## *GENERAL NOTES*

---

The figures contained in this Report may be regarded as superseding the provisional figures already published for the year 1975 in the Registrar General's quarterly returns.

Throughout the Report, births and deaths have been recorded according to date of registration and not to date of occurrence. They have also been allocated to the district of normal residence, if in Northern Ireland; births have been assigned to the districts containing the normal residence of parents, and deaths to the districts containing the normal residence of the deceased persons. Events occurring in Northern Ireland relating to persons whose normal residence is outside Northern Ireland have been assigned to the district of occurrence.

Rates are assessed per 1,000 of the estimated home population as at 30 June unless otherwise stated. The home population comprises the population of all types in Northern Ireland including Her Majesty's forces. Marriage rates relate to the number of marriages solemnised, and not to the number of persons married.

Comparisons with rates (births, deaths etc.) recorded in other parts of the British Isles are included in several tables and diagrams. These comparisons are substantially correct but it should be remembered that (with the exception of Diagram 3) they are crude rates only and take no account of changes in, or differences between, the age and sex structure of the populations.

Generally speaking, the classifications adopted for the purposes of this Report are the detailed and Abbreviated Lists contained in the "Manual of the International Statistical Classification of Diseases, Injuries and Causes of Death, 1965."

The term cancer, where used, refers to all malignant neoplasms and neoplasms of the lymphatic and haematopoietic tissues, except Hodgkin's disease, leukaemia and aleukaemia (I.C.D. Nos. 201, 204-207).

Where more than one cause of death is reported, the death is classified according to the underlying cause, i.e. the disease or injury which initiated the train of morbid events leading directly to death. This method of classification is followed even if the deceased may have recovered from the underlying cause long before the date of death.

In the text and tables the term "stillbirth" refers to a child born after the 28th week of pregnancy and which did not breathe or show any other sign of life. Perinatal deaths are deaths of infants under one week and also includes still-births; "neonatal mortality" relates to deaths of children under 4 weeks of age and "infant mortality" to deaths of all children (including neonatal) under 1 year of age.

In general in the tables and abstracts, dots (.) are used to indicate "none" and dashes (—) are used to indicate that information cannot be given or that the headings are not applicable.

## REPORT 1975

---

### SUMMARY

The birth and death rates were both lower than in 1974; the still birth rate however remained constant at 14 per 1,000 births live and still and the number of illegitimate live births increased by 0·2% of total live births. The marriage rate increased from 7.0 to 7.1 per 1,000 of the population.

The following figures indicate the general trend of marriages, births and deaths over the past 30 years. More detailed comparisons will be found in Tables A and A1.

Table B shows comparative statistics for Northern Ireland, England and Wales, Scotland and the Irish Republic. The marriage rate in Northern Ireland was lower than in England, Wales and Scotland. The live birth rate was lower than that of the Irish Republic but higher than that of England, Wales and Scotland; the death rate was lowest in Northern Ireland and the Irish Republic.

In the last decade the number of live births per 1,000 of the population has fallen slightly, except in the Irish Republic.

## POPULATION

The home population of Northern Ireland estimated as at 30 June 1975 was 1,537,200 persons, a decrease of 9,600 from the mid 1974 figure. This estimate, comprising civilians and members of H.M. forces stationed in Northern Ireland, is based on the census taken on 25 April, 1971 (1,536,065 persons) and takes account of natural increase and net migration. During the year ended 30 June 1975, the natural increase of 9,300 (approx.) was off-set by net migration of 16,000 (approx.). Further details regarding migration are shown on pages 43 and 44.

The total population is further analysed by sex and age in Table C1.

Table C shows the population of the 26 District Council areas.

**TABLE C. Population of 26 District Council Areas as recorded at the census of 1971 and as estimated at mid-year 1975.**

The 1971 Census population by age and sex for Northern Ireland and for District Council Areas is given in Abstract 1.

## MARRIAGES

**Number and rate.** Marriages registered during the year numbered 10,867 giving a rate of 7.07 per 1,000 population. The corresponding number and rate for 1974 were 10,783 and 6.97 respectively. In 10,079 (92.7 per cent.) of the total marriages both contracting parties were single; in 377 (3.5 per cent.) one or both were widowed and in 475 (4.4 per cent.) one or both were divorced. Of every 1,000 persons married, 25 were previously divorced. This rate is 3 above that for 1974; comparative rates for the years 1965 and 1955 were 8 and 9 respectively. Further details are given in Abstracts 3 and 6.

The number of marriages celebrated in each month in 1975 was as follows:

January . . . . .	566	April . . . . .	993	July . . . . .	1,235	October . . . . .	840
February . . . . .	481	May . . . . .	607	August . . . . .	1,480	November . . . . .	531
March . . . . .	920	June . . . . .	1,041	September . . . . .	1,546	December . . . . .	627
Qtrs.: 1st . . . . .	1,967	2nd . . . . .	2,641	3rd . . . . .	4,261	4th . . . . .	1,998

This shows that the period July to September was the most popular quarter for weddings, September heading the monthly totals with 1,546. February was the least popular month.

**Ages at marriage.** Although the most popular age for marriage was 21 years for men and 19 years for women, the arithmetical average age of men marrying in 1975 was 25.4 and of women 23.3. During 1974 this age was 25.3 among men and 23.2 among women. In 1965 the average age was 27.2 for men and 24.5 for women. The mean age at marriage of persons marrying for the first time in 1975 was 24.3 years for men and 22.2 years for women. Of the contracting parties 1.1 per cent. of the husbands and 6.4 per cent. of the wives were minors (the age of majority was lowered from 21 to 18 from 1 January 1970) the relative figures for 1965 being 11.4 per cent. and 30.2 per cent. Further statistics will be found in Table D and Abstracts 4, 5, 6, 7 and 7a.

**Method of celebration.** Table D1 shows the marriages registered during the years 1927, 1937, 1951, 1961, 1966 and 1971 to 1975 according to the form of celebration and Table D2 gives further details of marriages in 1975.

Marriages taking place in registrars' offices in the year under review represented 8.2 per cent. of the total marriages which is 0.8 above that for the previous year.

TABLE D. *Marriages, mean ages at marriage, men and women by previous marital status, 1974–1975.*

YEAR	Males—mean age at marriage												
	All men	All bachelors	All widowers	All divorced men	Bachelors who married			Widowers who married			Divorced men who married

## FERTILITY

### LIVE BIRTHS

**Number and rate.** Live births registered during 1975 numbered 26,130, 1,030 fewer than in 1974. The birth rate was 17.0 per 1,000 of the estimated population, being 0.6 below the rate for 1974.

