TO THE RIGHT HONOURABLE

HERBERT V. KIRK, B.COM.SC., F.C.A.,
J.P., M.P.,

Minister of Finance for Northern Ireland

Sir,

I have the honour to submit the Forty-seventh Annual Report on the Births, Still-births, Deaths, and Marriages registered in Northern Ireland, together with Abstracts of the particulars of such registrations. The Report relates to the year ended 31st December 1968. The Abstracts have been prepared for presentation to Parliament, pursuant to the provisions of statutes governing the registration system. The Report draws attention to the salient features of the vital statistics contained in the Abstracts, and information is given relating to notification of infectious diseases, congenital abnormalities, migration and the weather.

I have the honour to be, Sir,

Your obedient Servant,

J. Y. MALLEY,

Registrar General of Births, Deaths, and
Marriages for Northern Ireland

6 Infant mortality rates per 1,000 live births	32

GENERAL NOTES

The figures contained in this Report may be regarded as superseding the provisional figures already published for the year 1968 in the Registrar General's weekly and quarterly returns.

The value of the statistical information concerning deaths contained in the Registrar General's Annual Reports and other publications is to a large extent dependent on the degree of care and accuracy with which the members of the medical profession enter the required particulars on the form of medical certificate of the cause of death.

Throughout the Report, births and deaths have been recorded according to date of registration and not to date of occurrence. They have also been allocated to the district of normal residence, if in Northern Ireland, births having been assigned to the districts containing the normal residence of the parents, and deaths to the districts containing the normal residence of the deceased persons. Events occurring in Northern Ireland relating to persons whose normal residence is outside Northern Ireland have been assigned to the district of occurrence.

Rates are assessed per 1,000 of the estimated home population as at the 30th June unless otherwise stated. Marriage rates relate to the number of marriages solemnised, not to the number of persons married.

Comparisons with rates (births, deaths, etc.) recorded in other parts of the British Isles are included in several tables and diagrams. These comparisons are substantially correct but it should be remembered that (with the exception of Diagram 3) they are crude rates only and take no account of changes in or differences between the age and sex structure of the populations.

Generally speaking, the classifications adopted for the purposes of this Report are the Detailed and Abbreviated Lists contained in the "Manual of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1965."

The term cancer, where used, refers to all malignant neoplasms and neoplasms of the lymphatic and haematopoietic tissues, except Hodgkin's disease, leukaemia and aleukaemia (I.S.C. Nos. 201, 204-207).

Where more than one cause of death is reported, the death is classified according to the underlying cause, i.e. the disease or injury which initiated the train of morbid events leading directly to death. This method of classification is followed even if the deceased may have recovered from the underlying cause long before the date of death.

In the text and tables the term "neonatal mortality" relates to deaths of children under 4 weeks of age and the term "infant mortality" to deaths of all children (including neonatal) under 1 year of age. Perinatal deaths are deaths of infants under one week plus still-births.

In general in the tables and abstracts, dots (·) are used to indicate "none", and dashes (—) are used to indicate that information cannot be given or that the headings are not applicable.

REPORT 1968

SUMMARY

The rates for marriage and deaths were higher and the rates for live and still-births lower than in 1967.

The following figures indicate the general trend of marriages, births and deaths over the past thirty years. More detailed comparisons will be found in Tables A and A1.

		1938	1958	1967	1968

POPULATION

The population of Northern Ireland estimated as at 30th June, 1968 was 1,502,000 persons, an increase of 11,000 over the mid 1967 figure. This estimate, comprising civilians and members of H.M. Forces stationed in Northern Ireland, is based on the census taken on 9th October, 1966 (1,484,775 persons) revised to allow for natural increase and net migration. During the year ended 30th June, 1968, the natural increase of 17,300 (approx.) was off-set by net migration of 7,000 (approx.) Further details regarding migration are shown on page 41.

TABLE C. *Populations of counties, county boroughs and urban and rural areas as recorded at the censuses of 1901, 1926, 1951 and 1966, and as estimated at mid-year 1968.*

TOTALS	1,502,000	100.0	732,600	100.0	769,400	100.0

The 1966 Census population by age and sex for Northern Ireland and for counties and county boroughs is given in Abstract 1.

MARRIAGES

Number and rate Marriages registered during the year numbered 11,240 giving a rate of 7.48 per 1,000 population. The corresponding number and rate for 1967 were 10,924 and 7.33 respectively. In 10,688 (95.1 per cent.) of the total marriages both contracting parties were single; in 384 (3.4 per cent.) one or both were widowed and in 204 (1.8 per cent.) one or both were divorced. Of every 1,000 persons married, 10 were previously divorced. This rate is one above that for 1967; comparative rates for the years 1958 and 1948 were 7 and 10 respectively. Further details are given in Abstracts 3 and 6.

The number of marriages celebrated in each month in 1968 was as follows:

January . 482	April . 819	July . 1,157	October . 1,015
February . 745	May . 405	August . 1,330	November 564
March . 1,428	June . 1,004	September 1,599	December 692
Qtrs.: 1st . 2,655	2nd . 2,228	3rd . 4,086	4th . 2,271

This shows that the period July to September was the most popular quarter for weddings, September heading the monthly totals with 1,599. As usual, May was the least popular month.

Ages at marriage Although the most popular age for marriage was 23 years for men and 21 years for women, the arithmetical average age of men marrying in 1968 was 26.2 and of women 23.8. During 1967 this age was 26.5 among men and 23.9 among women. In 1958, the average age was 28.7 for men and 25.6 for women. The mean age at marriage of persons marrying for the first time in 1968 was 25.3 years for men and 23.2 years for women. Of the contracting parties 12.6 per cent. of the husbands and 30.6 per cent. of the wives were minors, the relative figures for 1958 being 8.0 per cent. and 23.7 per cent. Further statistics will be found in Abstracts 4, 5, 6 and 7.

Method of celebration Table D shows the marriages registered during the years 1927, 1937, 1951 and 1961 to 1968 according to the form of celebration and Table D1 gives further details of marriages in 1968.

Marriages taking place in registrars' offices in the year under review represented 4.6 per cent. of the total marriages as compared with 4.3 in the previous year.

TABLE D. Northern Ireland: Marriages registered according to form of celebration, 1927, 1937, 1951, 1961-1968.

YEAR	Roman Catholic	Presbyterian	Church of Ireland	Methodist	Other denominations	In Registrars' Offices	Total marriages registered	Total marriage rate per 1,000 of estimated population

LIVE BIRTHS

Number and rate Live births registered during 1968 numbered 33,173, 242 fewer than in 1967. The birth rate was 22.1 per 1,000 of the estimated population, being 0.3 below the rate for 1967. For the thirteenth year in succession it was higher than in any other country of the British Isles.

