NISRA: Trusted statistics & research for a better society

As highlighted in its [2019-2024 corporate plan](#), the Northern Ireland Statistics and Research Agency (NISRA), which incorporates the General Register Office (GRO), is an executive agency within the Department of Finance and was established on 1 April 1996.

NISRA is the principal source of Official Statistics and social research on Northern Ireland. These statistics and research not only inform public policy but also academic and private sector research, and contribute to debate in the wider community. NISRA's services are afforded to a wide range of Government Departments and Non-Departmental Public Bodies to assist the policy process and delivery of their objectives and actions. NISRA is also responsible for conducting the decennial Census of Population.

This slide pack of key economic and labour market statistics has been sourced from the Agency's Economic and Labour Market Statistics Branch (ELMS). The pack provides a high-level statistical summary of the Northern Ireland economy and labour market and should be considered in conjunction with the detailed supporting information and commentary that can be accessed via the various links and associated sources that have been highlighted.

The pack is available from the [NISRA website](#). In the interests of continuous improvement and adding value, NISRA is keen to hear your feedback and would appreciate any comments you may have (please e-mail comments to economicstats@nisra.gov.uk).

Special Thanks

NISRA would like to extend its thanks to all those businesses and members of the general public who have responded to the various surveys that the Agency conducts.

The provision of these key Economic and Labour Market indicators would simply not be possible without your continued support and co-operation, which is very much appreciated.

In a business context, the data you provide are the raw materials that we need to produce these statistics.

The information really is vital and is actively:

- Informing the development of Government policies; and
- Guiding decision making on 'real-life' issues.

Economic Activity

Department of
Finance

An Roinn
Airgeadais

Overall economic activity in Northern Ireland has recovered from the prominent reduction in output during Q2 2020 and is currently above levels not seen since mid-2007. The UK economy has rebounded beyond its pre-pandemic level, while growth since 2006 far exceeds that in NI. Latest figures (to Q3 2024) show that Economic activity in NI has increased by 1.3% over the quarter and by 3.0% over the year.

The business services and finance sub sector accounts for around two-fifths of the wider service sector. Overall, NI services output is up 3.1% over the year and by 1.1% over the latest quarter.

Index of Services (2022=100)

	NI	UK
Change on quarter (Q3 2024 v Q2 2024):	+1.1%	+0.2%
Change on year (Q3 2024 v Q3 2023):	+3.1%	+1.6%
Annualised change (Q4 2023-Q3 2024 v Q4 2022-Q3 2023):	+2.8%	+0.8%

Source: [NISRA Index of Services](#)

*Information refers to the private sector only.

Latest figures show that **services output** is up across three of the four sub-sectors over the year to Q3 2024. The ‘Wholesale & retail trade...’ sub-sector, which accounts for 33.9% of the overall services sector has experienced the strongest annual growth and is currently 4.8% above the level seen in Q3 2023.

Index of Services: Sectoral comparison

..... Overall Index of Services (Q3 2024=106.2)

Index of Services Sector Split (based on 2022 GVA)

Source: [NISRA Index of Services](#)

The manufacturing sub-sector accounts for most of the output in the Production sector (80.2%). Prior to COVID-19, production output had been noticeably impacted by the 2007/08 recession and substantially reduced output in the food, beverages & tobacco manufacturing sub-sector in 2017. **Production output** in NI increased by 0.8% over the year.

Index of Production (2022=100)

	NI	UK
Change on quarter (Q3 2024 v Q2 2024):	+1.2%	-0.2%
Change on year (Q3 2024 v Q3 2023):	+0.8%	-1.9%
Annualised change (Q4 2023-Q3 2024 v Q4 2022-Q3 2023):	-2.0%	-1.3%

Source: [NISRA Index of Production](#)

Latest figures show that **production output** is up across half of the four sub-sectors over the year to Q3 2024. The ‘Mining and quarrying’ sub-sector experienced the strongest annual growth and is currently 2.1% above the level seen in Q3 2023.

Index of Production: Sectoral comparison

*The information on this page refers to the private sector only.

Looking specifically at the **manufacturing subsectors**; over the quarter, output has increased in three of the six main sub-sectors (“Engineering and allied industries”, “Total other manufacturing” and “Food products, beverages and tobacco products”) and decreased in two sub-sectors (“Basic metals and fabricated metal products” and “Chemical and pharmaceutical products”). “Textile, leather and related products” remained constant.