The monthly incidence of births was as follows:

January	. 2,462	April	. 2,343	July	. 2,331	October	. 2,280
February	. 2,017	May	. 2,269	August	. 2,119	November	. 1,931
March	. 2,005	June	. 2,187	September	. 2,183	December	. 2,003
Qtrs.: 1st	. 6,484	2nd	. 6,799	3rd	. 6,633	4th	. 6,214

Compared with 1974, the first, second and fourth quarters showed decreases of 663, 138 and 239 respectively while the third quarter showed an increase of 10.

Births registered during 1975, where the normal residence of the parents was outside Northern Ireland, numbered 86 as compared with 100 in 1974; in 65 cases an address in the Irish Republic was given. The 1974 figures were 63 and 62 respectively.

**Proportion of males to females.** Births of males in Northern Ireland in 1975 numbered 13,475 and those of females 12,655, the proportion of male to female births being 1,065 to 1,000. The corresponding proportions for each of the five years 1970-74 were 1,064, 1,081, 1,078, 1,079, and 1,062 respectively.

**Age of Parents.** Table E1 classifies legitimate live births according to the age of the mother. The maternal age-group which contributed the greatest number of live births was the group aged 25-29.

Abstract 8a shows the legitimate live births by sex and by age of mother and father. Abstract 8b(1) legitimate live births by sex, age of mother and parity.

8b(ii) Legitimate live births by sex, age of mother and previous live born children.

Abstract 8c legitimate live births by age of mother and live birth order and Abstract 8d legitimate live births by sex, age of mother and duration of marriage.

**Place of Occurrence** Of all live births 99.4 per cent. occurred in hospitals.

**Multiple births** Up to and including 1960, the birth of one live and one still-born infant was regarded as a single birth and the birth of two live infants and one still-born infants as a twin birth. Since 1961 still-births have been registered and these are now being taken into account to obtain accurate figures for single and multiple births. Of the 26,130 live births, 25,552 were the product of single and 578 of twin pregnancies. There were no triple or quadruple pregnancies. Table E2 gives the multiplicity of all births.

## STILL-BIRTHS

**Number and rate** The number of still-births registered in 1975 was 375 giving a rate of 14 per 1,000 births (live and still). Comparative 1975 figures in England/Wales and Scotland were 6,200 and 10 and 765 and 11 respectively.

Abstract 11 shows the number of still-births in administrative areas by sex. The number of still-born children who would have been illegitimate had they been born alive was 26 representing 6.9 per cent. of all still-births. Ten of the still-births were the product of multiple confinements further particulars of which will be found in Table E2 above. In 266 cases the births occurred after a period of less than 37 weeks gestation or the weight of the foetus was not more than 5½ lbs. Of the 375 still-births 327 were certified by doctors, 43 by mid-wives and 5 by coroners. Post-mortem examinations were held in 14 cases. Abstract 10 shows still-births by cause, sex and period of gestation. The percentage of still-births which occurred in hospitals in 1975 was 97.3 compared with 99.5 per cent. in 1974.

Congenital malformations caused 92 still-births (i.e. 24.5 per cent. of the total). This group was also the main cause in 1974 when the corresponding figures were 114 and 30.5 respectively.

**Illegitimate births.** The number of illegitimate births was 1,338. This was 42 more than in 1974. The proportion to total live births (5.12 per cent.) was 0.57 above that for the previous year. In England and Wales, Scotland and the Irish Republic, the illegitimate births as percentages of the total live births in the year 1975 were (provisionally) 9.1, 9.3 and 3.7 respectively. Table F3 shows illegitimate live births by age of mother and reveals that illegitimacy is highest among women aged under 20.

TABLE F2. *Northern Ireland: Illegitimate live births by District Council Area, 1974-1975.*

## DEATHS

**Number and rate** The number of deaths recorded during the year 1975 and the death rate per 1,000 of the population were 16,511 and 10.7 respectively. The comparable figures for 1974 were 17,327 and 11.2.

The monthly incidence of deaths was as follows:

January .	1,612	April .	1,717	July .	1,270	October .	1,409
February .	1,400	May .	1,376	August .	1,098	November .	1,230
March .	1,357	June .	1,331	September .	1,226	December .	1,485
Qtrs.: 1st .	4,369	2nd .	4,424	3rd .	3,594	4th .	4,124

Of the total deaths 8,664 were of males and 7,847 were of females, the equivalent annual death rates being 11.4 and 10.1 per 1,000 of the male and female estimated populations, respectively. The corresponding rates for 1974 were 12.0 and 10.4.

According to the ages stated to registrars, 617 (3.7 per cent.) of the total deaths were of children under 5 years of age and 11,421 (69.2 per cent.) were of persons aged 65 and upwards. There were 166 deaths of persons (51 males and 115 females) aged 95 and upwards and this number included 1 male and 3 females at 100, 1 female at 101, 2 females at 102 and 1 female at 103.

Table G gives a partial analysis of deaths by age for each sex and the percentage of the total deaths in each group.

TABLE G. *Northern Ireland: Deaths by sex and certain age-groups and as percentage of total deaths, 1975.*

		Total	Under 1 year	1-14 years	15-44 years	45-64 years	65 years and over

**Deaths in hospitals** The number of deaths occurring in hospitals in 1975 is shown in Table J. Of the deaths registered in 1975, 56.4 per cent. took place in N.H.S. hospitals (2.7 per cent. in mental hospitals).

TABLE J. Northern Ireland: Deaths in hospitals, 1974-1975.

	1974	1975
Number of deaths in:		
N.H.S. Psychiatric Hospitals . . .	446	424
N.H.S. other Hospitals . . .	9,442	8,892
Non-N.H.S. hospitals & institutions for old and disabled . . .	261	354
Elsewhere . . .	7,178	6,841
Total deaths . . .	17,327	16,511
Percentage of deaths in N.H.S. hospitals . . .	57·1	56·4

**Cause of death** Where more than one cause of death is reported the death is classified to the underlying cause, i.e. the starting point in the sequence of events leading to death. See General Notes on page 1.

**Proportion of deaths from principal causes.** Heart diseases continued to bear by far the greatest proportion of the total deaths; other diseases having a high proportion were cancer, cerebrovascular disease (mainly cerebral thrombosis and cerebral haemorrhage) and respiratory diseases.

At ages under one year congenital malformations, premature birth, and pneumonia were the principal causes of death.

Between the ages of one and ten the highest proportions were caused by accidents, congenital malformations, cancer, Hodgkin's disease and leukaemia and pneumonia.

Between the ages of ten and twenty-four, accidents caused by far the largest proportion of deaths. The proportions from cancer, congenital malformations and Hodgkin's disease and leukaemia were also high.

Between the ages of twenty-five and forty-four the principal causes were cancer, heart diseases, accidents, suicide and cerebrovascular disease.

From age forty-five the pattern was heart diseases followed by cancer, cerebrovascular disease and respiratory diseases.

Table K shows, for each of the principal causes, the numbers of deaths and the death rates for each year since 1972.