The monthly incidence of births was as follows:

January	. 3,155	April	. 2,833	July	. 2,971	October	. 2,900
February	. 2,570	May	. 2,965	August	. 2,867	November	. 2,494
March	. 2,837	June	. 2,650	September	. 2,615	December	. 2,316
Qtrs.: 1st	. 8,562	2nd	. 8,448	3rd	. 8,453	4th	. 7,710

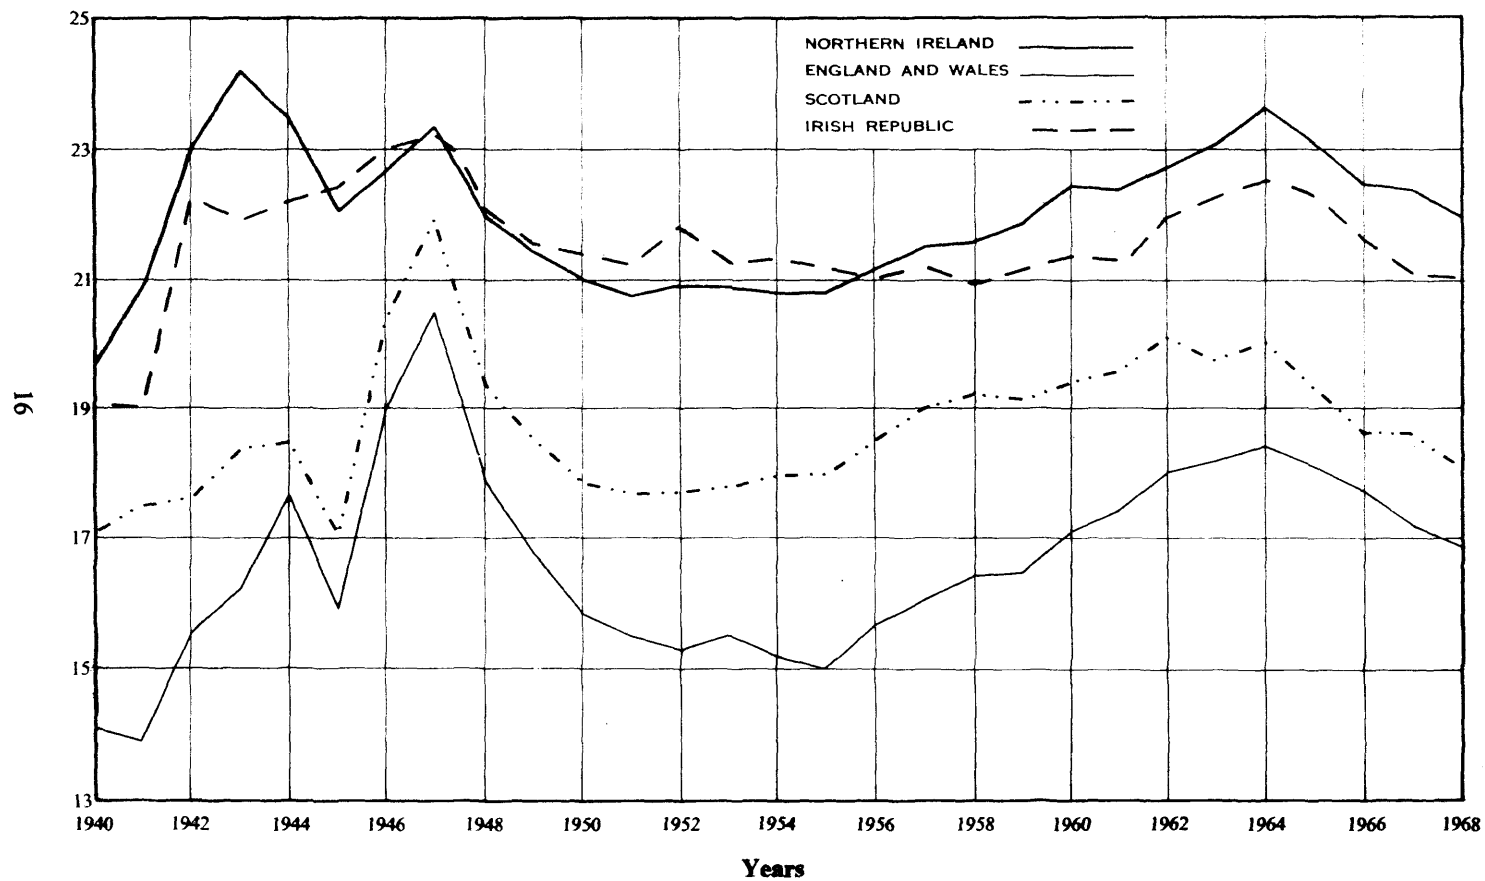

Compared with 1967, the first and third quarters showed increases of 278 and 16 respectively whilst the second and fourth quarters showed decreases of 528 and 8 respectively.

TABLE E. Northern Ireland: Live births, numbers and rates by area, 1965-1968.

AREA	Number				Rate per 1,000 of the population			
	1965	1966	1967	1968	1965	1966	1967	1968

*Excluding County Borough.

DIAGRAM 2. Birth rates (crude) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1940-68.
Rate per 1,000 population.

Births registered during 1968, where the normal residence of the parents was outside Northern Ireland, numbered 310 as compared with 285 in 1967. In 165 cases an address in the Irish Republic was given, and of these, 96 births occurred in hospitals: the 1967 figures were 113 and 56 respectively. In 11 cases the parents were itinerants having no fixed abode and all of these births took place in hospitals.

Proportion of males to females Births of males in Northern Ireland in 1968 numbered 17,151 and those of females 16,022, the proportion of male to female births being 1,070 to 1,000. The corresponding proportions for each of the five years 1963-67 were 1,077, 1,053, 1,094, 1,090 and 1,057 respectively.

Illegitimate births The number of illegitimate births was 1,245. This was 40 more than in 1967. The proportion to total live births (3.75 per cent.) was 0.14 above that for the previous year. In England and Wales, Scotland and the Irish Republic, the illegitimate births as percentages of the total live births in the year 1968 were (provisionally) 8.5, 7.4 and 2.6 respectively.

TABLE E1. Northern Ireland: Illegitimate live births by area, 1965-68.

AREA	Number of illegitimate births				Illegitimate births as percentage of total live births			
	1965	1966	1967	1968	1965	1966	1967	1968

*Excluding County Borough

Multiple births Up to and including 1960, the birth of one live and one still-born infant was regarded as a single birth and the birth of two live infants and one still-born infant as a twin birth. Since 1961 still-births have been registered and these are now being taken into account to obtain accurate figures for single and multiple births. Of the 33,173 live births, 32,472 were the product of single pregnancies, 686 of twin pregnancies and 15 of triple pregnancies. Table E2 gives the multiplicity of all births.

TABLE E2. Northern Ireland: Multiple births, 1968.

Pregnancy	Product	Con- finements	Live births	Still-births
Single	1 live born	32,472	32,472	—
„	1 still-born	525	—	525

TOTALS		33,353	33,173	541

STILL-BIRTHS

Number and rate The number of still-births registered in 1968 was 541 giving a rate of 16 per 1,000 births (live and still). The relative numbers and rates for the period 1965-1968 are shown in Table F. Comparative 1968 figures in England and Wales and Scotland were 11,848 and 14 and 1,425 and 15 respectively. Still-birth registration is not in operation in the Irish Republic.

TABLE F. *Northern Ireland: Still-births and rates per 1,000 births (live and still) by area 1965-1968.*

Abstract 11 shows the numbers of still-births in administrative areas by sex. The number of still-born children who would have been illegitimate had they been born alive was 32 representing 5.9 per cent. of all still-births. Sixteen of the still-births were the product of multiple confinements further particulars of which will be found in Table E2 on page 17. In 371 cases the births occurred after a period of less than 37 weeks gestation or the weight of the foetus was not more than 5½ lbs. Of the 541 still-births 472 were certified by doctors, 68 by mid-wives and 1 by a coroner. Post-mortem examinations were held in 155 cases. Abstract 10 shows still-births by cause, sex and period of gestation. The percentage of still-births which occurred in hospitals in 1968 was 95.6 compared with 92.8 per cent. in 1967.

TABLE F1. *Northern Ireland: Still-births in hospitals etc., and parity* of mother 1968.*

PLACE OF CONFINEMENT	TOTAL STILL-BIRTHS	PARITY OF MOTHER											Not stated
		0	1	2	3	4	5	6	7	8	9	10 and over	
In hospital	517	151	85	76	49	39	35	24	18	15	7	11	7
In own homes, nursing homes and all other places	24	8	4	1	1	3	1	3	1	.	.	.	2
TOTAL	541	159	89	77	50	42	36	27	19	15	7	11	9

*Parity has been taken to mean the number of children born (live and still) to the mother as the result of previous pregnancies.