Index of Production: Sectoral comparison

Manufacturing Sector Split (based on 2022 GVA)

(a) 25.2%	(b) 17.8%	(c) 16.2%	(d) 9.0%	(e) 8.2%	(f) 3.8%
-----------	-----------	-----------	----------	----------	----------

*The information on this page refers to the private sector only.

The fall in construction output has been severe since the 2007/08 recession. While output remains lower than the 15-year high in Q4 2006, a gradual recovery has been seen in recent quarters. Latest figures show that **construction output** has increased by 14.0% over the year.

Volume of Construction Output in NI: Index (2022=100)

*Defined as all construction activity associated with the following: Industrial, for example, factories and warehouses or else Non-industrial, for example, schools, health centres and banks.

	NI
Change on quarter (Q3 2024 v Q2 2024):	+6.7%
Change on year (Q3 2024 v Q3 2023):	+14.0%
Annualised change (Q4 2023-Q3 2024 v Q4 2022-Q3 2023):	+5.8%

- CH – Manufacture of basic and fabricated metal products
- CI – Manufacture of computer, electronic and optical products
- CJ – Manufacture of electrical equipment
- CK – Manufacture of machinery and equipment
- CL – Manufacture of transport equipment
- CM – Other manufacturing, repair and installation

- Other**
- B – Mining and quarrying
- D – Electricity, gas, steam and air conditioning supply
- E – Water supply; sewerage and waste management

- Construction**
- F – Construction
- Agriculture**
- A – Agriculture, forestry and fishing

* Excludes working proprietors ** Includes data from farm census

More than half of all VAT and/or PAYE registered businesses in NI are in the Services sector. In comparison, the Services sector provides three quarters of **private sector employee jobs**.

Source: [NISRA Inter Departmental Business Register](#)

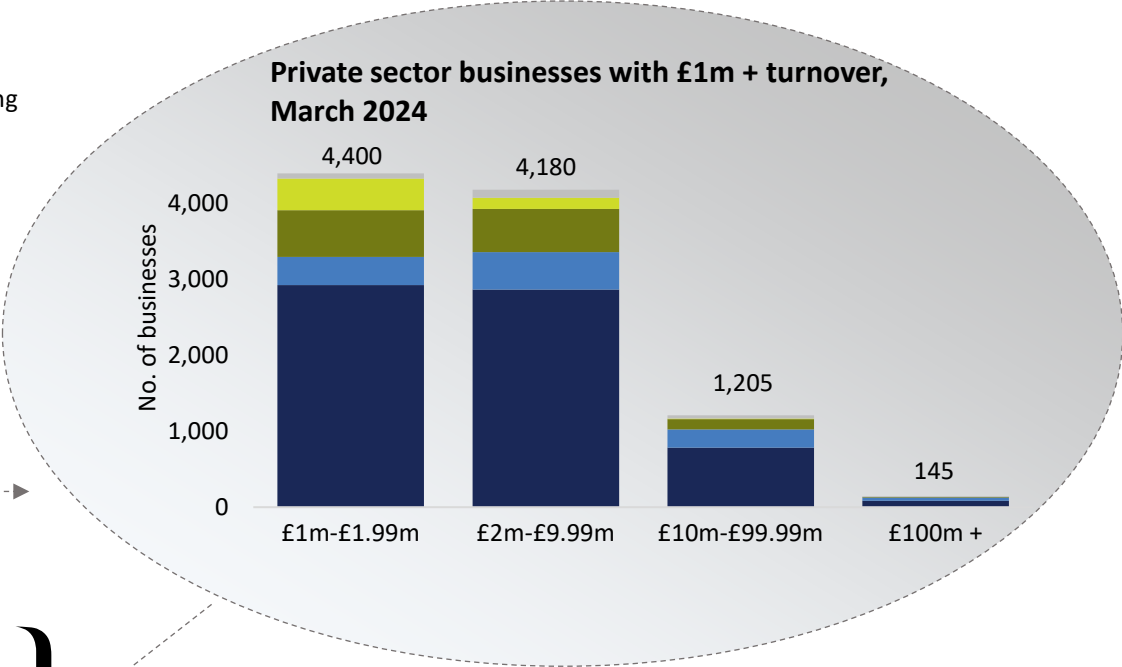

Source: [NISRA Business Register and Employment Survey](#)

*Excludes working proprietors. The majority of agricultural businesses will have working owners.