**Deaths from the principal epidemic diseases.** A total of 42 deaths (0.03 per 1,000 population) fell within this group. Of these, 30 were caused by influenza, 8 by diarrhoeal diseases of children under 2 years of age, 3 by measles and 1 by acute poliomyelitis. No deaths resulted from the other diseases comprising this group, viz., diphtheria, smallpox, typhus, typhoid fever, scarlet fever, paratyphoid fever and whooping cough.

The number of deaths from the principal epidemic diseases in 1974 was 102 and the relative rate was 0.06.

The notifications of certain infectious diseases for each administrative area in Northern Ireland for the year 1975 are shown in Abstract 31, and the diseases named are those laid down by regulations (issued by the Department of Health and Social Services) as compulsorily notifiable throughout Northern Ireland.

**Influenza.** There were 30 deaths from influenza in 1975 as against a total of 87 in 1974. The relative rates per 1,000 of the population were 0.02 (1975) and 0.06 (1974).

**Tuberculosis.** Deaths from this cause numbered 39 compared with 56 in 1974. The rate of 0.02 per 1,000 population is 0.02 below that for 1974. Further details of comparable figures over the past years may be seen in Table L.

The tuberculosis death rates (provisional) for England and Wales, Scotland and the Irish Republic in 1975 were 0.03, 0.04 and 0.05 respectively. More detailed information about deaths from tuberculosis is given in Abstracts 12 and 17.

**DIAGRAM 3. Death rates (standardised) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1952–1975**

1975	20	0.03	19	0.02	39	0.02

Cancer\* The number of deaths from cancer in Northern Ireland during 1975 was 2,913 giving a death rate of 1.89 per 1,000 of the population which is 0.09 above the rate for 1974.

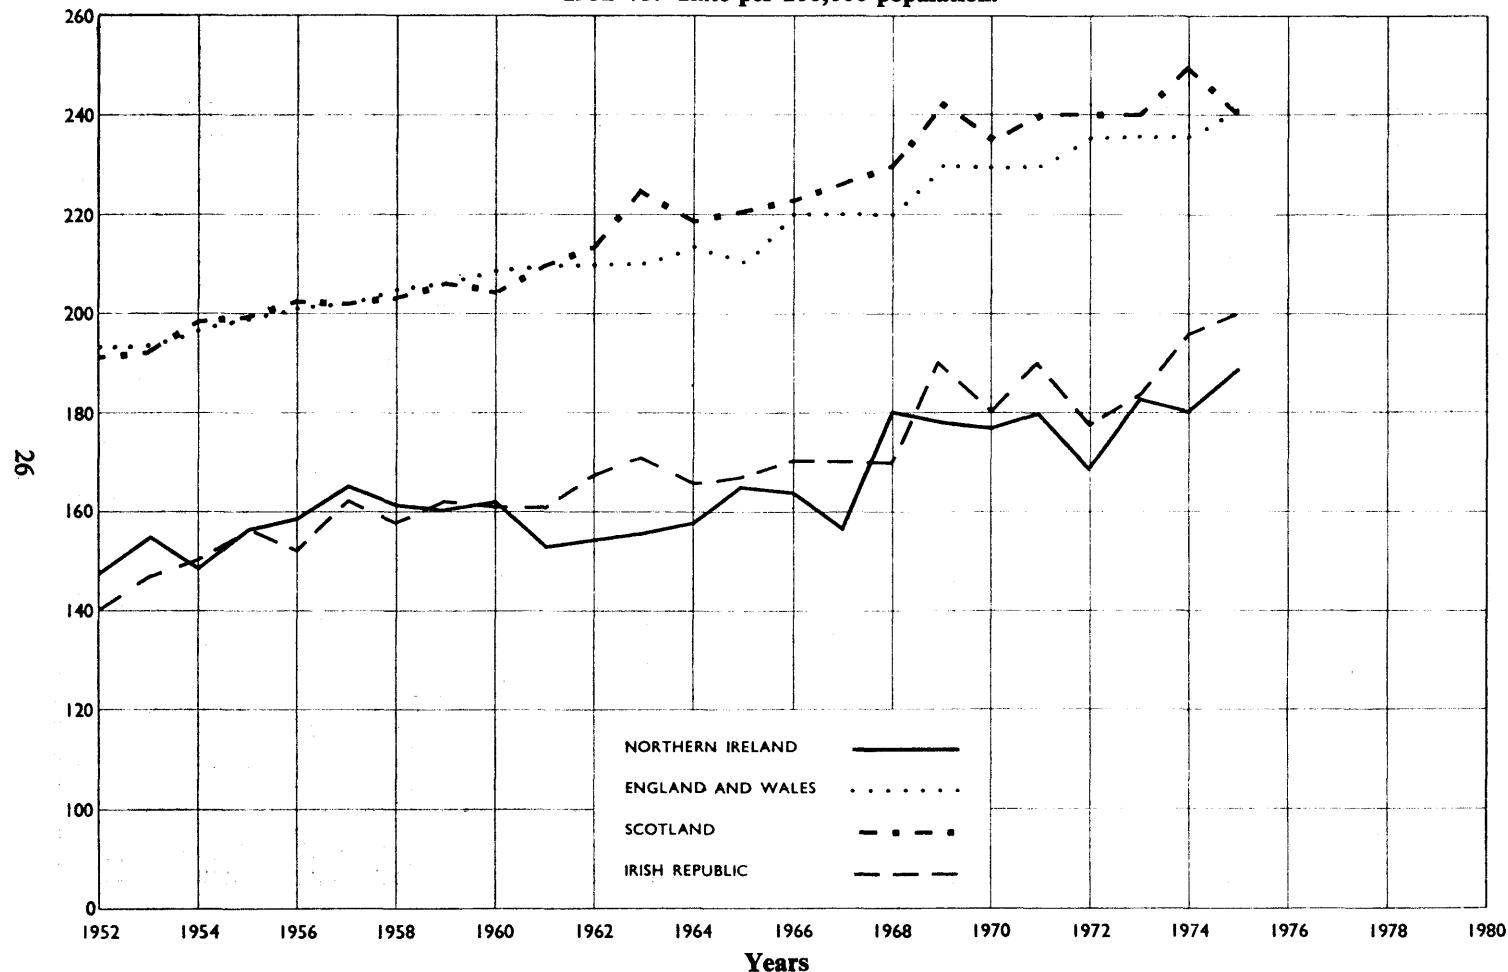

The death rates from cancer and tuberculosis were roughly the same in 1931 (i.e. 1.26 for cancer and 1.23 for tuberculosis). Since then the cancer rate has increased by 50.10 per cent. and the tuberculosis rate has decreased by 98.4 per cent.

\* See definition on page 1.