Congenital malformations caused 150 still-births (i.e. 27.7 per cent. of the total). This group was also the main cause in 1967 when the corresponding figures were 153 and 25.8 respectively.

TABLE F2. Northern Ireland: Still-births by age and parity* of mother 1968.

DEATHS

Number and rate The number of deaths recorded during the year 1968 and the death rate per 1,000 of the population were 15,933 and 10.6 respectively. The comparable figures for 1967 were 14,671 and 9.8.

The monthly incidence of deaths was as follows:

January . 1,752	April . 1,374	July . . 1,216	October . 1,209
February . 1,490	May . 1,379	August . 1,165	November 1,192
March . 1,560	June . 1,101	September 1,092	December 1,403
Qtrs.: 1st . 4,802	2nd . 3,854	3rd . . 3,473	4th . . 3,804

Of the total deaths 8,235 were of males and 7,698 were of females, the equivalent annual death rates being 11.2 and 10.0 per 1,000 of the male and female estimated populations, respectively. The corresponding rates for 1967 were 10.6 and 9.1.

According to the ages stated to registrars, 885 (5.0 per cent.) of the total deaths were of children under 5 years of age and 10,897 (68.4 per cent.) were of persons aged 65 and upwards. There were 125 deaths of persons (39 males and 86 females) aged 95 and upwards and of this number there were two males at 100 years, one at 101 and three females at 100 years, one at 102 and one at 104.

Table G gives a partial analysis of deaths by age for each sex and the percentage of the total deaths in each group.

TABLE G. Northern Ireland: Deaths by sex and certain age-groups and as percentage of total deaths, 1968.

		Total	Under 1 year	1-14 years	15-44 years	45-64 years	65 years and over

DIAGRAM 3. Death rates (standardised) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1940-68
Rate per 1,000 population.

Area mortality comparisons Indices of mortality by sex and principal cause on an age-standardised basis are presented for the first time with the addition of Standardised Mortality Ratios (S.M.R.) to Abstract 17 of this year's Report. The S.M.R. shows the number of deaths registered in each area as a percentage of those which would have been expected in that area had the age-specific death rates of the total Northern Ireland population operated in the corresponding population age-groups of that area.

Deaths in hospitals The number of deaths occurring in hospitals in each of the years 1958-1968 is shown in Table J. Of the deaths registered in 1968, 54.9 per cent. took place in hospitals (3.7 per cent. in mental hospitals). It will be seen from Table J that the proportion of deaths occurring in hospitals has been increasing steadily through the years, with the exception of the years 1963 and 1966. The proportion of deaths occurring in institutions in 1938 amounted to 29.6 per cent. of the total deaths.

TABLE J. *Northern Ireland: Deaths in hospitals, 1959-1968.*

	1959	1960	1961	1962	1963	1964	1965	1966	1967	1968

Mental hospitals	628	673	721	684	610	442	638	542	515	584
Other hospitals	6,562	6,776	7,261	7,034	7,100	7,603	7,723	8,135	7,530	8,165
Elsewhere	8,213	7,847	8,126	7,508	8,189	7,309	7,190	7,764	6,626	7,184
Total deaths	15,403	15,296	16,108	15,226	15,899	15,354	15,551	16,441	14,671	15,933
Percentage of deaths in hospitals	46.7	48.7	49.6	50.7	48.5	52.4	53.8	52.8	54.8	54.9

Cause of death Where more than one cause of death is reported the death is classified to the underlying cause, i.e., the starting point in the sequence of events leading to death. See General Notes on page 8.

Proportion of deaths from principal causes Abstract 15B sets out the causes of death as proportions per 1,000 of the total deaths in certain age-groups by sex. Heart diseases continued to bear by far the greatest proportion of the total deaths; other diseases having a high proportion were cancer, cerebrovascular disease (mainly cerebral thrombosis and cerebral haemorrhage) and respiratory diseases.

At ages under one year congenital malformations, premature birth, and pneumonia were the principal causes of death.

Between the ages of one and ten the highest proportions were caused by accidents, congenital malformations, cancer, Hodgkin's disease and leukaemia and pneumonia.

Between the ages of ten and twenty-four, accidents caused by far the largest proportion of deaths. The proportions from cancer, congenital malformations and Hodgkin's disease and leukaemia were also high.

Between the ages of twenty-five and forty-four the sequence was cancer, heart diseases, accidents, suicide and cerebrovascular disease.

From age forty-five the pattern was heart diseases followed by cancer, cerebrovascular disease and respiratory diseases.

Table K shows, for each of the principal causes, the numbers of deaths and the death rates for each year since 1965.

Deaths from the principal epidemic diseases A total of 114 deaths (0.08 per 1,000 population) fell within this group. Of these, 77 were caused by influenza, 26 by diarrhoeal diseases of children under 2 years of age, 4 by whooping cough, 3 by measles, 2 by acute poliomyelitis and 2 by dysentery. No deaths resulted from the other diseases comprising this group, viz., diphtheria, smallpox, typhus, typhoid fever, scarlet fever and paratyphoid fever.

The number of deaths from the principal epidemic diseases in 1967 was 78 and the relative rate was 0.05. The higher incidence of deaths from influenza in 1968 accounted for the increase in deaths in this group.

TABLE K. Northern Ireland: Causes of death and death rates per 100,000 of estimated population, 1965-1968.*

* See definition on page 8.

* This list of categories has been revised according to the 8th Revision of the International Classification of Diseases. Figures shown for 1965-1967 relate to similar categories in the 7th Revision and should be regarded as approximate.

The notifications of certain infectious diseases for each administrative area in Northern Ireland for the year 1968 are shown in Abstracts 31A and 31B, and the diseases named are those laid down by regulations (issued by the Ministry of Health and Social Services) as compulsorily notifiable throughout Northern Ireland.

Influenza There were 77 deaths from influenza in 1968 as against a total of 22 in 1967. The relative rates per 1,000 of the population were 0.05 (1968) and 0.01 (1967).

Tuberculosis Deaths from this cause numbered 58 compared with 62 in 1967. The rate of 0.04 per 1,000 population is the same as for 1967. Further details of comparable figures over the past years may be seen at a glance in Tables L and L1.

The tuberculosis death rates (provisional) for England and Wales, Scotland and the Irish Republic in 1968 were 0.04, 0.05 and 0.10 respectively.

More detailed information about deaths from tuberculosis is given in Abstracts 12 and 17.

Cancer* The number of deaths from cancer in Northern Ireland during 1968 was 2,672 giving a death rate of 1.78 per 1,000 of the population which is 0.21 above the rate for 1968.

