

# Northern Ireland Quarterly Construction Bulletin

Theme: Business and Energy

Frequency: Quarterly

Geographical area: Northern Ireland

Reference period: Quarter 2 (April - June) 2024

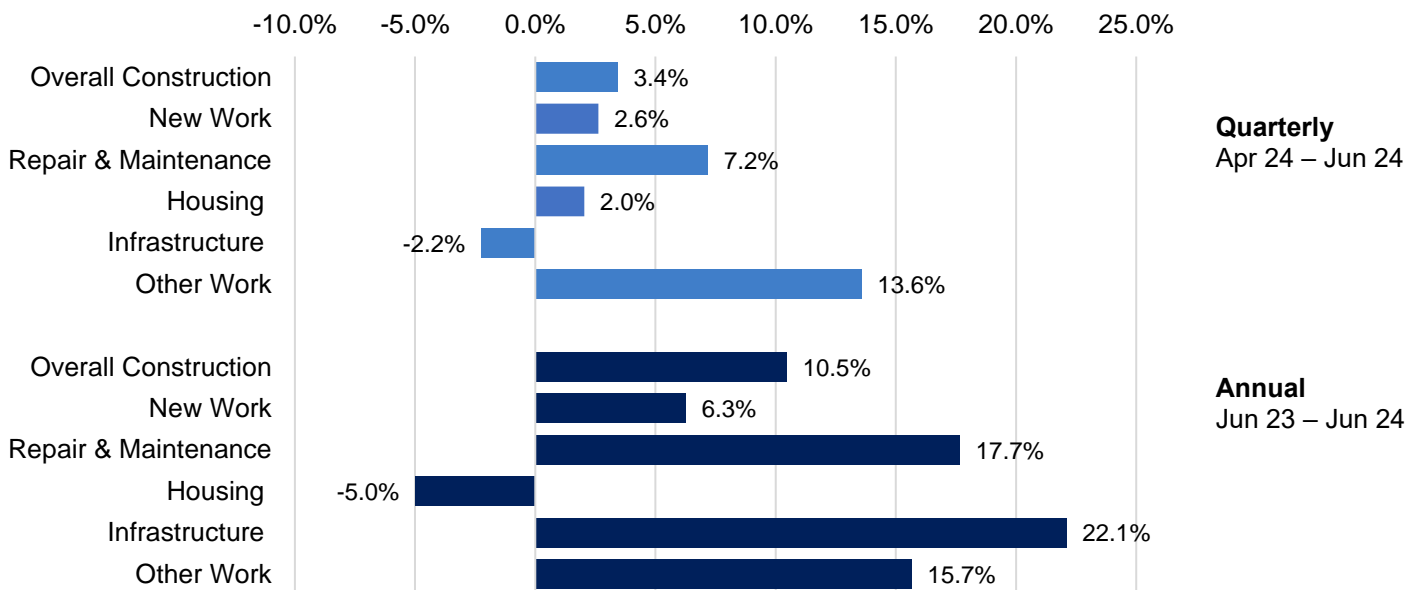

The Construction Output Statistics published in the Northern Ireland (NI) Construction Bulletin are intended to provide a general measure of quarterly and annual changes in the volume and value of construction output in Northern Ireland.

The latest estimates of construction output carried out in Northern Ireland cover **Quarter 2 2024 (April - June)**. It excludes work carried out by Northern Ireland Construction firms in other parts of the UK or elsewhere. All figures are adjusted for seasonality where appropriate, where the [seasonally adjusted series](#) started in 2000.

## Key Points

- The total volume of construction output increased by 3.4% over the second quarter of 2024, increased by 10.5% over the year and increased by 5.4% on a rolling four quarter basis.
- The increase in construction output seen in Quarter 2 2024 from the previous quarter was driven by increases in both New Work (2.6%) and Repair and Maintenance (7.2%).