**DIAGRAM 4. Death rates (crude) from cancer in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1952-75. Rate per 100,000 population.**

As will be seen from Abstract 12 the most frequent sites of fatal cancer among males during the year were bronchus and lungs, 488; stomach, 171; intestines, 136; prostate, 124; pancreas 86 and rectum, 59. Among females the most frequent sites were breast, 258; intestines, 198; stomach, 156; bronchus and lungs, 135; ovary, fallopian tube and broad ligament 75, pancreas 66 and rectum 61.

For many years cancer of the stomach proved to be the most frequent site of fatal cancer for both sexes and it remained so among females up to 1961 when it took second place to cancer of the breast. Since 1954 however, cancer of the lung has been more prevalent among males. The number of male deaths from this cause increased each year since 1945, with the exception of eight years in each of which there was a slight decrease compared with the year immediately preceding.

Table M1 shows the numbers and rates of lung cancer deaths by sex for the past ten years. Abstract 12 gives particulars regarding the cancer sites by sex and age-groups and Abstracts 11, 17 and 21 give details of cancer incidence in administrative areas.

TABLE M1. *Northern Ireland: Deaths and death rates from lung cancer, 1966–1975.*

YEAR	Number			Rate per 100,000 population		
	Males	Females	Persons	Males	Females	Persons
1966	374	73	447	52	10	30
1967	393	81	474	54	11	32
1968	434	91	525	59	12	35
1969	442	102	544	60	13	36
1970	435	87	522	58	11	34
1971	479	101	580	63	13	38
1972	431	111	542	56	14	35
1973	498	113	611	65	14	39
1974	475	105	580	62	13	37
1975	488	135	623	64	17	40

**Cerebral haemorrhage, apoplexy, etc.** The deaths assigned to this group (described as "cerebrovascular disease") numbered 2,368 giving a rate of 1.54 per 1,000 of the population. This rate is 0.06 below the rate for 1974, and is 0.08 below the average rate for the period 1970–1974. The rate per 1,000 of the male population was 1.26 whilst the female rate was 1.81. Details of deaths in this group by ages are shown in Abstract 12.

**Heart diseases.** The deaths from the various forms of heart disease during the year numbered 5,848, the rate per 1,000 of the population being 3.80 which is 0.03 below that for the previous year and is 0.05 below the average for the five years 1970–1974.

TABLE N. *Northern Ireland: Deaths and death rates from heart disease (all forms), 1926, 1937, 1951, 1961 and 1966–1975.*

YEAR	MALES		FEMALES		PERSONS	
	Number of deaths	Rate per 1,000 of the estimated male population	Number of deaths	Rate per 1,000 of the estimated female population	Number of deaths	Rate per 1,000 of the estimated population
1926	1,241	2.04	1,437	2.22	2,678	2.14
1937	1,885	3.02	1,815	2.76	3,700	2.89
1951	2,785	4.16	2,722	3.87	5,507	4.01
1961	3,199	4.60	2,708	3.70	5,907	4.14
1966	3,178	4.41	2,611	3.45	5,789	3.92
1967	2,971	4.09	2,488	3.26	5,459	3.66
1968	3,128	4.27	2,579	3.35	5,707	3.80
1969	3,228	4.38	2,691	3.47	5,919	3.91
1970	3,240	4.35	2,551	3.27	5,791	3.80
1971	3,232	4.28	2,551	3.27	5,783	3.77
1972	3,373	4.41	2,766	3.52	6,139	3.96
1973	3,254	4.25	2,769	3.54	6,023	3.89
1974	3,381	4.41	2,550	3.26	5,931	3.83
1975	3,274	4.30	2,574	3.31	5,848	3.80

Of the total number of deaths from heart diseases, 4,709, (80.5 per cent.) were in the group known as ischaemic heart disease which includes coronary disease. Chronic rheumatic heart disease accounted for 135 (2.3 per cent.), hypertensive heart disease for 131 (2.2 per cent.) and other forms of heart disease for 873 (15.0 per cent.) of all deaths from heart diseases.

I.C.D. numbers 393–398, 402, 404, 410–414 and 420–429 as shown in Abstract 12 give the age and sex breakdown of all deaths from heart diseases.

**Bronchitis.** The deaths from bronchitis during the year numbered 572, giving a rate of 0.37 per 1,000 of the population, which is 0.14 below the rate for 1974. Bronchitis was also an important contributory factor in 423 deaths though not related to the condition taken to have initiated the sequence of events leading to death.

**Pneumonia** Deaths from pneumonia numbered 804 during the year 1975, the rate of 0.52 per 1,000 of the population being 0.21 below the rate for 1974. The average rate for the five years 1970–1974 was 0.58.

**Pregnancy and childbirth** The mortality of women during pregnancy and childbirth is classified under two headings, namely—(1) deliveries and complications of pregnancy, childbirth and the puerperium and (2) deaths with mention of pregnancy, childbirth and the puerperium but not classified as maternal. The causes of death shown in detailed list numbers 630–678 of Abstract 12 are those to which the former group were assigned.

There was 1 death from diseases of pregnancy, childbirth and the puerperal state in 1975 giving a rate of 0.04 per 1,000 births (live and still). There were 6 such deaths in 1974.

There were no deaths in which maternal conditions were coincidentally present. In 1974 there were 3 such deaths.

