It would be useful to have greater access to what is currently designated, 'Specialist Product'. In particular this information would be useful for policy formation particularly in regard to Migration and whether or not there are particular issues regarding Urban/Rural migration patterns.

*Please select one item*

**31. Any other comments?**

It is important that NISRA and CSO build on their already existing work so as we are able obtain information on an all Ireland basis, this is particularly true for the future planning of services. Consideration should be given to the census being carried out every 5 years to match the work of the CSO.

## Section 6 continued: User Acceptability

**32. In 2021, Census Office are considering two alternative options for releasing data at different geographic levels. It should be noted that due to the risk of disclosure Census Office can only provide one of these. Annex 2 of our consultation document highlights the differences in the 2021 Census outputs which would be produced by each of the options detailed below. Please select which option you would prefer.**

*Please select one item*

- ☐ Census Office are considering the production of 2021 Census statistics for the administrative and statistical geographies used in both the 2001 and 2011 Censuses. This will allow comparability of census information at consistent geographies across 2001, 2011 and 2021. However, due to the risk of disclosure, 2021 Census statistics would not be made available for the new Electoral Wards.
- ☒ An alternative option is the production of results for a new small area statistical geography. This would allow the production of 2021 Census results for a new set of statistical geographies consistent with the 2015 revision of local government boundaries. This new geography would nest within the new Electoral Wards. However, 2021 Census data would therefore not be made available for the old local government boundaries or electoral wards, therefore users would be unable to compare 2001-2011-2021 census results for these geographies.