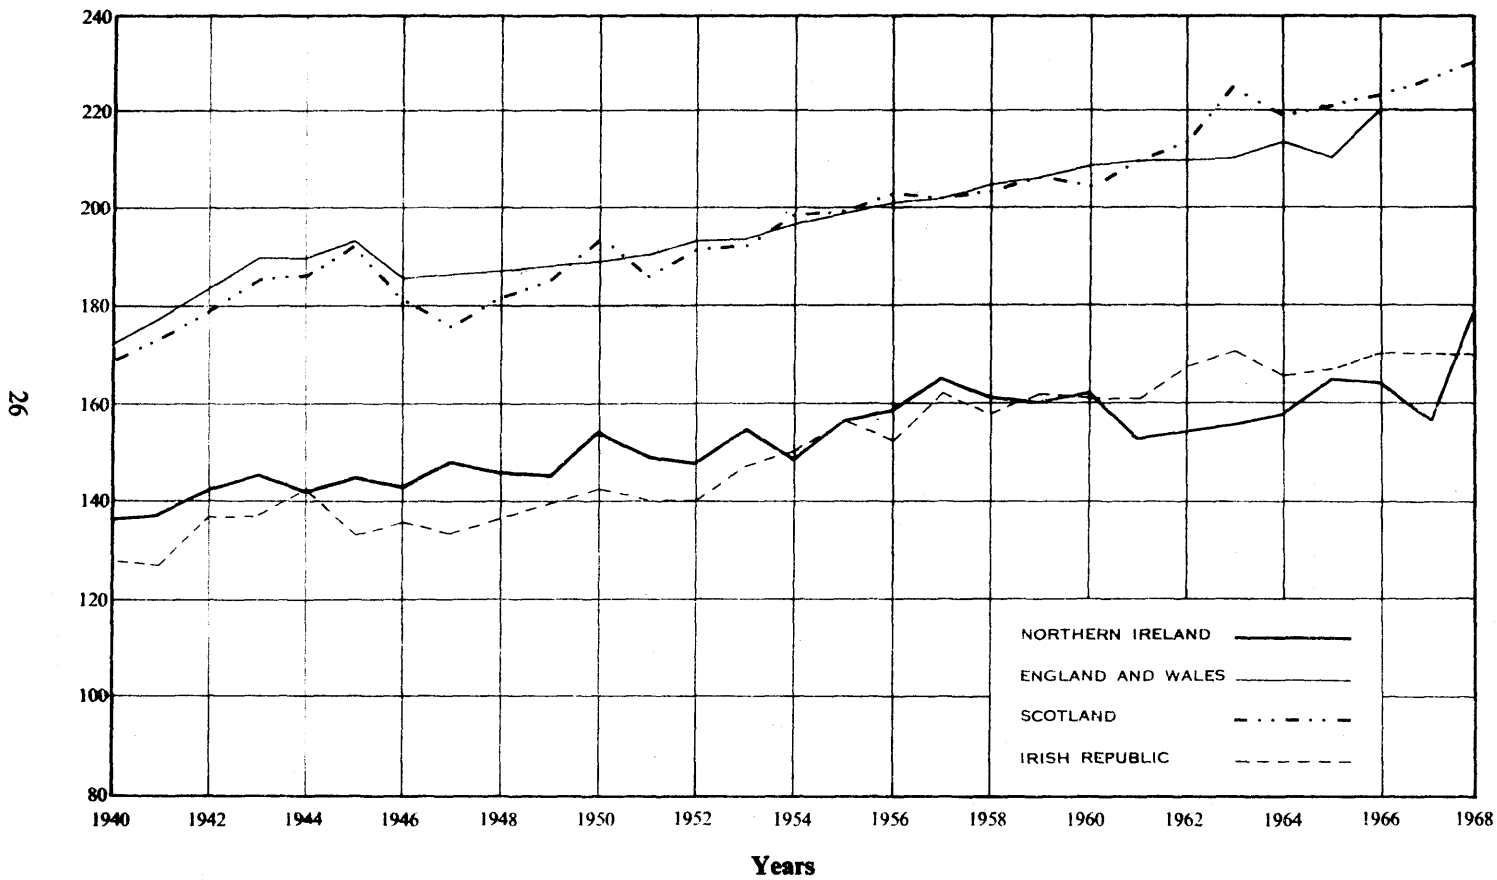

The death rates from cancer and tuberculosis were roughly the same in 1931 (i.e. 1.26 for cancer and 1.23 for tuberculosis). Since then the cancer rate has increased by 41.3 per cent. and the tuberculosis rate has decreased by 96.7 per cent.

TABLE M. Northern Ireland: Deaths and death rates from cancer, 1926, 1937, 1951 and 1959-1968.

* See definition on page 8

DIAGRAM 4. Death rates (crude) from cancer in Northern Ireland, England and Wales, Scotland and the Irish Republic. 1940-68. Rate per 100,000 population.

As will be seen from Abstract 12 the most frequent sites of fatal cancer among males during the year were bronchus and lungs, 434; stomach, 174; intestines, 121; prostate, 119; rectum, 79 and pancreas, 69. Among females the most frequent sites were breast, 241; intestines, 213; stomach, 150; bronchus and lungs, 91; uterus, 91; ovary, fallopian tube and broad ligament, 69 and rectum, 61.

For many years cancer of the stomach proved to be the most frequent site of fatal cancer for both sexes and it remained so among females up to 1961 when it took second place to cancer of the breast. Since 1954 however, cancer of the lung has been more prevalent among males. The number of male deaths from this cause increased rapidly each year since 1945, with the exception of 1958, 1960, 1962 and 1964 in each of which years there was a slight decrease compared with the year immediately preceding.

Table M1 shows the numbers and rates of lung cancer deaths by sex for the past ten years. Abstract 12 gives particulars regarding the cancer sites by sex and age-groups and Abstracts 11, 17 and 21 give details of cancer incidence in administrative areas.

TABLE M1. *Northern Ireland: Deaths and death rates from lung cancer 1959-1968.*

YEAR	Number			Rate per 100,000 population		
	Males	Females	Persons	Males	Females	Persons
1959	278	68	346	41	9	25
1960	276	59	335	40	8	24
1961	317	48	365	46	7	26
1962	296	64	360	42	9	25
1963	354	60	414	50	8	29
1964	330	66	396	46	9	27
1965	352	62	414	49	8	28
1966	374	73	447	52	10	30
1967	393	81	474	54	11	32
1968	434	91	525	59	12	35

Cerebral haemorrhage, apoplexy, etc. The deaths assigned to this group (described as "cerebrovascular disease") numbered 2,324 giving a rate of 1.55 per 1,000 of the population. This rate is 0.16 higher than that for 1967, and is 0.07 above the average rate for the period 1963-1967. The rate per 1,000 of the male population was 1.27 whilst the female rate was 1.81. Details of deaths in this group by ages are shown in Abstract 12.

Heart diseases The deaths from the various forms of heart disease during the year numbered 5,707, the rate per 1,000 of the population being 3.80 which is 0.14 above that for the previous year and is 0.09 below the average for the five years 1963-1967.

TABLE N. Northern Ireland: Deaths and death rates from heart disease (all forms) 1926, 1937, 1951, and 1960-1968.

YEAR	MALES		FEMALES		PERSONS	
	Number of deaths	Rate per 1,000 of the estimated male population	Number of deaths	Rate per 1,000 of the estimated female population	Number of deaths	Rate per 1,000 of the estimated population
1926	1,241	2.04	1,437	2.22	2,678	2.14
1937	1,885	3.02	1,815	2.76	3,700	2.89
1951	2,785	4.16	2,722	3.87	5,507	4.01

1962	3,074	4.39	2,691	3.66	5,765	4.02
1963	3,303	4.69	2,776	3.75	6,079	4.20
1964	3,034	4.27	2,526	3.38	5,560	3.81
1965	3,120	4.36	2,580	3.43	5,700	3.88
1966	3,178	4.41	2,611	3.45	5,789	3.92
1967	2,971	4.09	2,488	3.26	5,459	3.66
1968	3,128	4.27	2,579	3.35	5,707	3.80

Of the total number of deaths from heart diseases, 4,229 (74.1 per cent.) were in the groups known as ischaemic heart disease which includes coronary disease. Chronic rheumatic heart disease accounted for 216 (3.8 per cent.), hypertensive heart disease for 185 (3.3 per cent.) and other forms of heart disease for 1,078 (18.8 per cent.) of all deaths from heart diseases.

International detailed list numbers 393-398, 402, 404, 410-414 and 420-429 as shown in Abstract 12 give the age and sex breakdown of all deaths from heart disease.