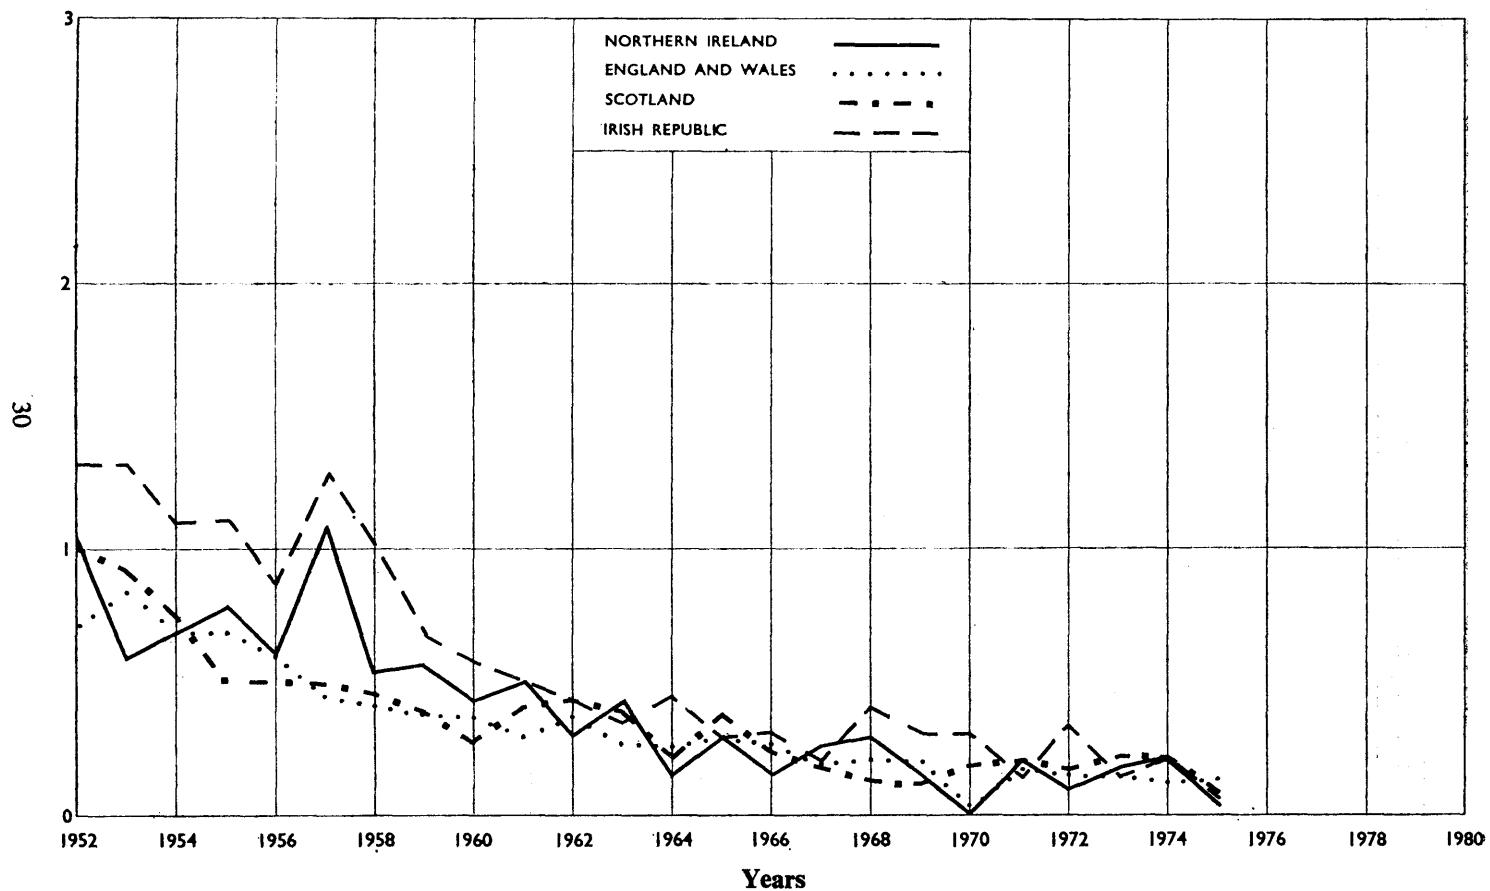

TABLE O1. *Northern Ireland: Deaths of women in pregnancy, childbirth and the puerperium 1926, 1937, 1951, 1961 and 1966–1975.*

Year	Maternal deaths		Not classed as maternal	
	No.	Rate† per 1,000 births	No.	Rate† per 1,000 births
1926	158	5·61	17	0·60
1937	127	5·00	37	1·46
1951	31	1·09	8	0·28

1969	5	0·15	4	0·12
1970	.	.	6	0·18
1971	6	0·19	6	0·19
1972	3	0·10	.	.
1973	5	0·17	4	0·13
1974	6	0·22	3	0·11
1975	1	0·04	.	.

† Rate per 1,000 live births for years 1926–60. The rates from 1961 are per 1,000 total births (live and still).

**Infant mortality** Deaths of infants under 1 year of age numbered 534 or 20 per 1,000 live births registered. This rate is one below that for the previous year. Of these deaths, 293 were of males and 241 of females, the former number being equivalent to 22 per 1,000 live births of males and the latter to 19 per 1,000 live births of females. The corresponding rates for 1974 were 21 and 21 respectively. In 1975 the provisional infant mortality rate in England and Wales was 16, in Scotland 17 and in the Irish Republic 18. Comparative figures for previous years are shown in Table B on page 11.

**DIAGRAM 5. Maternal mortality rates (crude) in Northern Ireland, England and Wales, Scotland and the Irish Republic, 1952-75. Rate per 1,000 live births.**

**Neonatal mortality.** Deaths of infants aged under four weeks numbered 344 representing a rate of 13 per 1,000 live births. This is equivalent to 64.4 per cent. of all deaths of children under 1 year of age. The corresponding figures for 1974 were 375, 14 and 65.6 per cent. respectively. The 1975 rates for England and Wales, Scotland and the Irish Republic were (provisionally) 11, 12 and 12 respectively.

Abstract 11 gives the number of infant deaths, together with the number of births, for each of the 26 District Council areas in Northern Ireland.

Abstract 22 gives the number of deaths of children under 1 year of age for Northern Ireland by District Council areas for the year 1975; the numbers are given by sex and age groups.

The number of infant deaths for 1975 by age and cause of death are given in Abstract 24, together with the infant mortality rates by cause.

**Mortality among illegitimate children.** Deaths of illegitimate children under 1 year of age numbered 19 in 1975, which is equivalent to a rate of 14.02 per 1,000 of the illegitimate live births registered and is 0.3 above the rate for the previous year. The corresponding rates for legitimate children in 1974 and 1975 were 21.2 and 20.8 per 1,000 legitimate live births.

Deaths of illegitimate infants aged under four weeks (illegitimate neonatal mortality) numbered 14, representing 73.7 per cent. of the total deaths of all illegitimate children under 1 year of age. The corresponding figures for 1974 were 15 and 83.3 per cent. respectively.

Abstract 23 shows the number of deaths of illegitimate children under 1 year of age for Northern Ireland by District Council areas; the sex and age distribution is also shown.

Abstract 24 gives the number of deaths and mortality rates of illegitimate children under 1 year of age by cause.

**Violent deaths.** Deaths from causes other than natural causes are termed violent deaths and are classified according to both the external circumstances giving rise to injury, expressed as the "external cause of injury" and to the nature of the injury sustained, designated as the "nature of injury" (see Abstract 19).

The number of deaths ascribed to violence during the year was 1,092 (715 males and 377 females) which is 36 fewer than the number registered in 1974, and is equivalent to 6.6 per cent. of the total deaths registered.

TABLE S. Northern Ireland: Violent deaths by external cause of injury  
1971-1975.

CAUSES OF DEATH	1971	1972	1973	1974	1975
<i>Accidental Causes:</i>

TOTAL DEATHS FROM VIOLENCE . . . . .	739	1,033	1,228	1,128	1,092

Of the 1,092 deaths 312 were attributed to transport accidents (E800-E845) (excluding drowning from watercraft (E830, E832)). Road vehicle accidents (E810-E827) accounted for 307 deaths as compared with 340 in 1974. Table S1 affords comparison of numbers of deaths from road vehicle accidents in 1975 with those for the four preceding years by sex and certain age-groups whilst Table S2 shows the various categories of persons killed in motor vehicle accidents and details of other transport accidents.