Figure 1: **Quarterly** and **Annual** changes in Construction Output by sector

## Accredited Official Statistics

[Accredited official statistics](#) are a sub-set of official statistics that have been independently reviewed by the Office for Statistics Regulation. These accredited statistics are independently reviewed by the Office for Statistics Regulation in March 2012. They comply with the standards of trustworthiness, quality, and value in the [Code of Practice for Statistics](#) and should be labelled ‘accredited official statistics’.

Producers of accredited official statistics are legally required to ensure they maintain compliance with the Code. Accredited official statistics are called National Statistics in the Statistics and Registration Service Act 2007.

The full [assessment](#) of Quarterly Output in the Construction Industry in Northern Ireland is available on the UK Statistics Authority website.

Since the assessment by the UK Statistics Authority, we have continued to comply with the Code of Practice for Statistics, and have made the following improvements:

- Removed pre-release access to enhance trustworthiness, with the view to bring the publication date forward.
- Transferred data to an improved case management system (Integrated Business Survey System).
- Made improvements to the data collection process to standardise with other business surveys and ensure best practice is followed.
- Reduced business burden by offering the option of online data returns.
- Improved accessibility by amending the format and structure of reports in line with accessibility regulations.
- [Consulted users](#) on streamlining the QCE statistical bulletin.

Our statistical practice is regulated by OSR. They set the standards of trustworthiness, quality and value in the Code of Practice for Statistics that all producers of official statistics should adhere to. You are welcome to contact us directly with any comments about how we meet these standards. Alternatively, you can contact OSR by emailing [regulation@statistics.gov.uk](mailto:regulation@statistics.gov.uk) or via the OSR website.

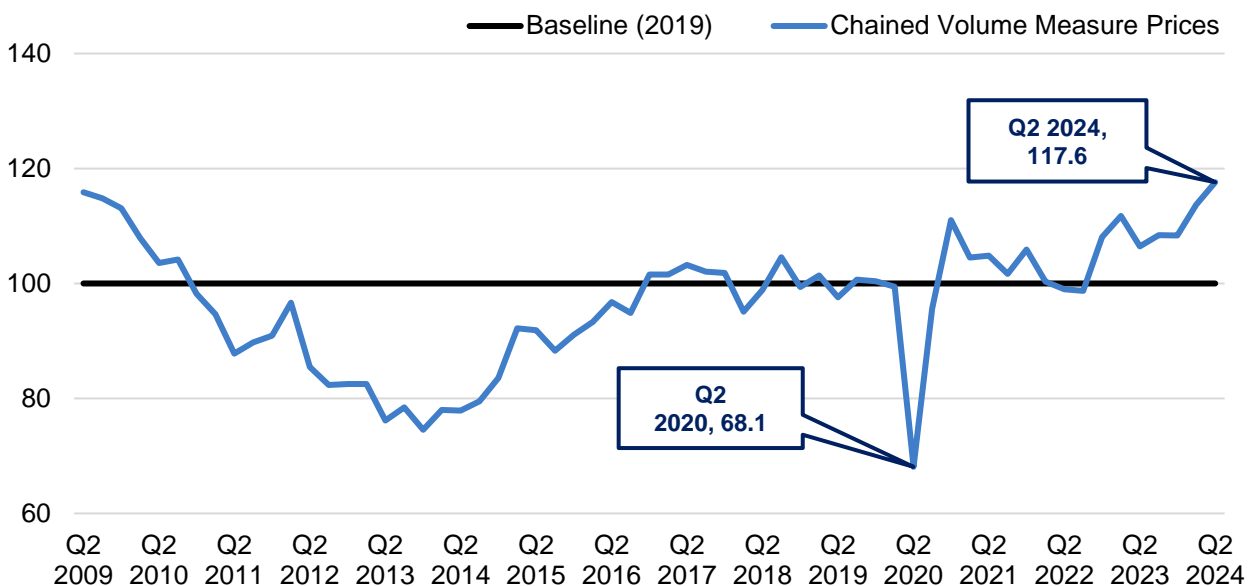

## Construction Output Summary

**Construction Output:** Construction activity measured by the QCE includes general construction and demolition work, construction and repair of buildings, civil engineering, installation of fixtures and fittings and any other building completion work. This output is then converted into an index value which is a convenient form of expressing a series in a way that makes it easier to see changes in that series. The numbers in the series are expressed relatively, in this case the average of the turnover in 2019 chosen to be the 'base' (expressed as 100) and other turnover values being measured relative to this base.