** Includes data from the DAERA Agriculture Census.

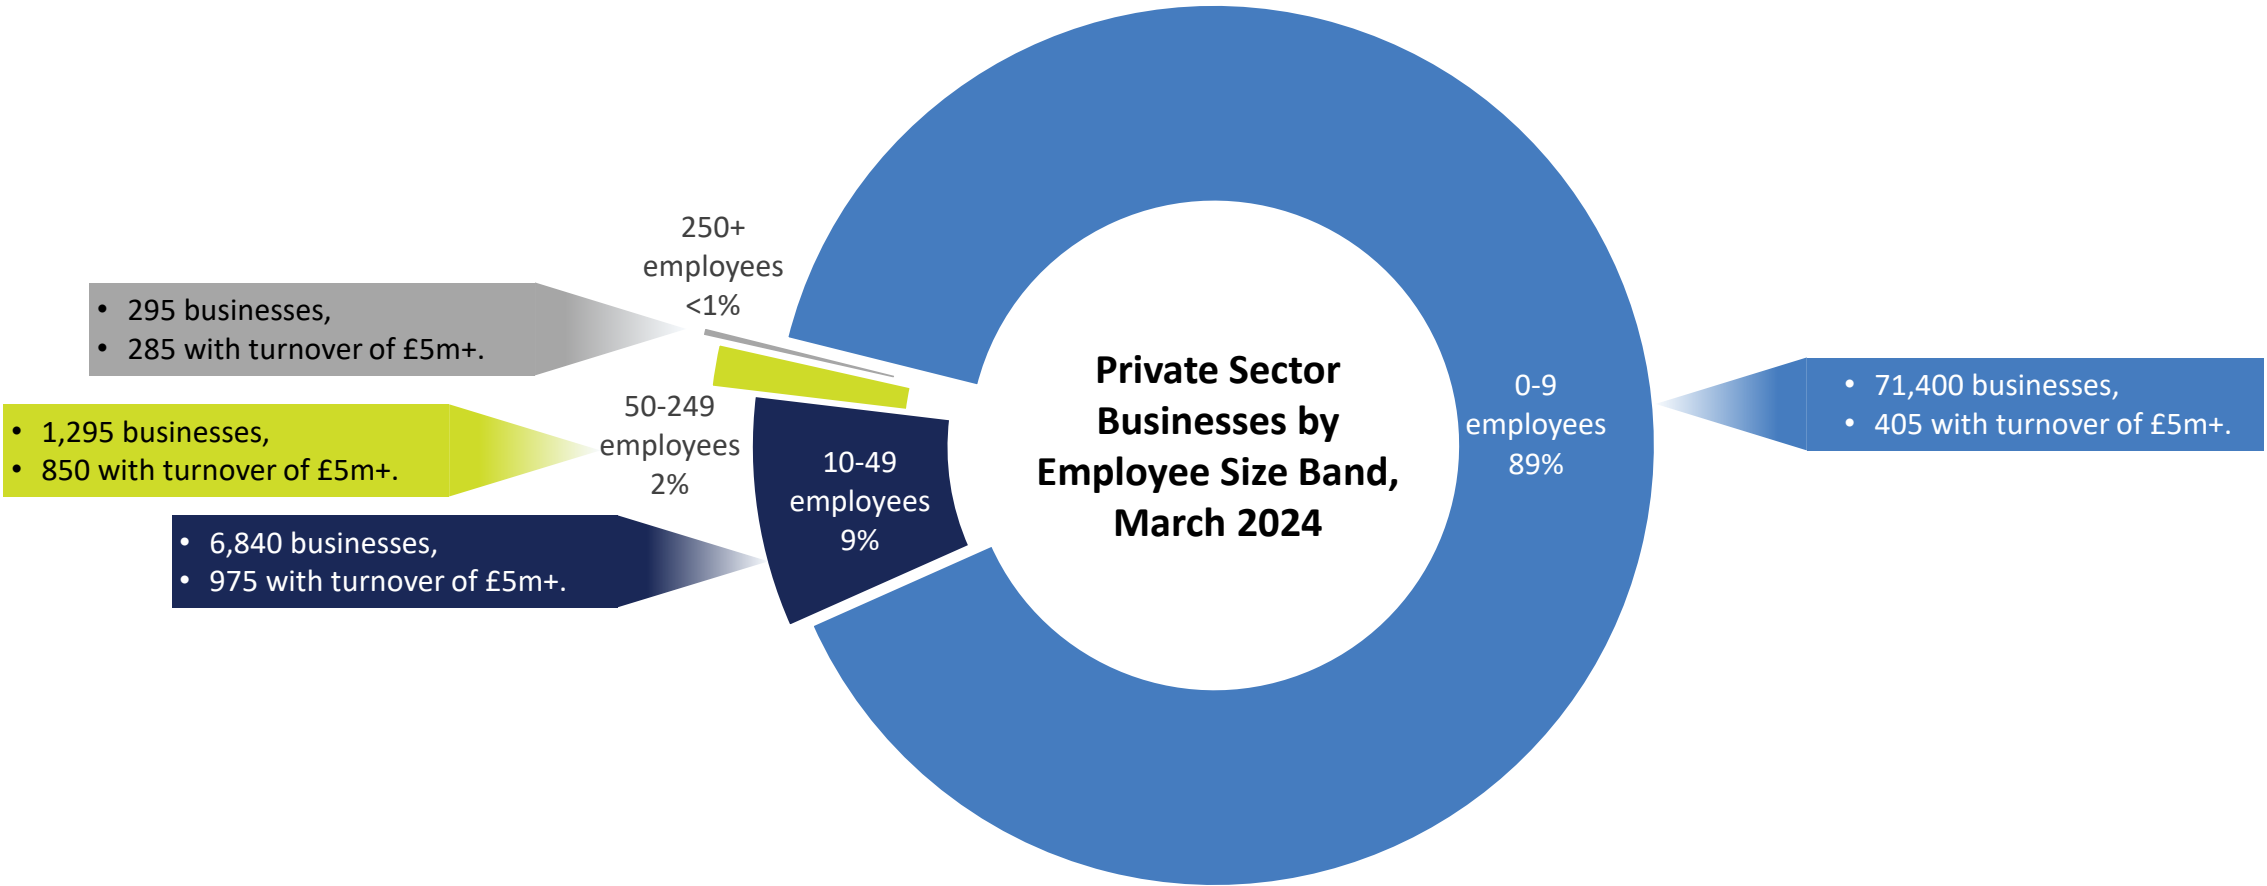

Just over 1 in 10 private sector businesses generated a **turnover** of £1 million or more and around two-thirds of these are in the service sector.

VAT and/or PAYE registered private sector businesses by turnover (£ thousand) and sector, March 2024

