

THE REGISTRAR GENERAL'S QUARTERLY REPORT FOR NORTHERN IRELAND

KEY POINTS

BIRTHS AND STILLBIRTHS

- The number of births registered in the quarter under review was 5,334 (2,635 males and 2,699 females). The annualised rate was 12.6 births per 1,000 of the estimated population, which was 0.1 below that for the corresponding quarter of 2001.
- Live births outside marriage numbered 1,768, which represented 33.1 per cent of the total live births registered.
- The number of stillbirths registered was 30 and the rate was 5.6 stillbirths per 1,000 births (including stillbirths).

DEATHS

- Deaths registered during the quarter numbered 3,511 (1,706 males and 1,805 females). The annualised rate was 8.3 deaths per 1,000 of the estimated population, which was 0.2 below that for the corresponding quarter of 2001.
- Deaths of children aged under one year numbered 26 representing an infant mortality rate of 4.8 per 1,000 live births registered, which was 0.5 below that for the corresponding quarter of 2001.
- The number of deaths from cancer totalled 887 comprising of 471 males and 416 females. Cancer deaths accounted for 25.3 per cent of the total deaths in this quarter.
- There were 370 male and 337 female deaths due to ischaemic heart disease in this quarter. These accounted for 20.1 per cent of the total deaths in the quarter.

Attached are a number of standard tables, which give some further details of the registration events in the period April-June 2002.

GENERAL NOTES

The figures on births and deaths have been compiled from returns furnished by the local registrars. The figures final figures for each year will be found in the Registrar General's Annual Report.

Births, stillbirths and deaths

Figures relate to those registered during the quarter under review. A birth or stillbirth is assigned to the usual place of residence of mother and excludes births and stillbirths to non-Northern Ireland residents. Deaths are assigned to the usual residence of the deceased, if such residence is within Northern Ireland; otherwise to the place of occurrence and non-resident deaths are included in the figures.

Birth, stillbirth and death rates

Rates for 2001 and 2002 data are calculated on the estimated home population as at 30th June 2001, and the 30th of June 2002 respectively. All quarter rates have been annualised by multiplying the rates by 4.

Stillbirth

Refers to a child which has been issued from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life.

Infant mortality

Refers to all deaths in the first year of life.

Cancer

Refers to all malignant neoplasms of the lymphatic and haematopoietic tissues, including Hodgkin's disease, leukaemia and aleukaemia.

Cause of death coding

Each death registered in Northern Ireland is attributed to a single cause and coded in accordance with the International Statistical Classification of Diseases, Injuries and Causes of Death (ICD). The General Register Office in Northern Ireland changed from the ninth (ICD9) to the tenth (ICD10) edition from January 2001. Data in this bulletin prior to 2001 will be based on ICD9 and after 2001 will be based on ICD10. The ICD codes used for the causes of death in Tables 1 and 3 are as follows:

Cancer	ICD9 140-208	ICD10 C00-C97
Ischaemic Heart Disease	ICD9 410-414	ICD10 I20-I25

Seasonality

This short report presents selected information that illustrates seasonal variations in birth and deaths in Northern Ireland.