Figure 2 shows the volume of construction output for Northern Ireland from Quarter 2 2009 through to Quarter 2 2024, indexed to 2019.

In the second quarter of 2024 the volume of construction output increased by 3.4% over the quarter, increased by 10.5% over the year and increased by 5.4% on a rolling four quarter basis.

Figure 2: Volume of Construction Output in NI (index), Q2 2009 – Q2 2024

[Download Q2-24 Data](#)

In Quarter 2 2024 Construction output reached a 15 year high following seven consecutive quarters of annual growth. The upward trend experienced by construction output since Quarter 3 2022 has mainly been driven by an increase in Repair and Maintenance output over the same period.

Construction output is now 17.2% above the pre-pandemic figure seen in Quarter 4 2019, and 72.7% above the series low seen in Quarter 2 2020.

## Construction Output – New Work

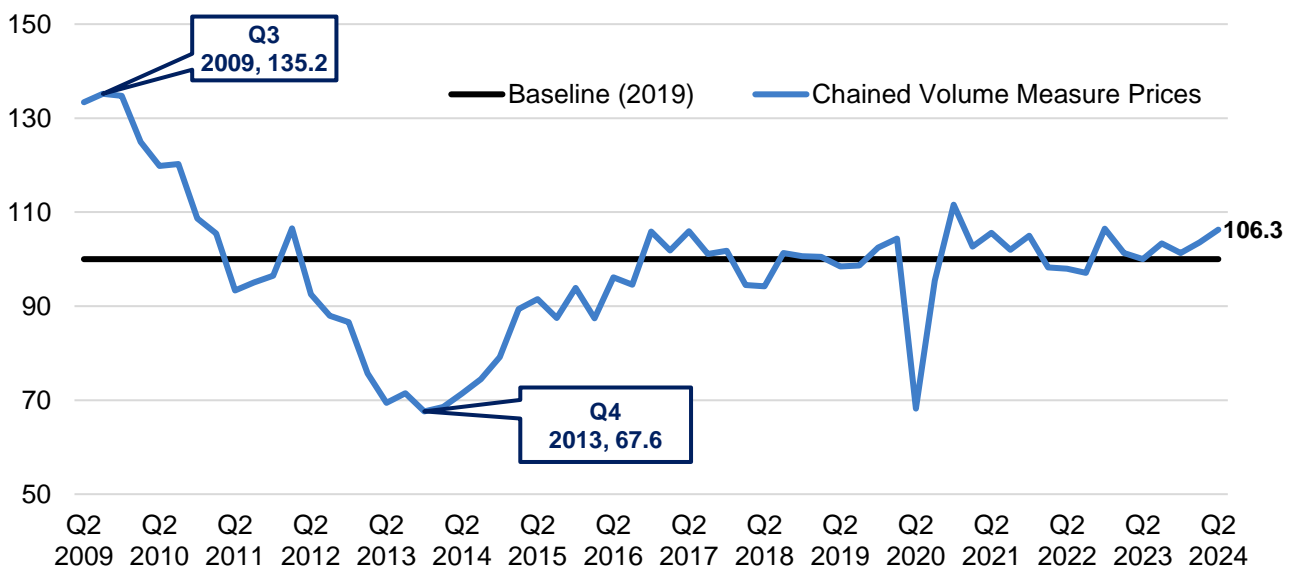

**New Work:** is any new construction activity for example, factory and office extensions, major re-construction, major alterations, site preparation and demolition.

