workers in Building and Contracting, etc., and 6.8 per cent in Transport and Communications. 24.4 per cent of occupied females are employed as Textile workers; 15.5 per cent on the manufacture of Textile Goods and Articles of Dress; 14.8 per cent are in Personal Service; and 10.1 per cent are Clerks, Typists, etc. The changes since 1926 in the Classification of Occupations and especially the introduction of Order XXVI bringing together groups of unskilled workers not provided for elsewhere (formerly included in various Orders) make it impracticable to give a general comparison between 1926 and 1951 figures. It is, however, possible to give comparative figures in some instances. The following are those which show the greatest variation in numbers and which are broadly similar to the 1926 classification:-

Industries: The industrial classification has not undergone widespread changes since 1926 as was the case in the classification of occupations. The 1926 and 1951 figures, however, are not strictly comparable as the 1926 figures for the occupied population include persons out of work (i.e., 3,120 males and 1,396 females), whereas the 1951 figures exclude persons out of work in accordance with the practice throughout the United Kingdom for this Census.

Table XVIII shows the distribution for 1951 according to certain main industrial groupings for the County.

The Manufacturing Industries (used in a wide sense) provide employment for 42 per cent of the occupied population. In 1926 the percentage was 35. Agriculture and Fishing provide 27 per cent and the Distributive Trades and Finance (including Insurance and Banking) 12 per cent; in 1926 the percentages were 39 and 9 respectively.

Table XVIII also shows that the males outnumbered the females in all groups except the Professions and Miscellaneous Services. The former group includes Teachers and Nurses and the latter, persons employed in Private Domestic Service, Restaurants, Entertainment, etc. The same balance was recorded in respect of earlier Reports for 1951.

For males Agriculture and Fishing provided employment for 37 per cent of the occupied, and the Manufacturing Industries (mainly Textiles, Building and Contracting and Manufacture of Foods) 35 per cent; in 1926 the percentage for the former was 49 and 26 for the latter.

The Manufacturing Industries (mainly Textiles and Clothing) gave employment to 56 per cent of the occupied females; in 1926 the percentage was 55.

Table 21 gives the industrial distribution of the occupied population in greater detail, separate figures being given for each Order and suitable groupings thereunder.

TABLE 2. - Population, 1821 - 1951

County

DEFINITIONS - 1. The term "Population" is defined in Part I. The figures for 1821 and 1831 exclude members of H.M. Forces.

2. The figures given are for the County as constituted at the date of each Census. The boundaries of the County were altered by the transfer to the County of Down of that portion of Newry Urban District formerly situated in the County of Armagh, pursuant to the Local Government (Ireland) Act, 1898.

3. It will be noted that since 1911 the Censuses were taken at irregular intervals.