TABLE S1. Northern Ireland: Deaths from road vehicle accidents (E810-E827) 1971-1975.

	All ages	Under 5 years	5-14	15-34	35-54	55-74	75 and over
MALES . . . . .							
1971	210	10	25	76	36	40	23
1972	255	11	27	87	41	58	31
1973	291	13	30	113	56	59	20
1974	266	7	29	103	44	52	31
1975	226	7	22	95	38	45	19
FEMALES . . . . .							
1971	83	8	5	23	11	24	12
1972	96	3	10	31	22	20	10
1973	99	12	12	22	15	24	14
1974	74	2	3	16	8	26	19
1975	81	7	11	20	10	21	12

Other accidents accounted for 456 deaths and of these deaths 249 were ascribed to falls, 39 to drowning, 69 to poisons or poisonous gases, 37 to fire and heat, 5 to mechanical suffocation, 7 to machinery and 50 to other accidental causes. A detailed break-down showing non-transport accidents by sex and age-groups is given in Abstract 20.

Deaths from accidents recorded as occurring in the home numbered 245 compared with 239 in 1974 and 218 in 1973. Most accidents in the home are occasioned by falls. It should be noted that in 1975 there were 45 deaths from falls where the place of the accident was unspecified compared with 26 in 1974. Fuller details of these and other accidents (apart from transport accidents) are given in Abstract 20.

During the year there were 56 cases of suicide (36 males and 20 females) compared with 62 (39 males and 23 females) in 1974, 175 deaths from homicide and 50 from war operations. In addition there were 42 deaths in which it was not possible to determine whether the injuries were accidentally or purposely inflicted.

TABLE S2. *Deaths from transport accidents, by sex and age 1975.*

Deaths in which violence was stated to be the sequel to some other cause are correlated in Table S3. Alcoholism was, as usual, the greatest single factor in this group causing the deaths of 7 people. This figure, however, does not include deaths caused by other people who were in a state of intoxication.

## CERTIFICATION OF DEATHS

All deaths must be certified by either a medical practitioner or a coroner and Table T shows the type of certification during the year. The circumstances of 2,858 deaths (17.3 per cent. of all deaths) were considered by the coroners and in 898 of these cases inquests were held. In 1,022 cases the deaths were certified by coroners after post-mortem examinations had proved inquests to be unnecessary.

Of the 13,653 deaths certified by medical practitioners the deceased persons were not seen after death by the practitioners in 2,300 cases.

TABLE T. *Northern Ireland: Deaths by certification, 1975.*

AREA	Total deaths	Certified by medical practitioners	Certified by coroners

## LIFE TABLE

The expectation of life is the average number of years which would be lived by a group of people of given age who are continuously subject to given mortality rates, usually those of a selected year or years.

The abridged life table shown as Table U is based on the mortality rates for 1973–1975 and shows the expectation of life at various age-points together with the number of persons who would survive to given age  $x$  out of 10,000 born, if subjected throughout their lives to this mortality experience.

Thus 98 per cent. of males and females would survive the first year of life; 96 per cent. of males and 97 per cent. of females would reach the age of 20; 77 per cent. of males and 86 per cent. of females would reach the age of 60 and the men could then expect an average future lifetime of 15 years compared with 19 years for women.

Based on the mortality experience of 1973–1975 the expectation of life at birth was 67.2 years for males and 73.5 years for females; at age one year the expectations were 67.7 years for males and 74.0 years for females. Table U1 affords comparison of these figures with those for certain preceding years.

TABLE U. Northern Ireland: Abridged Life Table 1973–1975.

Age $x$	Males		Females	
	$lx$	$ex$	$lx$	$ex$
0	10,000	67·24	10,000	73·55
1	9,780	67·75	9,803	74·02
2	9,766	66·84	9,790	73·11
3	9,756	65·91	9,778	72·20
4	9,749	64·96	9,774	71·23
5	9,743	64·00	9,770	70·26
10	9,717	59·16	9,756	65·36
15	9,691	54·31	9,745	60·43
20	9,613	49·73	9,720	55·58
25	9,513	45·23	9,696	50·71
30	9,422	40·64	9,672	45·83
35	9,323	36·05	9,629	41·02
40	9,306	31·11	9,562	36·29
45	9,162	26·56	9,457	31·67
50	8,865	22·37	9,283	27·21
55	8,393	18·48	9,028	22·91
60	7,695	14·93	8,622	18·87
65	6,688	11·81	8,009	15·13
70	5,345	9·15	7,150	11·64
75	3,801	6·85	5,865	8·65
80	2,230	4·92	4,157	6·18
85	944	3·21	2,257	4·28

This abridged life table is constructed from the estimated population and the total deaths registered during the years 1973–1975.

The column headed  $lx$  shows the numbers who would survive to exact age  $lx$  out of 10,000 born who were subject throughout their lives to the death probabilities indicated by the monthly records for the years 1973–1975.

Column  $ex$  gives the "expectation of life"—that is the average future lifetime which would be lived by a person aged exactly  $x$  if subject to those death probabilities.

TABLE U1. Northern Ireland: Expectation of life at birth, at one year of age and at 65 years of age for certain periods between 1890 and 1975.

Period	Expectation of life					
	At birth		At age one year		At age 65 years	
	Male	Female	Male	Female	Male	Female
1890–92	46·3	45·7	—	—	10·6	10·6

1971–73	67·2	73·6	67·8	74·1	11·9	15·2
1972–74	65·0	73·6	67·3	74·1	11·8	15·7
1973–75	67·2	73·5	67·7	74·0	11·8	15·1

The Life Tables for 1901, 1926, 1951 and 1961 are included in Section I of the Ulster Year Book, 1975, obtainable from Her Majesty's Stationery Office price £2.

## CONGENITAL MALFORMATIONS

This section relates to children born (live or still) with any apparent deformity. The information about these congenital malformations is furnished to the Department of Health and Social Services by the health and social services boards and is classified according to the residence of the parents and not to the place of birth.

During the year 654 children were born with congenital malformations compared with 745 in 1974 and 725 in 1973. The Northern Ireland rate for 1975 was 24.7 per 1,000 births (live and still) compared with 26.6 for 1974.

**TABLE V. Northern Ireland: Number of congenitally malformed children by Health and Social Services District and month of birth, 1975.**

NORTHERN IRELAND	517	517	102	204	26	78	6	24	3	17	654	840

Details about the nature of the malformations will be found in Abstracts 26, 27, 29 and 30 and data about the mother's age and the number of other children born to her are in Abstract 28.