In Quarter 2 2024, New Work accounted for around three fifths (60.1%) of all construction output. Historically in Northern Ireland, New Work has been the largest sub-component of overall construction output.

Figure 3 shows the volume of New Work output for Northern Ireland from Quarter 2 2009 through to Quarter 2 2024, indexed to 2019.

In the second quarter of 2024, the volume of New Work increased by 2.6% over the quarter, increased by 6.3% over the year and increased by 2.4% on a rolling four quarter basis.

Figure 3: Volume of New Work Output in NI (index), Q2 2009 – Q2 2024

[Download Q2-24 Data](#)

The volume of New Work output remained relatively stable from the end of 2016 onwards, excluding the sharp decline in 2020 seen during the Covid-19 pandemic. In Quarter 2 2024 the series has shown signs of modest growth with New Work output seeing the second consecutive quarter of growth and the second consecutive quarter of annual growth.

New Work output is 3.7% above the pre-pandemic figure seen in Quarter 4 2019 but remains 21.4% below the 15 year high seen in Quarter 3 2009.

## Construction Output – Repair and Maintenance

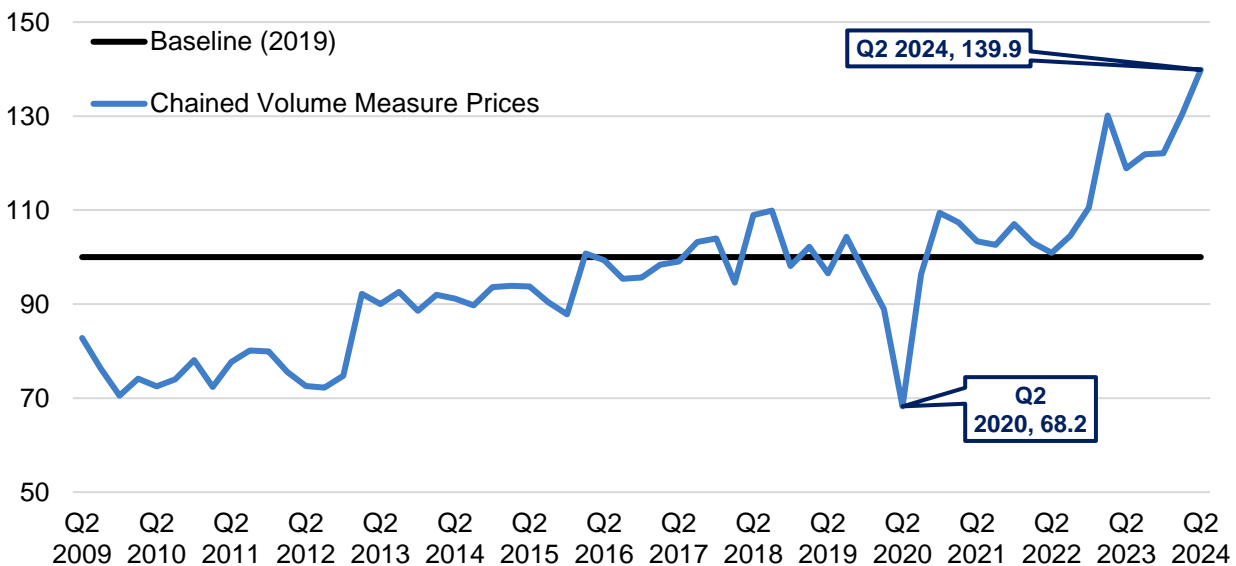

**Repair and Maintenance:** is all on-site work not defined as new construction, for example, housing conversions, extensions and improvements.

In Quarter 2 2024, Repair and Maintenance accounted for around two-fifths (39.9%) of all construction output.

Figure 4 shows the volume of Repair and Maintenance output for Northern Ireland from Quarter 2 2009 through to Quarter 2 2024, indexed to 2019.

In Quarter 2 2024, the volume of Repair and Maintenance output increased by 7.2% over the quarter, increased by 17.7% over the year and increased by 10.8% on a rolling four quarter basis.

