Notes:

- 1 Cohabiting couples includes same sex couples.
- 2 The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification.
- 3 A person not living in a couple can be classified married (or re-married) but have no spouse or partner resident in the household.

Notes:

- 1 The family reference person may not be the oldest person in a couple, as economic activity is given priority over age.
- 2 Cohabiting couples includes same sex couples.
- 3 A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s).
- 4 A lone parent can be classified as married (or re-married) if they denote their marital status as married (or re-married), but have no spouse or partner identified in the relationship matrix.
- 5 A family consists of a couple (married or cohabiting) with or without children, or a lone parent and their children. It also includes a married or cohabiting couple with their grandchildren or a lone grandparent with his or her grandchildren, if there is no parent in the intervening generation in the household. A family will also include step-children when their parent is part of the couple.

Notes:

- The family reference person may not be the oldest person in a couple, as economic activity is given priority over age.
- A family 'without step-child(ren)' is a family where all children are children of both members of the married or cohabiting couple. A family 'with step-child(ren)' is one where there is a child (or children) who belong to only one member of the married or cohabiting couple. Where a couple family contains no children, the family is recorded under 'without step-child(ren)'.
A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s).
- Families with no children are included under 'no dependent children'.
- A family consists of a couple (married or cohabiting) with or without children, or a lone parent and their children. It also includes a married or cohabiting couple with their grandchildren or a lone grandparent with his or her grandchildren, if there is no parent in the intervening generation in the household. A family will also include step-children when their parent is part of the couple.

Notes:

- 1 The family reference person may not be the oldest person in a couple, as economic activity is given priority over age.
- 2 A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s).
- 3 A 'concealed family' is one that does not contain the Household Reference Person. This will occur where there is more than one family living in a household. The members of these families may or may not be related.
- 4 A family consists of a couple (married or cohabiting) with or without children, or a lone parent and their children. It also includes a married or cohabiting couple with their grandchildren or a lone grandparent with his or her grandchildren, if there is no parent in the intervening generation in the household. A family will also include step-children when their parent is part of the couple.

Notes:

- 1 Cohabiting couples includes same sex couples.
- 2 The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification.
- 3 A person not living in a couple can be classified married (or re-married) but have no spouse or partner resident in the household.

- 1 A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s).
- 2 A family consists of a couple (married or cohabiting) with or without children, or a lone parent and their children. It also includes a married or cohabiting couple with their grandchildren or a lone grandparent with his or her grandchildren, if there is no parent in the intervening generation in the household. A family will also include step-children when their parent is part of the couple.
- 3 Pensionable age at the time of the Census (29 April 2001) was 65 for men and 60 for women

Notes:

- 1 A dependent child is a person in a household aged 0 to 15 (whether or not in a family) or a person aged 16 to 18 who is a full-time student in a family with parent(s).
- 2 A family consists of a couple (married or cohabiting) with or without children, or a lone parent and their children. It also includes a married or cohabiting couple with their grandchildren or a lone grandparent with his or her grandchildren, if there is no parent in the intervening generation in the household. A family will also include step-children when their parent is part of the couple.
- 3 Pensionable age at the time of the Census (29 April 2001) was 65 for men and 60 for women.
- 4 The term 'Catholic' includes those respondents who gave their religion as Catholic or Roman Catholic.

Notes:

- 1 Cohabiting couples includes same sex couples.
- 2 The living arrangements variable is different to marital status. It combines information from both marital status and the relationship matrix. Therefore a person living as part of a 'cohabiting couple' could in fact be married (to someone else) but will not appear as married or separated in this classification.
- 3 A person not living in a couple can be classified married (or re-married) but have no spouse or partner resident in the household.
- 4 The term 'Catholic' includes those respondents who gave their religion as Catholic or Roman Catholic.