## MIGRATION

The population figures ascertained at each census enable the net migration during the inter-censal periods to be calculated. Table W shows that during the period of approximately four and a half years between the censuses taken on the 9th October, 1966 and the 25th April, 1971 there was a net outward movement of 24,838 persons to all countries including other parts of the British Isles.

TABLE W. Northern Ireland: Net migration during inter-censal period 1966-1971.

	Males	Females	Total
Population, Census of 1966 . . . . .	723,884	760,891	1,484,775
Births, 1966-1971 . . . . .	76,518	72,188	148,706
Deaths, 1966-1971 . . . . .	38,102	34,476	72,578
Natural increase*	38,416	37,712	76,128
Population 1966 plus natural increase . . . . .	762,300	798,603	1,560,903
Population, Census of 1971 . . . . .	754,676	781,389	1,536,065
Net movement outwards . . . . .	7,624	17,214	24,838

\*The excess of births over deaths.

Table W1 shows the natural increase in the population for each inter-censal period since birth and death registration commenced in 1864, together with the net movement outwards and the percentage of the increase lost by migration.

TABLE W1. Northern Ireland: Inter-censal variations in population, 1871-1971.

Inter-censal period	Population at beginning of period	Natural increase*	Net movement outwards	Percentage of increase lost by migration
1871-1881	1,359,190	104,350	158,724	152
1881-1891	1,304,816	71,910	140,670	196
1891-1901	1,236,056	68,634	67,738	99
1901-1911	1,236,952	78,996	65,417	83
1911-1926	1,250,531	113,603	107,573†	95
1926-1937	1,256,561	80,835	57,651	71
1937-1951	1,279,745	158,443	67,267†	42
1951-1961	1,370,921	146,349	92,228	63
1961-1966	1,425,042	97,434	37,701	39
1966-1971	1,484,775	76,128	24,838	33

\*Excess of births over deaths.

†Including deaths in H.M. Forces and Mercantile Marine which occurred outside Northern Ireland.

It is estimated that during the year ended 30 June, 1975 the net outward migration amounted to 16,000 persons.

## ADMINISTRATION

**Introductory:** The administrative functions of the Registrar General comprise the registration of births (live and still), deaths, marriages and adoptions, and the provision or supervision of machinery for dealing with preliminaries to marriages other than those according to the rites of the Roman Catholic Church.

**Buildings licensed or registered for marriages:** The number of places of worship (other than those belonging to the Roman Catholic Church) in which marriages could be solemnised, as at 31st December in each of the years 1972, 1973, 1974 and 1975 are as follows:

<i>Denomination</i>	<b>1972</b>	<b>1973</b>	<b>1974</b>	<b>1975</b>
Church of Ireland . . .	414	415	414	416
Presbyterian . . .	516	515	516	516
Methodist . . .	163	161	160	159
Others . . .	346	353	369	382
<b>TOTAL . . .</b>	<b>1,439</b>	<b>1,444</b>	<b>1,459</b>	<b>1,473</b>

**Legitimacy Acts (N.I.), 1928 to 1961:** Under these Acts an illegitimate child whose parents have married is, subject to certain conditions, legitimised, and the Registrar General is empowered to authorise the registration or re-registration of the birth. During 1975 the registration or re-registration of the births of 236 children was authorised, the comparative figures for 1974 and 1973 being 211 and 130 respectively.

**Adoption Act (N.I.), 1967 and Adoption (Hague Convention) Act (N.I.) 1969**  
Registers of children adopted under the provisions of the above Acts and of the previous Adoption Acts of 1929 and 1950 are kept in the General Register Office, to which the adoption orders made by the Courts are transmitted. A certified copy of an entry in the Adopted Children Register is evidence of adoption, and is also evidence of the date of birth of the adopted child. The children whose adoptions were recorded in the Adopted Children Registers during 1975 numbered 369 whilst the figures for 1974 and 1973 were 332 and 407 respectively.

**Searches and certificates:** The original records of live births, deaths and marriages registered in Northern Ireland were in the custody of local registration officers until 1 October 1973\*, since which date the original records of births and deaths have been centralised in the General Register Office at Oxford House 49/55 Chichester Street Belfast; marriage original records are held by the local Registrars. The following statement shows the activity during 1975 by way of searches and issue of certificates from the General Register Office:—

**Verifications.** Requests for the verification of particulars of events registered are received from Government Departments in connection with claims for pensions, etc. During the year the number of cases dealt with was 15,799.

## METEOROLOGY

The following synopsis of weather experienced over Northern Ireland during 1975 is furnished by the Director-General, Meteorological Office, through the Climatological Services and Public Records Office, Tyrone House, Ormeau Avenue, Belfast.

Where the term average is used it refers to the 35 year period 1916 to 1950 with respect to rainfall and to the World Meteorological Organisations Standard 30 year period 1941 to 1970 for temperature and rainfall.

Tables compiled and attached give data in respect of certain stations; columns 2 and 3 give the highest and lowest air temperatures recorded on any date during the month indicated; in columns 4 and 5 the mean daily maximum and minimum air temperatures are given. There is also a table giving similar data related to Northern Ireland as a whole based on a selection of stations appropriate to the Meteorological element and not necessarily those whose data are published in the preceding pages. This information smoothes out the variations experienced in different parts of the province and therefore gives a general picture. The "highest" and "lowest" however refer to values from around 60 stations recording temperatures in Northern Ireland and are not restricted to the 7 stations data given in the preceding pages.

Temperature is given in degrees centigrade: to convert actual values to fahrenheit, multiply by 9 divide by 5 and add 32 degrees. To convert "difference from average" temperatures in the centigrade scale to fahrenheit 1.0 degrees centigrade=1.8 degrees fahrenheit.

**January** was wet and mild with average sunshine; rainfall was 139 per cent. sunshine 100 per cent. and temperatures 2.1 degrees centigrade above normal. It was the wettest January month since 1934 in some areas and the mildest since 1944. Snow/sleet fell on 5 occasions and lay to depths of 2.0 to 5.0 centimetres on 12th/13th and 22nd/23rd. The month was windy with 2 occurrences of gales.

**February** was dry, mild and sunny. It was the driest February since 1965 and the sunniest since 1970. The frequency of snow/sleet was well below normal. Rainfall was 42 per cent. sunshine 111 per cent. and temperatures were 1.2 degrees centigrade above average. There were no gales.

**March** was cool sunny and comparatively dry. It was the sunniest March in some areas since 1955 and in parts of the Ards Peninsula the sunniest this century. Snow fell around the end of the month and depths of 8.0 centimetres were noted over higher ground; sunshine was 116 per cent, rainfall 88 per cent. and temperatures 0.9 degrees centigrade below average. There were no gales.

