

## **Northern Ireland Quarterly Construction Bulletin**

The Structure of the Construction Industry in Northern Ireland

### Introduction

This publication contains information relating to the following:

- Type of construction firms operating in Northern Ireland;
- Number of people employed in the construction industry in Northern Ireland;
- Average earnings in the construction industry in Northern Ireland; and
- Reported accidents in the construction industry in Northern Ireland.

This information is included at the request of the construction sector in Northern Ireland who wished to have all relevant construction statistics collated in one publication. No additional commentary on these statistics is provided within this publication but information on the sources of these statistics is provided below.

## Types of construction firms operating in Northern Ireland – Table 2.1

This information is extracted from the Inter-Departmental Business Register (IDBR). The IDBR is a business register which contains information on all businesses in the UK which are VAT registered or operating a PAYE scheme. The register is located in the Office for National Statistics (ONS) Newport but the NI element of the register is maintained within Economic & Labour Market Statistics Research Branch (NISRA, DoF). All businesses contained on the IDBR are categorised using SIC 2007. This is an international classification system that categorises businesses by the type of economic activity in which they are engaged. SIC (2007) Divisions 41-43 of the IDBR relate to Construction activities, SIC (2007) sub-division 41.1 (Property Developers) are excluded from the Quarterly Construction Enquiry (QCE) sample.

Table 2.1 provides the number of construction firms operating in Northern Ireland by industry breakdown and turnover based on Divisions 41-43 of the Northern Ireland extract of the IDBR (excluding 41.1). The figures contained in Table 2.1 are not published elsewhere other than this bulletin. These figures are updated annually in the Q4 Construction Bulletin of each year. Statistics derived from the IDBR are classified as National Statistics.

Further information relating to the IDBR is available at the following link:

https://www.nisra.gov.uk/statistics/business-statistics/inter-departmental-business-register

# Number of people employed in the Construction Industry in Northern Ireland - Tables 2.2-2.4

This information is sourced from the Census of Employment, the Quarterly Employment Survey (QES) and the Labour Force Survey (LFS).

Table 2.2 provides a full count of the number of employees in the construction industry in Northern Ireland for the latest available year. The source for this information is the Census of Employment which is a statutory survey which has been carried out every two years since 1987. It is a full count of the number of employee jobs in all industries except for agriculture. The self-employed are also not included. Results are available for male, female, full-time and part-time employees up to a five-digit Standard Industrial Classification (SIC) level.

Table 2.2 also provides a breakdown of the number of employees in the construction industry by gender and by construction industry classification. Users should be aware that the industrial classification is based on SIC 2007 which was the appropriate classification to use at the time the figures were originally published.

The information contained in Table 2.2 is first published by Economic & Labour Market Statistics Research Branch (NISRA, DoF) before it is published in this bulletin.

Statistics derived from the Census of Employment are classified as National Statistics. Further information relating to the Census of Employment is available at the following link:

https://www.nisra.gov.uk/statistics/annual-employee-jobs-surveys/census-employment

Table 2.3 provides the latest estimate of the number of Northern Ireland Employees in Construction based on the Quarterly Employment Survey (QES). The QES is designed to provide short-term employee job estimates for Northern Ireland in the period between Censuses of Employment.

The QES covers all public sector employers, all private sector employers with 25 or more employees and a representative sample of smaller firms.

It provides employee jobs estimates by gender, working pattern (full / part-time) and by SIC2007 for Northern Ireland as a whole. Seasonally adjusted figures are also available at broad industry level. This information is collected by Economic & Labour Market Statistics Research Branch (NISRA, DoF).

The information contained in Table 2.3 is first published by Economic & Labour Market Statistics Research Branch (NISRA, DoF) before it is published in this bulletin and the statistics are classified as National Statistics. The statistics are updated quarterly in the NI Construction Bulletin.

Further information relating to the QES is available at the following link:

https://www.nisra.gov.uk/statistics/labour-market-and-social-welfare/quarterly-employment-survey

Table 2.4 provides an estimate of the number of self-employed persons in the construction industry in Northern Ireland and is based on estimates from the LFS. By definition, the Census of Employment and the QES exclude all self-employed jobs. The information contained in Table 2.4, therefore, supplements the information provided on the number of employee jobs in construction reported in Tables 2.2 and 2.3.

The (LFS) is a continuous survey of NI Households. The main purpose of the survey is to provide information on the labour market, including employment, unemployment and economic activity rates. It also covers a range of related topics, such as income, qualifications, training and disability.

The UK is obliged under European Commission (EC) regulations to carry out a (LFS), using internationally agreed definitions of unemployment, employment and economic activity. Results from the Spring quarter of each year are supplied to Eurostat and can be compared with other EC member states.

The information contained in Table 2.4 is first published in this bulletin. The table is updated quarterly and shows the latest quarterly estimate of the number of self-employed persons in the Northern Ireland Construction Industry together with the annual estimate back to 2001. Statistics derived from the LFS are classified as National Statistics.

The findings from the LFS are published by Economic & Labour Market Statistics Research Branch (NISRA, DoF) in their Labour Market Statistics Bulletin. Further information relating to Labour Market Statistics is available at the following link:

https://www.nisra.gov.uk/statistics/labour-market-and-social-welfare/labour-force-survey

## Average Earnings in the Construction Industry in Northern Ireland – Tables 2.5 - 2.7

This information is sourced from the Annual Survey of Hours and Earnings (ASHE) which is a National Statistics survey. The Annual Survey of Hours and Earnings (ASHE) is a UK wide survey that provides information on hourly, weekly and annual earnings by gender, work patterns, industry and occupation, including public versus private sector pay comparisons. The Northern Ireland element of the ASHE survey is carried out by Economic & Labour Market Statistics Research Branch (NISRA, DoF).