Bronchitis The deaths from bronchitis during the year numbered 806, giving a rate of 0.54 per 1,000 of the population, which is 0.10 above the rate for 1967. Bronchitis was also an important contributory factor in 450 deaths though not related to the condition taken to have initiated the sequence of events leading to death.

Pneumonia Deaths from pneumonia numbered 687 during the year 1968, the rate of 0.46 per 1,000 of the population being 0.12 higher than the rate for 1967. The average rate for the five years 1963-1967 was 0.52.

Pregnancy and childbirth The mortality of women during pregnancy and childbirth is classified under two headings, namely—(1) deliveries and complications of pregnancy, childbirth and the puerperium and (2) deaths with mention of pregnancy, childbirth and the puerperium but not classified as maternal. The causes of death shown in detailed list numbers 630-678 of Abstract 12 are those to which the former group were assigned, and Table O below gives details of the latter group.

The 9 deaths from diseases of pregnancy, childbirth and the puerperal state in 1968 yielded a rate of 0.27 per 1,000 births (live and still), which is 0.03 above the rate for 1967.

The 7 deaths shown in Table O gave a rate of 0.21 per 1,000 births (live and still) compared with 0.38 in the previous year. It should be noted that there is no connection in these cases between the underlying causes shown and the maternal condition coincidentally present.

TABLE O. Northern Ireland: Deaths in which maternal conditions were coincidentally present, 1968.

Detailed List Numbers	CAUSES OF DEATH	All Ages	Ages						
			15-	20-	25-	30-	35-	40-	45 and upwards

Infant mortality Deaths of infants under 1 year of age numbered 796, or 24 per 1,000 live births registered. This rate is 1 higher than that for the previous year. Of these deaths, 458 were of males and 338 of females, the former number being equivalent to 27 per 1,000 live births of males and the latter to 21 per 1,000 live births of females. The corresponding rates for 1967 were 25 and 22 respectively. In 1968 the provisional infant mortality rate in England and Wales was 18, in Scotland 21 and in the Irish Republic 21. Comparative figures for previous years are shown in Table B on page 11.

Neonatal mortality Deaths of infants aged under four weeks numbered 522, representing a rate of 16 per 1,000 live births. This is equivalent to 65.6 per cent. of all deaths of children under 1 year of age. The corresponding figures for 1967 were 545, 16 and 69.4 per cent. respectively. The 1968 rates for England and Wales, Scotland and the Irish Republic were (provisionally) 12, 13 and 14 respectively.

DIAGRAM 6. Infant mortality rates (crude) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1940-68. Rate per 1,000 live births.

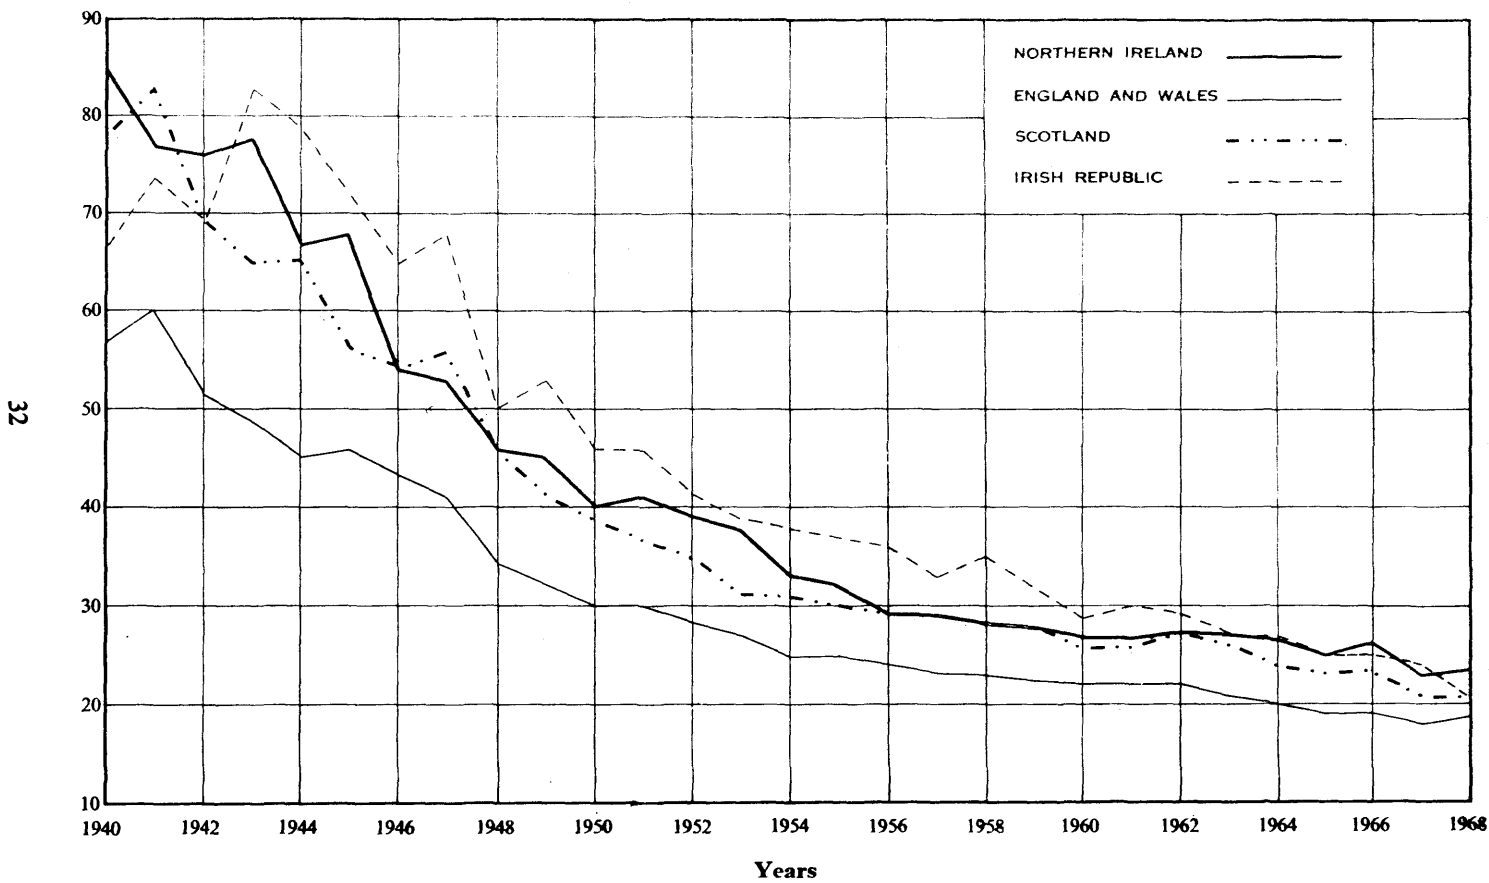

TABLE P. *Northern Ireland: Neonatal and infant mortality rates per 1,000 live births by area, 1965-1968.*

Perinatal deaths (i.e. deaths of children within the first week of life together with all still-births) numbered 992 giving a rate of 29 per 1,000 live and still-births. Comparative rates in England and Wales and Scotland were (provisionally) 25 and 26 respectively.

TABLE Q. *Perinatal deaths and rates per 1,000 births (live and still) by area, 1965-1968.*

Abstract 22 gives the number of deaths of children under 1 year of age for Northern Ireland by counties and county boroughs (also for the aggregates of the urban and rural areas) for the years 1965-1968. For the last of these years the numbers are given by sex and age-groups.

Abstract 11 gives the number of infant deaths, together with the number of births, for each administrative area in Northern Ireland.