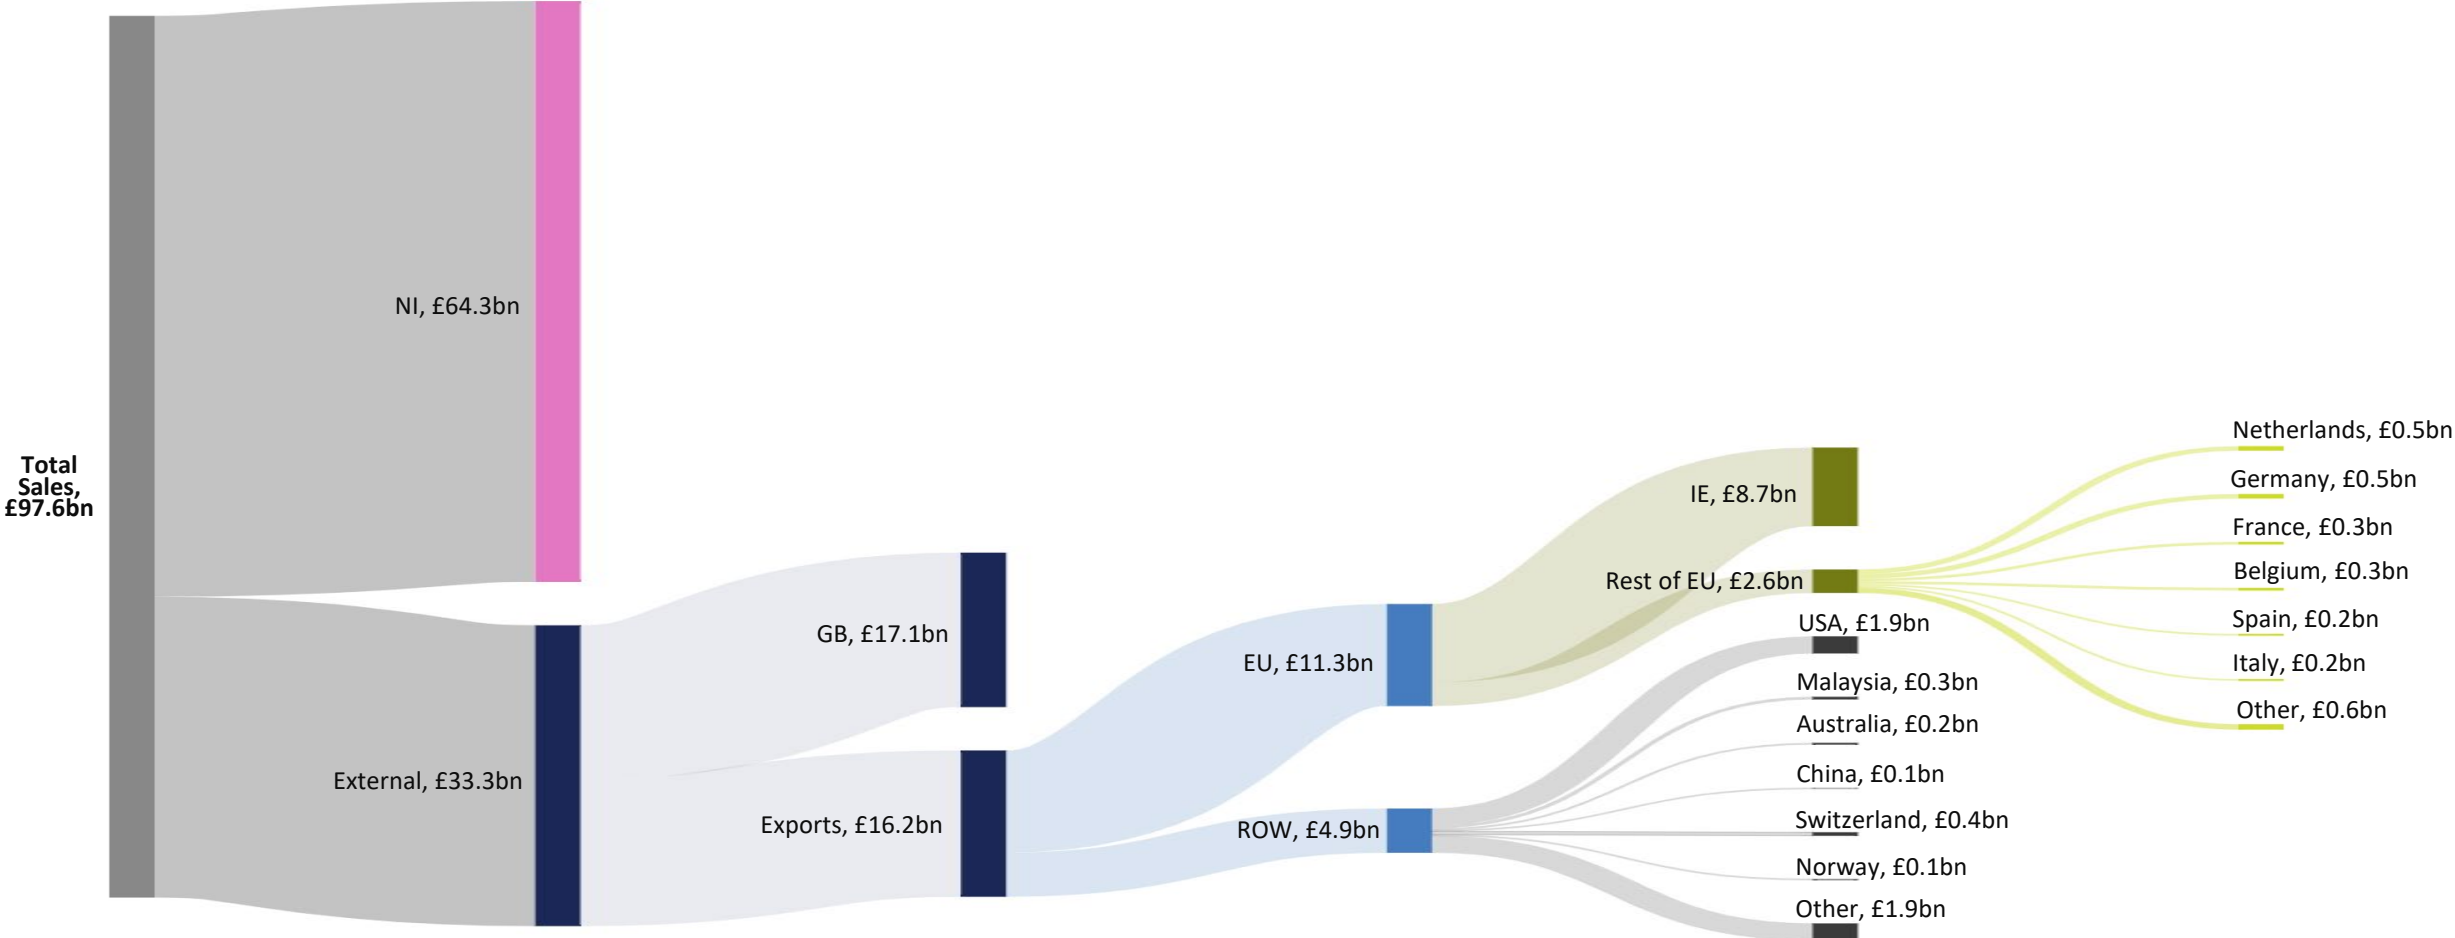

Source: [NISRA Inter Departmental Business Register](#)

Around 9 in 10 private sector businesses have fewer than 10 employees.
25% of businesses with 10 or more employees generated a turnover of £5m or more.

Total **sales** by companies in NI were estimated to be worth £97.6 billion in 2023. Sales to customers outside Northern Ireland (External Sales) generated £33.3 billion, fairly evenly split between GB and **export** markets.

Sales by destination, 2023

Total **purchases** by companies in NI were estimated to be worth £62.0 billion in 2023. Purchases from customers outside Northern Ireland (External purchases) were worth £26.7 billion, with three-fifths of this coming from GB.

Purchases and imports by destination, 2023

Research & Development spend is viewed as a key indicator of innovation. Business spend on R&D was £840.1m in 2023. Latest results from the UK Innovation Survey show that around 1 in 3 businesses in NI* are ‘innovation active’.

Research and Development spend in Northern Ireland, 2018-2023

* Businesses of 10 or more employees. **Adjusted using GDP deflator to remove effects of inflation.

Labour Market

Department of
Finance

An Roinn
Airgeadais

The **employment rate** has increased over the most recent quarter and the rate in NI is consistently below the rate in the UK overall. 13% of those in employment are self-employed (115,000).

Seasonally adjusted employment rate (16-64), Sep-Nov 1995 to Sep-Nov 2024

55%
Sep-Nov 1995

Sep-Nov 2024

Source: [NISRA Labour Market Report](#)

The long-term increase in the employment rate is more pronounced among females. The gap between male and female **employment rates** has widened again in recent quarters and now stands at 6.6 pps.

Seasonally adjusted employment rate (16-64) by gender, Sep-Nov 1995 to Sep-Nov 2024

Source: [NISRA Labour Market Report](#)

Economic activity among the oldest age-group (50-64) has increased in the most recent quarter. Both 25-34 and 35-49 age groups have experienced a decrease in economic activity across the most recent quarter.

Economic activity rate (16-64) by age-group, Sep-Nov 1995 to Sep-Nov 2024

Source: [NISRA Labour Market Report](#)

Economic activity rates vary by Local Government District; they are lowest in Derry City and Strabane, and highest in Mid and East Antrim.

Employment rate (16-64) by Local Government District, 2023

Employment rate (16-64) by Local Government District, 2013 to 2023

The private sector accounts for around three-quarters of jobs* in Northern Ireland. The number of **private sector jobs** is around 26% higher than the level in June 2009, whereas there remains a similar level of **public sector jobs**.