Figure 4: Volume of Repair and Maintenance Output in NI (index), Q2 2009 – Q2 2024

[Download Q2-24 Data](#)

The volume of Repair and Maintenance output has been on an upward trend from Quarter 2 2022 onwards. In Quarter 2 2024, Repair and Maintenance has reached a new series high following four consecutive quarters of growth.

Repair and Maintenance output is 44.8% above the pre-pandemic figure seen in Quarter 4 2019, and 104.9% above the series low experienced throughout the pandemic in Quarter 2 2020.

## Construction Output – Housing

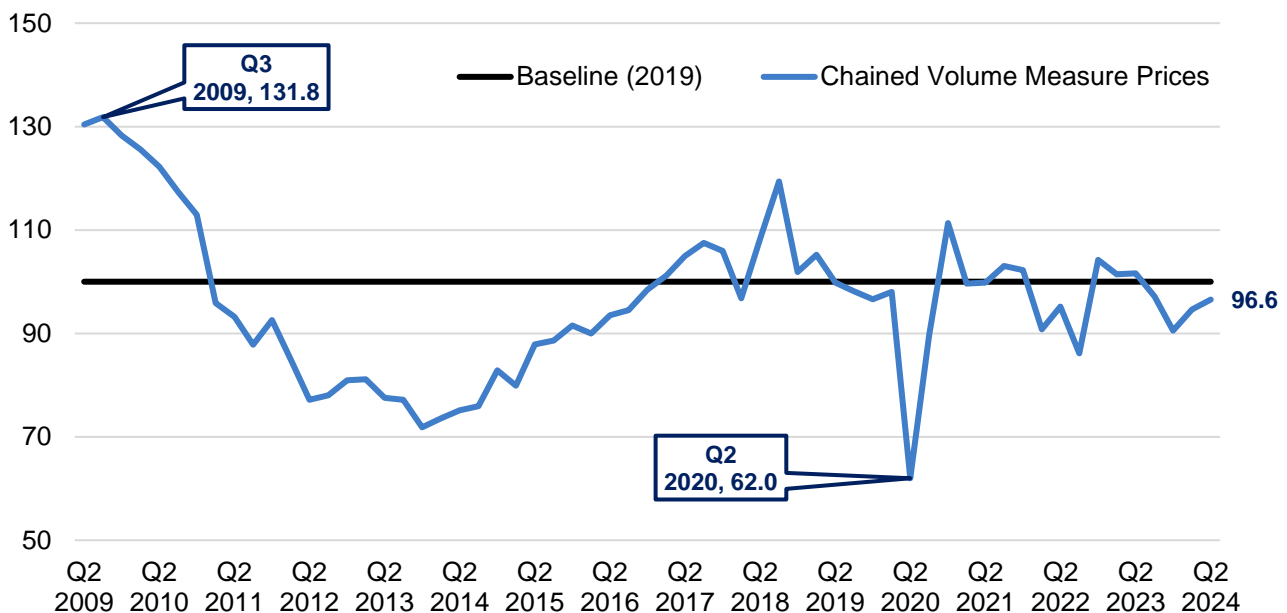

**Housing Output:** is defined as all public and private sector construction activity (New Work and Repair & Maintenance) associated with Housing.

In Quarter 2 2024, Housing accounted for less than one third (29.8%) of all construction output.

Figure 5 shows the volume of Housing output for Northern Ireland from Quarter 2 2009 through to Quarter 2 2024, indexed to 2019.

In the second quarter of 2024, the volume of Housing output increased by 2.0% over the quarter. However, Housing output decreased by 5.0% over the year and decreased by 3.7% on a rolling four quarter basis.

Figure 5: Volume of Housing Output in NI (index), Q2 2009 – Q2 2024

[Download Q2-24 Data](#)

Following the increase in Housing output seen in Quarter 4 2022, the series has been on a downward trend throughout 2023, falling below the pre-pandemic level (Quarter 4 2019) by the end of the year. However, Housing output has recently seen modest recovery with two consecutive quarters of growth in the first and second quarters of 2024.