**April** sunshine and rainfall were just below average with values of 97 per cent. and 91 per cent. respectively. Temperatures were 0.2 degrees centigrade above normal. Armagh Observatory recorded a daily maximum air temperature of 22.7 degrees centigrade on 25th and it was the warmest April day there since climatological records began in 1840. In contrast snow/sleet fell on 5 occasions. There were no gales.

**May** was very dry and sunny. It was the driest May month in most areas this century and the sunniest since 1946; rainfall was 30 per cent. at Aldergrove, Co. Antrim—only 14 per cent. of average fell. There were no occurrences of gales, fog, thunder or hail.

**June** was dry and sunny. Rainfall was well below normal everywhere. It was the driest June since 1942 in most places. No rain fell between 6th and 10th and 19th to 30th. Sunshine was well above normal with a value of 131 per cent. Rainfall was 43 per cent. and temperatures 0.3 degrees centigrade above average.

**July** was dry, warm and sunny. It was the warmest July month for 20 years. There was a well above average thundery frequency and in contrast, Tandragee in Co. Armagh had its driest July on record. Rainfall was 76 per cent., sunshine 109 per cent. and temperatures were 1.4 degrees centigrade above normal. Water shortages in some areas were acute notably those served by the Spelga Catchment Reservoir.

**August** was dry, warm and sunny. It was the driest August month since 1959 and the warmest since 1955. Rainfall was 53 per cent. of average, sunshine 110 per cent. and temperatures 2.0 degrees centigrade above average. There was a well above normal thundery frequency. Water shortages continued to be acute in some areas.

**September** was cool and wet, with a good deal of sunshine. Rainfall was 140 per cent. of average. Temperatures were 0.7 degrees centigrade below average whilst sunshine was 103 per cent. A 48 hour rainfall total of 100 millimetres (approximately 4 inches) was recorded at Silent Valley in the Mourne Mountains on 16th and 17th.

**October** was dry and comparatively mild especially during the first and last weeks of the month; the 10th–20th was cool. There was a gale on the 4th. Rainfall was 82 per cent. of average sunshine 89 per cent. and temperatures 0.3 degrees centigrade above average.

**November** was dry. It was the driest November since 1957 in parts of Counties Down and Armagh. Rainfall was 77 per cent. of average sunshine, 100 per cent. and temperatures were average. There were 2 occurrences of gale.

**December** was very dry, mild and dull. Rainfall was only 33 per cent. of average. Some areas had their driest December this century, notably at Silent Valley in the Mourne Mountains where a monthly total of 24.4 millimetres was recorded. It was the dullest December in places since 1956 with values of 66 per cent. of average. There were 2 occurrences of gale; snow fell on 4 occasions and lay to depths of around 5.0 centimetres in places on 13th.

The year 1975 was very dry and the driest since 1954 generally—the driest since 1933 in some places and the driest this century in a few areas of Counties Down and Armagh. Over Northern Ireland as a whole the value was 76 per cent. (825 millimetres compared to the average of 1,081 millimetres).

It was also one of the sunniest years on record with a value of 112 per cent., only 1933, 1954 and 1959 were sunnier. It was also one of the warmest years this century with temperatures 0.5 degrees centigrade above average. 1959 however was warmer.

Features of the year as a whole were the sunniness and dryness of the 12 month period, the mild January/February with below average frequencies of snow/sleet, the very dry period during May–August, and the above normal thundery tendencies in July and August. The acute water shortages during the summer in many areas due to low rainfall and high evaporation rates and the exceptionally dry December were also noteworthy. The summer months were the driest, warmest and sunniest on record in some areas of the province giving rise to concern for crops and grass yields.

TABLE X. Northern Ireland: Air temperature, rainfall and sunshine recorded at seven stations during the year 1975 and general values for the Province as a whole (final values\*).

**ABSTRACT 17. Abbreviated list numbers and equivalent detailed list numbers and causes of death (8th Revision I.C.D.).**

Detailed List	Abbreviated List 'B'	CAUSE OF DEATH
000	1	Cholera
001	2	Typhoid fever
004, 006	3	Bacillary dysentery and amoebiasis
008, 009	4	Enteritis and other diarrhoeal diseases
010-012	5	Tuberculosis of respiratory system
013-019	6	Other tuberculosis, including late effects
020	7	Plague
032	8	Diphtheria
033	9	Whooping cough
034	10	Streptococcal sore throat and scarlet fever
036	11	Meningococcal infection
040-043	12	Acute poliomyelitis
050	13	Smallpox
055	14	Measles
080-083	15	Typhus and other rickettsioses
084	16	Malaria
090-097	17	Syphilis and its sequelae
Rem. 000-136	18	All other infective and parasitic diseases
151	19A	Cancer of:-
152-154	19B	stomach
162	19C	intestines and rectum
174	19D	trachea, bronchus and lung
180-189	19E	breast
Rem. 140-200,	19F	genito-urinary organs
202, 203, 208, 209		other sites
201, 204-207	19G	Hodgkin's disease and leukaemia
210-239	20	Benign neoplasms and neoplasms of unspecified nature
250	21	Diabetes mellitus
260-269	22	Avitaminoses and other nutritional deficiency
280-285	23	Anaemias
320	24	Meningitis
390-392	25	Active rheumatic fever
393-398	26	Chronic rheumatic heart disease
402, 404	27A	Hypertensive heart disease
400, 401, 403	27B	Other hypertensive disease
Pt. of 410-414	28A	Ischaemic heart disease with hypertension
Rem. of 410-414	28B	Ischaemic heart disease without hypertension
420-429	29	Other forms of heart disease
Pt. of 430-438	30A	Cerebrovascular disease with hypertension (benign)
Rem. of 430-438	30B	Cerebrovascular disease without hypertension
440-458	46A	Other diseases of circulatory system
470-474	31	Influenza
480-486	32	Pneumonia
490-493	33	Bronchitis, emphysema and asthma
Rem. 460-519	46B	Other diseases of respiratory system
531-533	34	Peptic ulcer
540-543	35	Appendicitis
550-553, 560	36	Intestinal obstruction and hernia
571	37	Cirrhosis of liver
Rem. 520-577	46C	Other diseases of digestive system
580-584	38	Nephritis and nephrosis
600	39	Hyperplasia of prostate
640-645	40	Abortion
630-639, 650-678	41	Other complications of pregnancy, childbirth and puerperium
740-759	42	Congenital anomalies
764-768, 772, 776	43	Birth injury, difficult labour and other anoxic and hypoxic conditions
760-763, 769-771,		Other causes of perinatal mortality
773-775, 777-779,	44	
780-796	45	Symptoms and ill-defined conditions
Rem. 240-738	46D	All other diseases
E810-E823	47	Motor vehicle accidents
E800-E807,		
E825-E949	48	All other accidents
E950-E959	49	Suicide and self-inflicted injuries
E960-E999	50	All other external causes