The numbers of infant deaths for 1968 by age and cause of death are given in Abstract 24, together with the infant mortality rates by causes.

Mortality among illegitimate children Deaths of illegitimate children under 1 year of age numbered 42 in 1968, which is equivalent to a rate of 34 per 1,000 of the illegitimate live births registered and is 10 above the rate for the previous year. The corresponding rates for legitimate children were 23 and 24 per 1,000 legitimate live births during 1967 and 1968, respectively.

TABLE R. Northern Ireland: Illegitimate neonatal and infant mortality rates per 1,000 illegitimate live births by area, 1965-1968.

AREA	Illegitimate neonatal mortality rate per 1,000 illegitimate live births				Illegitimate infant mortality rate per 1,000 illegitimate live births

* Excluding County Borough.

Deaths of illegitimate infants aged under four weeks (illegitimate neonatal mortality) numbered 33, representing 78.6 per cent. of the total deaths of all illegitimate children under 1 year of age. The corresponding figures for 1967 were 17 and 58.6 per cent. respectively.

Abstract 24 gives the number of deaths and mortality rates of illegitimate children under 1 year of age by causes. Most of the rates are considerably in excess of the corresponding rates for all children, but it should be noted that many of the rates relating to the illegitimate live births are based on very small numbers of deaths.

Abstract 23 shows the numbers of deaths of illegitimate children under 1 year of age for Northern Ireland by counties and county boroughs and the numbers in the urban and rural areas for the years 1965-1968. The sex and age distribution is shown for the year 1968.

Violent deaths Deaths from causes other than natural causes are termed violent deaths and are classified according to both the external circumstances giving rise to injury, expressed as the "external cause of injury" and to the nature of the injury sustained, designated as the "nature of injury" (see Abstract 19).

The number of deaths ascribed to violence during the year was 639 (371 males and 268 females) which is 66 less than the number registered in 1967, and is equivalent to 4.0 per cent. of the total deaths registered.

TABLE S. Northern Ireland: Violent deaths by external cause of injury, 1964-1968.

CAUSES OF DEATH	1964	1965	1966	1967	1968
<i>Accidental Causes:</i>

TOTAL DEATHS FROM VIOLENCE	601	593	655	573	639

Of the 639 deaths, 226 were attributed to transport accidents (E800—E845) (excluding drowning from watercraft (E830, E832)). Road vehicle accidents (E810—E827) accounted for 224 deaths as compared with 228 in 1967. Table S1 affords comparison of numbers of deaths from road vehicle accidents in 1968 with those for the three preceding years by sex and certain age-groups whilst Table S2 shows the various categories of persons killed in motor vehicle accidents and details of other transport accidents.

TABLE S1. Northern Ireland: Deaths from road vehicle accidents (E810—827), 1965-1968.

	All ages	Under 5 years	5-14	15-34	35-54	55-74	75 and over
MALES							
1965	156	10	8	51	39	38	10
1966	194	15	18	62	40	39	20
1967	173	12	15	56	42	37	11
1968	166	8	18	60	27	37	16
FEMALES							
1965	55	8	10	9	6	17	5
1966	64	7	6	14	11	16	10
1967	55	4	7	16	9	17	2
1968	58	7	9	14	8	14	6

Other accidents accounted for 294 deaths and of these deaths 167 were ascribed to falls, 24 to drowning, 18 to poisons or poisonous gases, 31 to fire and heat, 1 to mechanical suffocation, 5 to machinery and 48 to other accidental causes. A detailed break-down showing non-transport accidents by sex and age-groups is given in Abstract 20.

Deaths from accidents recorded as occurring in the home numbered 151 compared with 115 in 1967 and 163 in 1966. Most accidents in the home are occasioned by falls and it should be noted that in 1968 there were 26 deaths from falls where the place of the accident was unspecified compared with 19 in 1967. Fuller details of these and other accidents (apart from transport accidents) are given in Abstract 20.

During the year there were 99 cases of suicide (51 males and 48 females) compared with 98 (64 males and 34 females) in 1967, 7 deaths from homicide and 1 death from late effects of injuries due to war operations. In addition there were 12 deaths in which it was not possible to determine whether the injuries were accidentally or purposely inflicted.

TABLE S2. Deaths from transport accidents, by sex and age, 1968.

Deaths in which violence was stated to be the sequel to some other cause are correlated in Table S3. Alcoholism was, as usual, the greatest single factor in this group causing the deaths of 19 people. This figure, however, does not include deaths caused by other people who were in a state of intoxication but who were not themselves killed.

TABLE S3. Northern Ireland: Deaths in which violence was a terminal cause, 1968.

CERTIFICATION OF DEATHS

All deaths must be certified by either a medical practitioner or a coroner and Table T shows the type of certification during the year. The circumstances of 1,910 deaths (12.0 per cent. of all deaths) were considered by the coroners and in 564 of these cases inquests were held. In 673 cases the deaths were certified by coroners after post-mortem examinations had proved inquests to be unnecessary.

TABLE T. *Northern Ireland: Deaths by certification, 1968.*

AREA	Total deaths	Certified by medical practitioners	Certified by coroners		
			Without inquest		After inquest
			Without post-mortem	After post-mortem	
Northern Ireland	15,933	14,023	673	673	564
Co. Antrim	2,907	2,589	99	103	116
Co. Armagh	1,296	1,152	68	33	43
Co. Down	3,132	2,693	148	172	119
Co. Fermanagh	644	583	15	21	25
Co. Londonderry*	1,127	993	66	25	43
Co. Tyrone	1,473	1,310	55	60	48
Belfast Co. Borough	4,811	4,222	194	243	152
Londonderry County Borough	543	481	28	16	18

All rural areas	7,065	6,225	293	264	283

*Excluding County Borough.

Of the 14,023 deaths certified by medical practitioners the deceased persons were not seen after death by the practitioners in 4,706 cases.

LIFE TABLE

The expectation of life is the average number of years which would be lived by a group of people of given age who are continuously subject to given mortality rates, usually those of a selected year or years.

The abridged life table shown as Table U is based on the mortality rates for 1966-1968 and shows the expectation of life at various age-points together with the number of persons who would survive to given age *x* out of 10,000 born, if subjected throughout their lives to this mortality experience.

Thus 97 per cent. of males and 98 per cent. of females would survive the first year of life; 96 per cent. of males and 97 per cent. of females would reach the age of 20; 79 per cent. of males and 86 per cent. of females would reach the age of 60 and the men could then expect an average future lifetime of 15 years compared with 19 years for women.

Based on the mortality experience of 1966-1968 the expectation of life at birth was 68.2 years for males and 73.5 years for females; at age one year the expectations were 69.0 years for males and 74.1 years for females. Table U1 affords comparison of these figures with those for certain preceding years.

TABLE U. Northern Ireland: Abridged Life Table, 1966-1968.

Age x	Males		Females	
	l_x	e_x	l_x	e_x
0	10,000	68.19	10,000	73.45

65	6,883	12.25	8,037	15.08
70	5,555	9.58	7,124	11.69
75	3,998	7.33	5,773	8.84
80	2,452	5.38	4,047	6.54
85	1,101	3.91	2,293	4.64

This abridged life table is constructed from the estimated populations and the total deaths registered during the years 1966-1968.

The column headed l_x shows the numbers who would survive to exact age x out of 10,000 born who were subject throughout their lives to the death probabilities indicated by the mortality records for the years 1966-1968.

Column e_x gives the "expectation of life"—that is the average future lifetime which would be lived by a person aged exactly x if subject to those death probabilities.

TABLE U1. Northern Ireland: Expectation of life at birth, at one year of age and at 65 years of age for certain periods between 1890 and 1968.