Index of Private and Public Sector Jobs*, Jun 2009 – Sep 2024

Public - Private sector split, Sep 2024 (seasonally adjusted)

Private: 605,950 jobs (73%)	Public: 226,010 jobs (27%)
-----------------------------	----------------------------

Source: [NISRA Quarterly Employment Survey](#)

*Excludes self-employed

The **unemployment rate** in NI (1.7%) remains noticeably lower than the level following the post-2007/08 recession peak (8.2% in Jun-Aug 2012). The number of confirmed **redundancies*** in the year to 31st December 2024 is 29% lower than the number in the preceding 12 months.

Seasonally adjusted unemployment rate (16+), Sep-Nov 1995 to Sep-Nov 2024

	1-Jan-23 to 31-Dec-23	1-Jan-24 to 31-Dec-24	Change
Redundancies*			
Confirmed	2,600	1,840	-760 (-29%)
Proposed	4,300	2,980	-1,320 (-31%)

*Companies who propose less than 20 redundancies are not required to notify the Department, therefore the figures provided are likely to be an underestimate of total job losses.

The **claimant count** consists of Jobseekers Allowance (JSA) claimants plus those Universal Credit (UC) claimants claiming for the reason of being unemployed*. The number of claimants more than doubled in the 2 months following the March 2020 lockdown. The total now stands at 39,990, around 34% higher than in March 2020.

Seasonally adjusted claimant count (experimental), Apr 1997 – Dec 2024

*Some claimants are wholly unemployed and seeking work, while others may be employed but with low earnings that make them eligible for unemployment related benefit support.

**A number of claims across the UK to the UC element of the Claimant Count were coded to incorrect locations for data relating to December 2018 to November 2019. This has been corrected for December 2019 onwards, but previous periods remain affected. The impact of the revision on NI for December 2019 was an increase of fewer than 1,000 cases.

Source: [NISRA Labour Market Report](#)

The relatively high level of **economic inactivity** is a long-standing feature of the NI labour market. Although there has been some reduction over the long-term, the rate is now 4.5 percentage points above that of the UK.

Seasonally adjusted economic inactivity rate (16-64), Sep-Nov 1995 to Sep-Nov 2024

15%
Sep-Nov 1995

Sep-Nov 2024

Non-zero axis

Source: [NISRA Labour Market Report](#)

There has been a shift in the underlying reasons for **economic inactivity** over the past 30 years. The proportion inactive due to family and home care reasons has reduced substantially and long-term sickness is now the largest contributor to inactivity.