In Quarter 2 2024 the volume of Housing output is 55.8% above the series low seen in Quarter 2 2020 but remains 26.8% below the series peak in Quarter 3 2009.

## Construction Output – Infrastructure

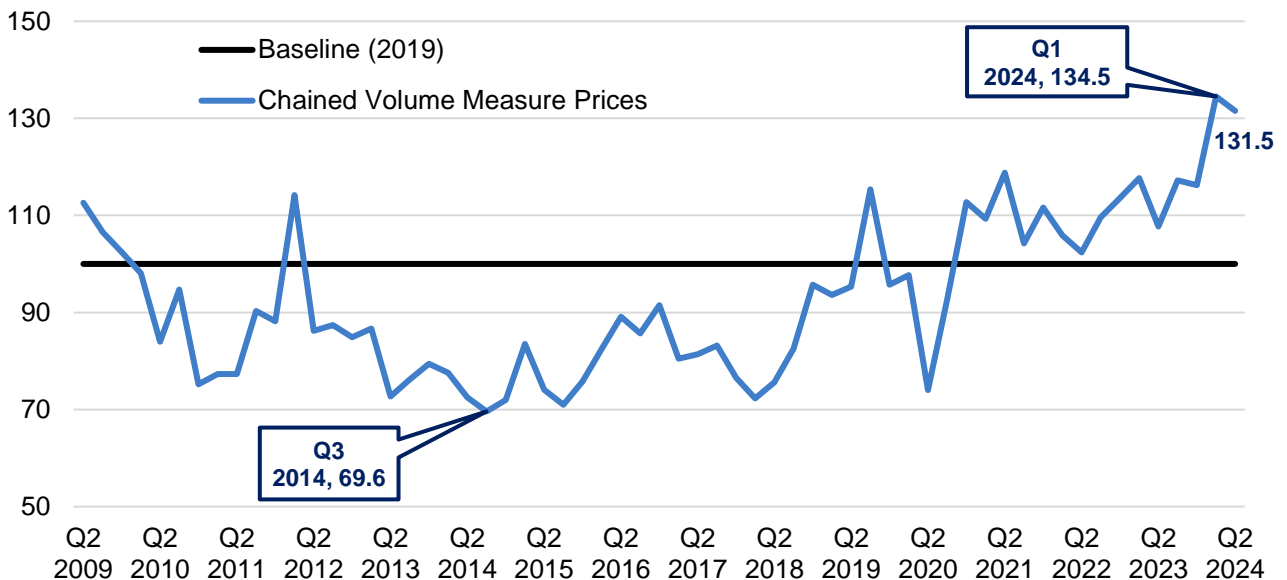

**Infrastructure Output:** is defined as all public and private sector construction activity (New Work and Repair & Maintenance) associated with roads, bridges, car parks, footpaths, water, sewage, electricity, gas, communications, air transport, railways, harbours and waterways.

In Quarter 2 2024, Infrastructure output accounted for less than one third (30.7%) of all construction output.

Figure 6 shows the volume of Infrastructure output for Northern Ireland from Quarter 2 2009 through to Quarter 2 2024, indexed to 2019.

In the second quarter of 2024, the volume of Infrastructure output decreased by 2.2% over the quarter. However, the series increased by 22.1% over the year and increased by 11.3% on a rolling four quarter basis.

Figure 6: Volume of Infrastructure Output in NI (index), Q2 2009 – Q2 2024

[Download Q2-24 Data](#)

The volume of Infrastructure output has been on an upward trend since Quarter 2 2022, evident by an annualised growth of 11.3% on a rolling four quarters basis. Despite a drop from the recent series peak in Quarter 1 2024, Infrastructure output remains 88.9% above the 15 year low seen in Q3 2014, and 37.4% above the pre-pandemic level seen in Quarter 4 2019.