Period	Expectation of life					
	At birth		At age one year		At age 65 years	
	Male	Female	Male	Female	Male	Female
1890-92	46.3	45.7	—	—	10.6	10.6
1900-02	47.1	46.7	—	—	10.5	10.4

1965-67	68.1	73.3	68.9	74.1	12.3	15.0
1966-68	68.2	73.5	69.0	74.1	12.3	15.1

The Life Tables for 1901, 1926, 1951 and 1961 are included in Section 1 of the Ulster Year Book, 1969, obtainable from H.M. Stationery Office (price 15s. 0d.).

CONGENITAL MALFORMATIONS

This section which appeared in the Report for the first time in 1964, relates to children born (live or still) with any apparent deformity. The information about these congenital malformations is furnished to the General Register Office by the county and county borough health committees and is classified according to the residence of the parents and not to the place of occurrence.

During the year 944 children were born with congenital malformations compared with 942 in 1967 and 969 in 1966. The Northern Ireland rate for 1968 was 28.0 per 1,000 births (live and still) compared with 27.7 for 1967.

TABLE V. Northern Ireland: Number of congenitally malformed children by area and month of birth, 1968.

AREA	MONTH OF BIRTH												Totals	Rate*
	January	February	March	April	May	June	July	August	September	October	November	December		
Northern Ireland	89	65	68	73	84	80	99	77	83	78	82	66	944	28.0

County Tyrone	8	6	6	2	4	2	10	2	8	2	5	3	58	17.3

*Per 1,000 births (live and still).
†Excluding County Borough.

Of the 944 children born with malformations 184 (19.5 per cent.) were born with more than one abnormality. In all, 1,197 separate abnormalities were recorded. Table VI shows the number of children affected by multiple abnormalities in each county and county borough.

TABLE VI. Northern Ireland: Multiple abnormalities by area, 1968.

AREA	NUMBER OF ABNORMALITIES										All	
	1		2		3		4		5		Children	Abnorms.
	Children	Abnorms.	Children	Abnorms.	Children	Abnorms.	Children	Abnorms.	Children	Abnorms.

Northern Ireland TOTAL	760	760	126	252	48	144	9	36	1	5	944	1,197

*Excluding County Borough.

In Northern Ireland as a whole 71 (7.5 per cent.) of the congenitally malformed children were born at home, the remainder having been born in hospitals.

In 27 cases the children were twins, the other partner of each having no reported malformation in 21 instances.

Details about the nature of the malformations will be found in Abstracts 26, 27, 29 and 30 and data about the mother's age and the number of other children born to her are in Abstract 28.

MIGRATION

The population figures ascertained at each census enable the net migration during the inter-censal periods to be calculated. Table W shows that during the period of approximately five and a half years between the censuses taken on the 23rd April, 1961 and the 9th October, 1966 there was a net outward movement of 37,701 persons to all countries including other parts of the British Isles.

TABLE W. *Northern Ireland: Net migration during inter-censal period 1961-1966.*

	Males	Females	Total
Population, Census of 1961	694,224	730,818	1,425,042
Births, 1961-1966	94,508	87,981	182,489
Deaths, 1961-1966	44,570	40,485	85,055
Natural increase*	49,938	47,496	97,434
Population 1961 plus natural increase	744,162	778,314	1,522,476
Population, Census of 1966	723,884	760,891	1,484,775
Net movement outwards	20,278	17,423	37,701

* The excess of births over deaths.

Table W1 shows the natural increase in the population for each inter-censal period since birth and death registration commenced in 1864, together with the net movement outwards and the percentage of the increase lost by migration.

TABLE W1. *Northern Ireland: Inter-censal variations in population, 1871-1966.*

Inter-censal period	Population at beginning of period	Natural increase*	Net movement outwards	Percentage of increase lost by migration
1871-1881	1,359,190	104,350	158,724	152
1881-1891	1,304,816	71,910	140,670	196
1891-1901	1,236,056	68,634	67,738	99
1901-1911	1,236,952	78,996	65,417	83
1911-1926	1,250,531	113,603	107,573†	95
1926-1937	1,256,561	80,835	57,651	71
1937-1951	1,279,745	158,443	67,267†	42
1951-1961	1,370,921	146,349	92,228	63
1961-1966	1,425,042	97,434	37,701	39

* Excess of births over deaths.

† Including deaths in H.M. Forces and Mercantile Marine which occurred outside Northern Ireland.

It is estimated that during the year ended 30th June, 1968 the net outward migration amounted to 7,244 persons which represents 41.2 per cent. of the natural increase (17,599) during that period.

METEOROLOGY

The following synopsis of the weather experienced in Northern Ireland during the year 1968 is furnished by the Director-General of the Meteorological Office, through the Climatological Services and Meteorological Public Records Office in Belfast. Where the term "average" is used, it refers to the standard period 1916-1950 for rainfall, but to the period 1931-60 for temperature and sunshine.

Tables on pages 44 and 45 give data in respect of certain stations; Columns 2 and 3 give highest and lowest air temperatures on any date during the month specified, whilst in Columns 4 and 5 the mean daily maximum and minimum temperatures are given. A table on page 45 gives similar data related to Northern Ireland as a whole, based upon a selection of representative stations, appropriate to the Meteorological element, and not necessarily those whose data is published in the preceding tables. This information levels out variations experienced in different parts of Northern Ireland, and therefore gives a general picture. The "highest" and "lowest" temperatures, however, refer to values received from around sixty stations recording temperatures in the Province and again are not restricted to the seven stations for which data is given in the preceding tables. Temperature data is given in degrees Centigrade; to convert actual values to Fahrenheit, multiply by nine and divide by five, then add 32.0. To convert "difference from average temperature" in the Centigrade scale to Fahrenheit $1.0^{\circ}\text{C}=1.8^{\circ}\text{F}$.

Temperatures over the year as a whole were around normal, though February was cold, as was May, which was the coldest May month this century. Rainfall was 96 per cent of average for the period; the wettest month was September, with a value of 141 per cent of normal, and the driest, July, with only 41 per cent of average. Broadly speaking, the year was a noteworthy one, with a good dry summer; the very wet month of September; the very heavy rainfalls of 31st October and 1st November, when severe flooding occurred in many places throughout the Province. The rain, on 31st Oct./1st Nov., was accompanied by gales, and this in turn led to excessive damage to the New Coast Road Scheme. The month of July was the driest for fifty years in parts of the Province, whilst the heavy rainfall of the 31st October and 1st November was the highest ever recorded in Northern Ireland. Nine inches were recorded at Newcastle during the forty-eight hours. Severe gales occurred on 14th and 15th January and these caused damage to property in places throughout the Province. March had five days on which gale force winds occurred. April to August was quiet, windwise, though there were two occasions of gale force winds in September. During the last quarter of the year, apart from 31st October and 1st November already referred to, there were no further gales worthy of mention. There was one occasion of fog in the last quarter of the year when visibility was reduced to 10 yards or less in and around Belfast leading to the disruption of bus services etc.

Sunshine for the year as a whole was 107 per cent. of average. The sunniest months were August and February, whilst the dulllest was January with only 60 per cent of the seasonal average.

A brief summary of general conditions for each month follows. More detailed information appears in the Quarterly Returns.

January: Above average rainfall, dull with sunshine well below normal. Gales 14th and 15th causing damage to property. Temperature above average.

February: Cold and dry with plenty of sunshine. Eighteen occasions of air frost and ground frost practically every night. Rainfall was only 54 per cent of normal.

March: Above average rainfall, five occasions of gales, temperature a little below average. Sunshine normal.

April: Variable amounts of rainfall, sunshine above average. Temperature about normal.

May: Above average rainfall, very cold, the coldest May this century.