The statistics contained in Tables 2.5-2.7 are first published in this bulletin. The figures contained in tables 2.5-2.7 are updated annually in the Q3 Construction Bulletin of each year.

Further information relating to ASHE is available at the following link:

https://www.nisra.gov.uk/statistics/labour-market-and-social-welfare/annual-survey-hours-and-earnings

# Reported Accidents in the Construction Industry in Northern Ireland – Tables 2.8.1 – 2.8.3

This information is sourced from the Case Management System (CMS) of the Health and Safety Executive for Northern Ireland (HSENI). The information comes from incident reports submitted to HSENI under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR).

The statistics contained in Tables 2.8.1-2.8.3 are first published in the HSENI annual report and are updated annually. These statistics are classified as 'Official Statistics'.

Further information is available at <a href="https://www.hseni.gov.uk">www.hseni.gov.uk</a>.

Source: NI Business Register and Employment Survey 2017

NOTES: 1 The Business Register and Employment Survey (BRES) is a statutory enquiry of employers in Northern Ireland, carried out under the

Statistics of Trade and Employment (Northern Ireland) Order 1988. Results are available according to sex, full or part-time working, industrial activity and location,

<sup>2</sup> The BRES covers employee jobs only. It excludes: agriculture (but includes animal husbandry service activities and hunting, trapping and game propagation), the self employed, HM Armed Forces, private domestic servants, homeworkers, trainees without a contract of employment (non-

 <sup>3</sup> Figures for the number of employees in Agriculture are available separately from the Department of Agriculture, Environment and Rural Affairs (DAERA)
 4 Persons working 30 hours or less per week are regarded as being in part-time employment.
 5 The BRES counts the number of jobs rather than the number of persons with jobs. Therefore a person holding both a full-time and a part-time job, or someone  $\boldsymbol{w}$  ith two part-time jobs,  $\boldsymbol{w}$  ill be counted twice.

<sup>6</sup> Employees are classified to: (a) Standard Industrial Classification (SIC 2007) from the business description for each employment unit.

Source: Quarterly Employment Survey (QES), NISRA

Estimates of the number of employee jobs are obtained from the Quarterly Employment Survey (QES). The QES covers all public sector bodies, all private sector firms with 25 or more employees and a sample of the remainder. The sample size has been chosen in order that estimates of total employee jobs should be accurate to within +/- 1% of the Census of Employment total. The survey collects information on numbers of persons in full-time and part-time employment. It should be noted that the survey counts the number of jobs rather than the number of persons with jobs. For example, a person holding both a full-time job and a part-time job, or someone with two part-time jobs, will be counted twice.

<sup>&</sup>lt;sup>1</sup> Figures are rounded to the nearest 10 and may not sum due to rounding.

<sup>&</sup>lt;sup>2</sup> Important Notice: Users of QES data should be aware that the sample coverage used to derive employee jobs estimates in NI has been extended. This has resulted in a discontinuity in the QES employee jobs series from the reference period Q3 2009 onwards.

Table 2.4 Northern Ireland Labour Force Survey Self employed in Construction Industry

| Year (Quarter 4) | Number |
|------------------|--------|
| 2018             | 24,000 |

| 2004             | 34,000 |
| 2003             | 30,000 |
| 2002             | 25,000 |
| 2001             | 25,000 |

#### Notes:

Figures are rounded to the nearest thousand.

Above estimates are subject to sampling error.

Allocation between self employed and employees status is by self assessment. From 2013, the above estimates are based on re-weighted LFS estimates, which are in line with the 2016 mid-year population estimates.

From 2002 to 2012, the above estimates are based on re-weighted LFS estimates, which are in line with the 2014 mid-year population estimates.

Prior to 2002, the above estimates are based on w eighted LFS estimates, w hich are in Figures from 2001 onw ards are based on Q2 (Apr-June) each year.

Figures from 2009 onwards are based on SIC2007.

PBR - payment by results, includes piecework, bonuses, commission and incentive payments (includes profit related pay until 1996).

Premium pay - for shift-work, and for night or week-end work where these are not treated as overtime.
x - data unavailable or suppressed
\*Average hourly earnings are calculated by dividing the sum of the weekly earnings of the group of employees by the sum of their total weekly hours.

<sup>1</sup> To improve coverage, supplementary data was collected for the 2004 and subsequent ASHE surveys for people who changed or started new jobs between sample selection and the survey period. The ASHE results since 2004 are therefore discontinuous with earlier results.

<sup>&</sup>lt;sup>2</sup> For the 2006 ASHE results, ONS also introduced a small number of methodological changes. The ASHE results since 2006 are therefore discontinuous with earlier

results.

3 For 2009 ASHE results, ONS moved from using the SIC 2003 Industrial Classifications to using the SIC 2007 Industrial Classifications. The ASHE results since 2009 are therefore discontinuous with earlier results.

<sup>&</sup>lt;sup>1</sup> To improve coverage, supplementary data was collected for the 2004 and subsequent ASHE surveys for people who changed or started new jobs between sample selection and the survey period. The ASHE results since 2004 are therefore discontinuous

 $<sup>^2</sup>$  For the 2006 ASHE results, ONS also introduced a small number of methodological changes. The ASHE results since 2006 are therefore discontinuous with earlier results.

<sup>&</sup>lt;sup>3</sup> For 2009 ASHE results, ONS moved from using the SIC 2003 Industrial Classifications to using the SIC 2007 Industrial Classifications. The ASHE results since 2009 are therefore discontinuous with earlier results.

## 2.8 Statistics of accidents reported to HSENI¹ 2002/03 – 2017/18

| 2.8.1. All accidents – fatal, major injury and over 3 da | ıy |