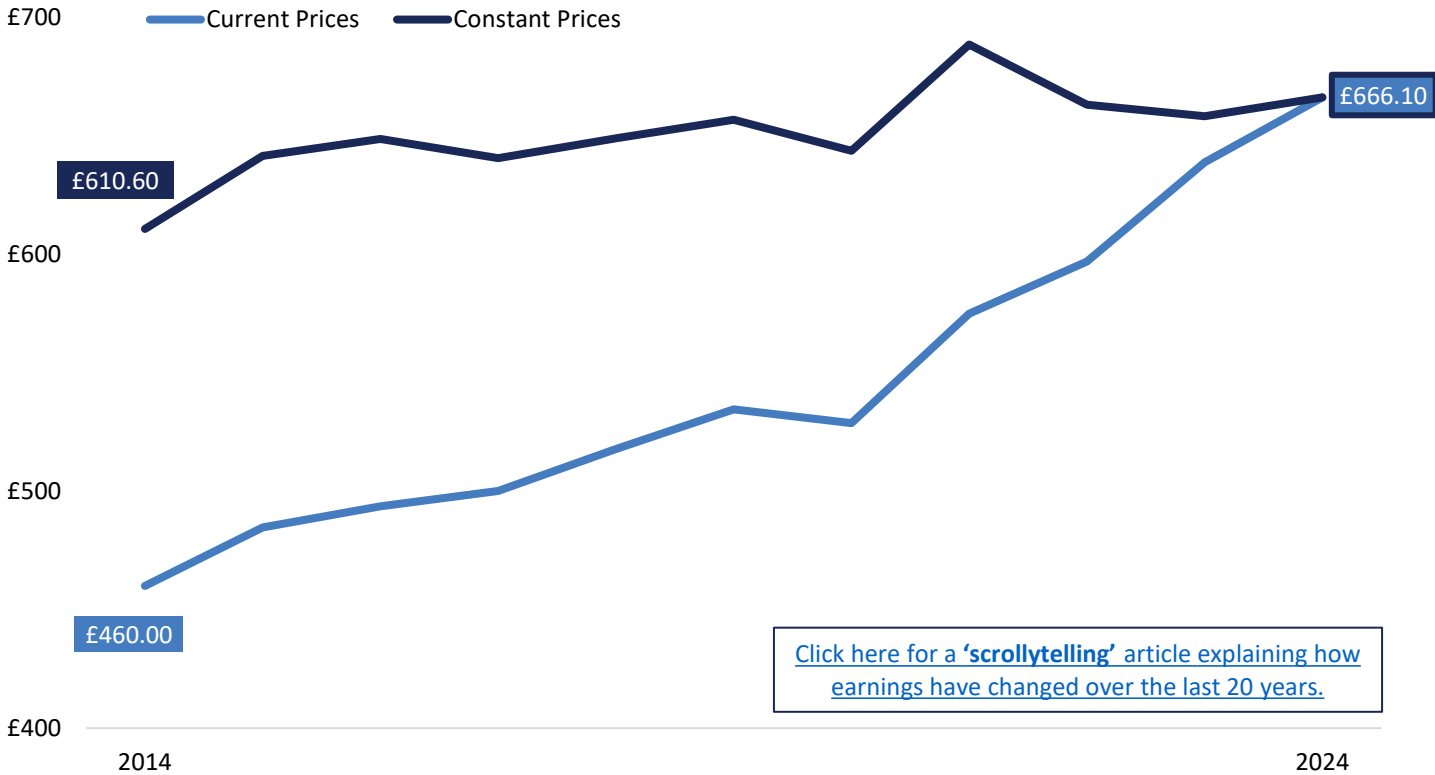

Reasons for economic inactivity (16-64), Jan-Mar 1995 to Sep-Nov 2024

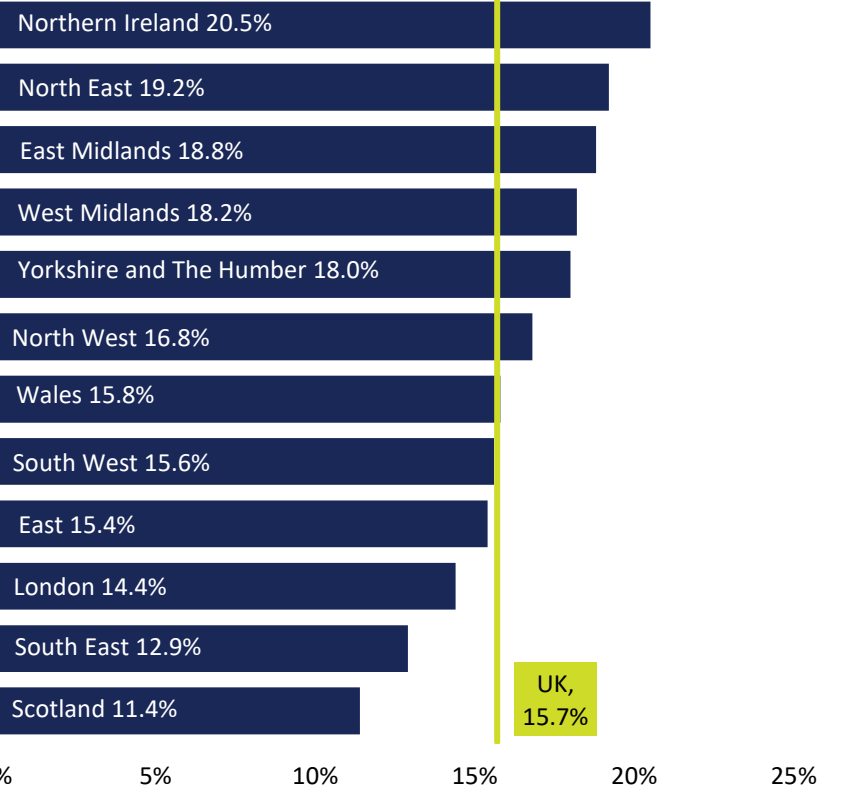

Source: [NISRA Labour Market Report](#)

Earnings increased by 1.2% in real terms* over the year to April 2024. Around one in five jobs in Northern Ireland pays an hourly rate below the real living wage.

Median gross weekly earnings for full-time employees in nominal and real terms, 2014 - 2024