June: Rainfall below normal, dry spell 7th-18th (inclusive). Temperatures average.

July: Very dry month, the driest for fifty years in some parts of Province. General value 45 per cent of average. Sunshine well above the seasonal normal. Water shortages.

August: Comparatively dry month. Rainfall 10 per cent of average. Sunshine well above normal.

September: Rainfall above average everywhere, about 1½ times normal. Sunshine just above average. Two occasions of gales.

October: Another wet month, sunshine below normal. Heavy rainfalls, highest ever recorded in Province; at Newcastle over six inches in twenty-four hours. Severe flooding and damage throughout Province (Floods at Newcastle, Ballymena; damage to New Coast Road). Temperatures above normal, very mild.

November: Heavy rainfall on 1st adding further troubles to already flooded and damaged areas. Gales accompanied the rain. A further 2 to 4 inches of rain fell in many places. Temperatures below average. Sunshine 80 per cent of normal.

December: A comparatively dry month. Rainfall 77 per cent of average. Snow fell on four occasions and lay to some extent for about 2 to 4 days. Dense fog on 16th caused some disruption to traffic. Both temperature and sunshine were below normal.

TABLE X. Northern Ireland: Air temperature, rainfall and sunshine recorded at seven stations during the year, 1968 and general values for the Province as a whole (final values*).

ADMINISTRATION

Introductory The administrative functions of the office of the Registrar General comprise the registration of births (live and still), deaths, marriages and adoptions, and the provision or supervision of machinery for dealing with preliminaries to marriages other than those according to the rites of the Roman Catholic Church.

Buildings licensed or registered for marriages The numbers of places of worship (other than those belonging to the Roman Catholic Church) in which marriages could be solemnised, as at 31st December in each of the years 1965, 1966, 1967 and 1968 were as follows:

<i>Denomination</i>	<i>1965</i>	<i>1966</i>	<i>1967</i>	<i>1968</i>
Church of Ireland	414	415	417	417
Presbyterian	512	513	513	515
Methodist	159	160	161	162
Others	269	278	286	300
TOTAL	1,354	1,366	1,377	1,394

State of registration The measures adopted for particulars of births notified under the Notification of Births Act, 1907, to be furnished to registrars in the two county boroughs have continued to be of value in securing the registration of a number of births which had not been registered within the prescribed period of 6 weeks.

Births and deaths not registered within a year of their occurrence can be recorded only with the authority of the Registrar General. During 1968 such authority was granted for the registration of 23 births, as compared with 26 in 1967 and 25 in 1966. The registration of 11 deaths was authorised as compared with 11 in 1967 and 11 in 1966.

Legitimacy Acts (N.I.), 1928 to 1961 Under these Acts an illegitimate child whose parents have married is, subject to certain conditions, legitimated, and the Registrar General is empowered to authorise the re-registration of the birth. During 1968 the re-registration of the births of 152 children was authorised under these Acts, the comparative figures for 1967 and 1966 being 133 and 137 respectively.

Adoption of Children Act (N.I.), 1950 Registers of children adopted under the provisions of the above Act and of the previous Adoption Act of 1929 are kept in the General Register Office, to which the adoption orders made by the Courts are transmitted. A certified copy of an entry in the Adopted Children Register is evidence of adoption, and is also evidence of the date of birth of the adopted child. The children whose adoptions were recorded in the Adopted Children Registers during 1968 numbered 456 whilst the figures for 1967 and 1966 were 424 and 408 respectively.

Searches and certificates The original records of live births, deaths, and marriages registered in Northern Ireland are, in general, in the custody of local registration officers, who issue annually therefrom many thousands of certificates. An indication of the extent to which Government Departments and the public have utilised the facilities for searching in the indexes and obtaining certificates from records in the General Register Office for

Northern Ireland (including the Adopted Children Register) is afforded by the following statement:

YEAR	OFFICIAL		PAID			
	Searches	Certificates	Searches	Certificates		Fees Received
				Full	Short	
1927	56	29	109	112	—	£ 19 s. 9 d. 0

*1966	352	357	3,959	4,456	3,156	1,587 14 0
1967	281	273	3,992	4,499	3,137	1,730 0 6
1968	284	279	4,181	4,585	3,596	1,810 14 6

*Fees for certificates and searches were increased with effect from the 21st April, 1956 and the 1st April 1966.

Verifications Requests for the verification of particulars of events registered are received from Government Departments in connection with claims for pensions, etc. During the year the number of cases dealt with was 9,708 out of which 4,354 were checked from the records in the General Register Office and 5,354 events (where records were not available at that office) were referred to local registration officers.

ABSTRACTS
1968

ABSTRACT 17. Abbreviated list numbers and equivalent detailed list numbers and causes of death (8th Revision I.C.D.).

Detailed List	Abbreviated List	CAUSE OF DEATH
000	1	Cholera
001	2	Typhoid fever
004,006	3	Bacillary dysentery and amoebiasis
008,009	4	Enteritis and other diarrhoeal diseases
010-012	5	Tuberculosis of respiratory system
013-019	6	Other tuberculosis, including late effects
020	7	Plague
032	8	Diphtheria
033	9	Whooping cough
034	10	Streptococcal sore throat and scarlet fever
036	11	Meningococcal infection
040-043	12	Acute poliomyelitis
050	13	Smallpox
055	14	Measles
080-083	15	Typhus and other rickettsioses
084	16	Malaria
090-097	17	Syphilis and its sequelae
Rem. 000-136	18	All other infective and parasitic diseases
		Cancer of:—
151	19A	stomach
152-154	19B	intestines and rectum
162	19C	trachea, bronchus and lung
174	19D	breast
180-189	19E	genito-urinary organs
Rem. 140-200,	19F	other sites
202, 203, 208, 209		
201, 204-207	19G	Hodgkin's disease and leukaemia
210-239	20	Benign neoplasms and neoplasms of unspecified nature
250	21	Diabetes mellitus
260-269	22	Avitaminoses and other nutritional deficiency
280-285	23	Anaemias
320	24	Meningitis
390-392	25	Active rheumatic fever
393-398	26	Chronic rheumatic heart disease
402, 404	27A	Hypertensive heart disease
400, 401, 403	27B	Other hypertensive disease
Pt. of 410-414	28A	Ischaemic heart disease with hypertension
Rem. of 410-414	28B	Ischaemic heart disease without hypertension
420-429	29	Other forms of heart disease
Pt. of 430-438	30A	Cerebrovascular disease with hypertension (benign)
Rem. of 430-438	30B	Cerebrovascular disease without hypertension
440-458	46A	Other diseases of circulatory system
470-474	31	Influenza
480-486	32	Pneumonia
490-493	33	Bronchitis, emphysema and asthma
Rem. 460-519	46B	Other diseases of respiratory system
531-533	34	Peptic ulcer
540-543	35	Appendicitis
550-553, 560	36	Intestinal obstruction and hernia
571	37	Cirrhosis of liver
Rem. 520-577	46C	Other diseases of digestive system
580-584	38	Nephritis and nephrosis
600	39	Hyperplasia of prostate
640-645	40	Abortion
630-639, 650-678	41	Other complications of pregnancy, childbirth and puerperium
740-759	42	Congenital anomalies
764-768, 772, 776	43	Birth injury, difficult labour and other anoxic and hypoxic conditions
760-763, 769-771,	44	Other causes of perinatal mortality
773-775, 777-779		
780-796	45	Symptoms and ill-defined conditions
Rem. 240-738	46D	All other diseases
E810-E823	47	Motor vehicle accidents
E800-E807,		
E825-E949	48	All other accidents
E950-E959	49	Suicide and self-inflicted injuries
E960-E999	50	All other external causes