## Construction Output – Other Work

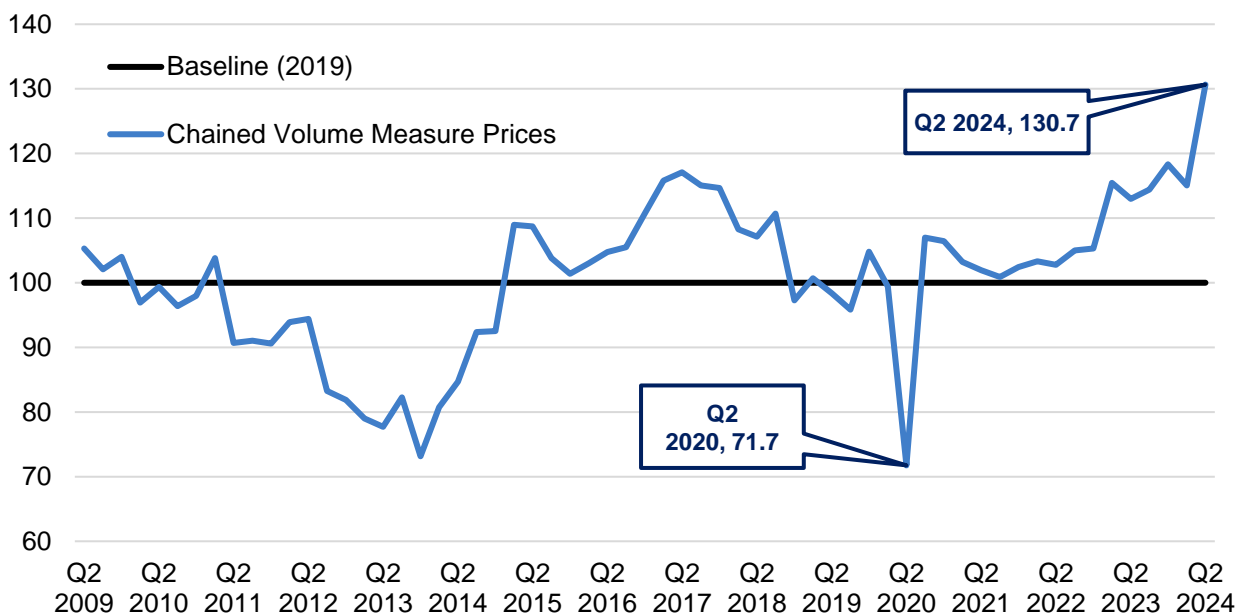

**Other Work Output:** is defined as all public and private sector construction activity (New Work and Repair & Maintenance) associated with the following: Industrial, for example, factories and warehouses or else Non-industrial, for example, schools, health centres and banks.

In Quarter 2 2024, the largest sub-sector was Other Work which accounted for 40.3% of all construction output.

Figure 7 shows the volume of Other Work output for Northern Ireland from Quarter 2 2009 through to Quarter 2 2024, indexed to 2019.

In the second quarter of 2024, the volume of Other Work output increased by 13.6% over the quarter, increased by 15.7% over the year and increased by 9.1% on a rolling four quarter basis.

Figure 7: Volume of Other Work Output in NI, Q2 2009 – Q2 2024

[Download Q2-24 Data](#)

The volume of Other Work output has seen an upward trend from Quarter 3 2021 onwards, reaching a new series high in Quarter 2 2024 following annual growth in nine of the previous ten quarters.

In the second quarter of 2024, the series is 24.7% above the pre-pandemic figure seen in Quarter 4 2019 and 82.1% above the series low experienced in Quarter 2 2020.

## Further Information

Data published within this bulletin is available to download from our [website](#) and the new [NISRA Data Portal](#).

Detailed background information documents and methodology information have also been published [online](#) for users to refer to for more detailed information on the QCE.

We have also published information on revisions to the QCE series which users can access on our [website](#).
